

Technical Information

Liquiphant T FTL20

Level limit switch

Level limit switch for liquids

Application

The Liquiphant T FTL20 is a level limit switch for all kinds of fluids and is used in tanks, containers and pipelines. It is used in cleaning and filtering systems and coolant and lubricant tanks as an overspill protection or as a pump protector.

The FTL20 is ideal for applications which previously used float switches and conductive, capacitive and optical sensors.

It also works in applications which are unsuitable for these measuring methods due to conductivity, build-ups, turbulence, flows or air bubbles.

The FTL20 is not suitable for hazardous areas and areas where the medium temperature is above 150 °C.

For hygienic areas the use of FTL20H is recommended.

Your benefits

- Operational safety, reliability and universal applicability through use of the tuning fork measuring principle
- External test option using test magnet
- On-site control using external LED display
- Easy to install even at points difficult to access due to compact construction
- Rugged stainless steel housing (316L)
- Service-friendly plug-in connections
- For medium temperatures up to 150 °C

Function and system design

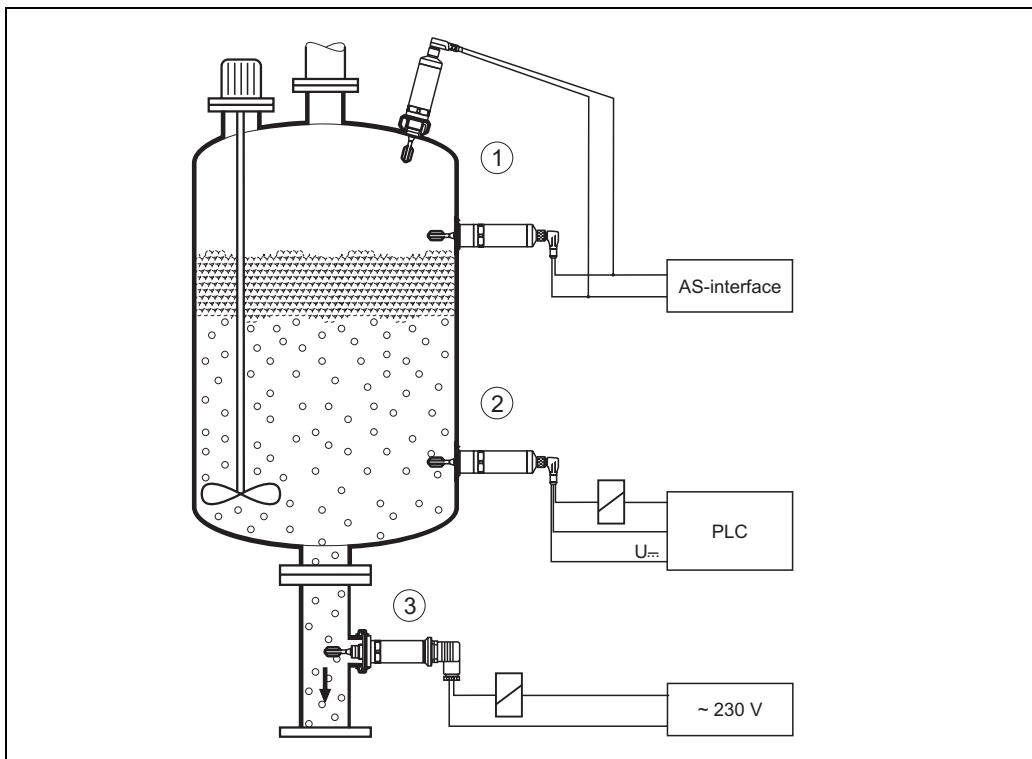

Measuring principle

The tuning fork of the FTL20 is brought to its resonance frequency by means of a piezoelectric drive. If the tuning fork is covered by liquid, this frequency changes. The electronics of the FTL20 monitor the resonance frequency and indicate whether the tuning fork is freely vibrating or is covered by liquid.

Measuring system

The measuring system comprises:

- Liquiphant T FTL20 limit switch
- Programmable logic control (PLC), miniature contactor, solenoid valve or AS-i bus

L00-FTL20Hxx-14-05-xx-en-001

Example 1): Overfill protection or top level detection

Example 2): Lower level detection or dry running protection

Example 3): Dry running protection for pump

Input

Measured variable	Density
Measuring range	> 0.7 g/cm ³ other density settings on request, e.g. 0.5 g/cm ³

Output

Switching outputs

	DC-PNP valve connector	DC-PNP M 12x1	AC 2-wire	AS-i
Function	Positive voltage signal at the switch output of the electronics (PNP)		Switching the power supply line	Switching the D0 bit
Switch behaviour		ON/OFF		0 / 1 (free / covered)
Relay switching capacity		250 mA		D0 bit
Fail-safe mode		MIN/MAX (see below)		D1 bit D1: 0 error
Switching delay	approx. 0.5 s on coverage / approx. 1.0 s on tuning fork becoming uncovered other switching time on request			
Switching threshold	with vertical orientation: 13.0 mm from top of fork with horizontal orientation: 3.5 mm from fork centre			
Hysteresis		3 ±0.5 mm		

Operating modes for variants AC and DC-PNP The FTL20 can be connected in two operating modes. By choosing the suitable operating mode (MAX or MIN safety), you ensure that the FTL20 switches safely even in the event of a fault (e.g. if the power supply line is disconnected).

MAX - maximum safety

- The FTL20 keeps the electronic switch closed as long as the liquid level is below the fork.
- Example of an application: overfill protection

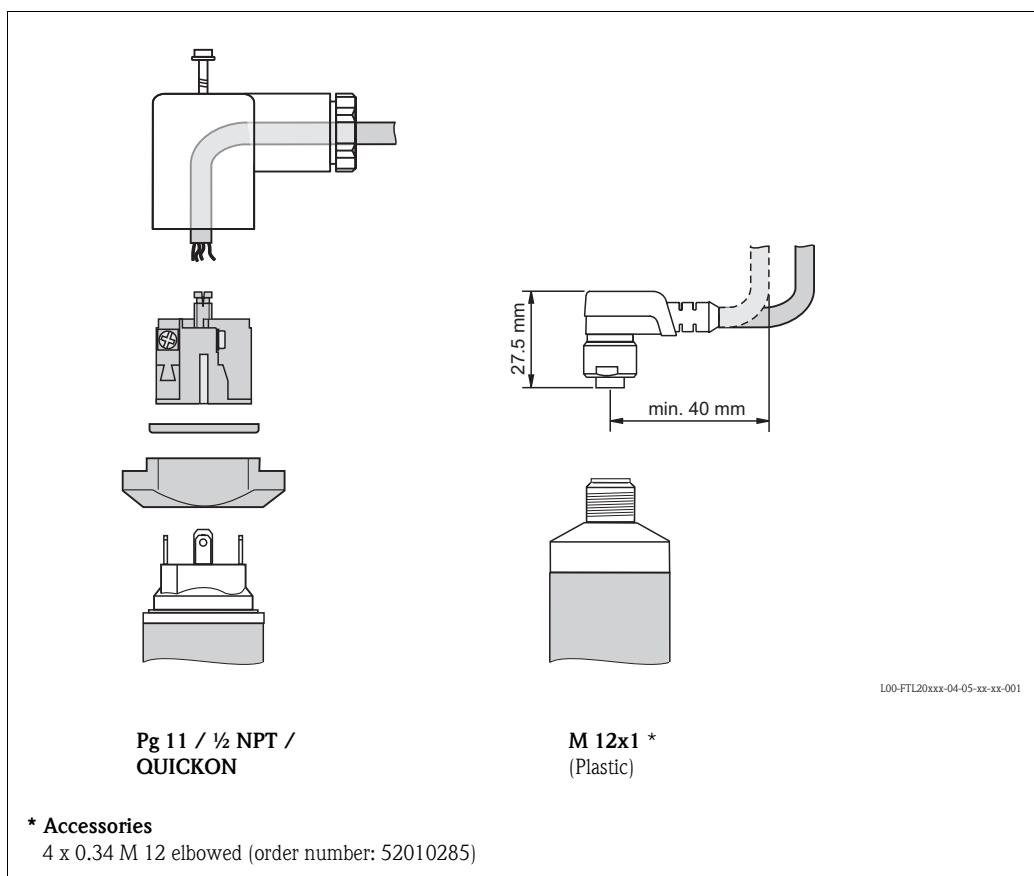

MIN - minimum safety

- The FTL20 keeps the electronic switch closed as long as the fork is immersed in liquid.
- Example of an application: dry running protection for pumps

The electronic switch opens if the limit is reached, if a fault occurs or the power fails.

Power supply

Cable entry

Electrical connection

Variant DC-PNP (direct current) M 12x1 connector

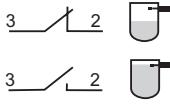

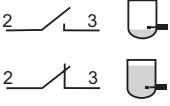

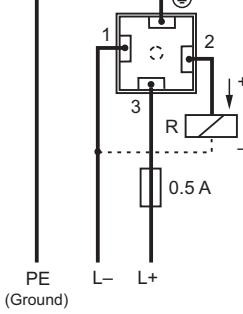

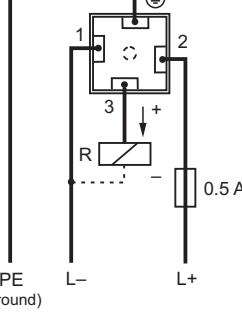

Voltage source: shock-protected voltage or Class 2 circuit (North America)

Suitable for use in non-equivalent operation:

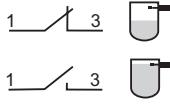

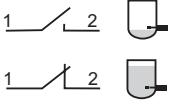

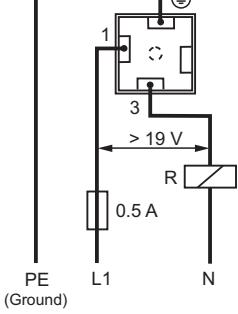

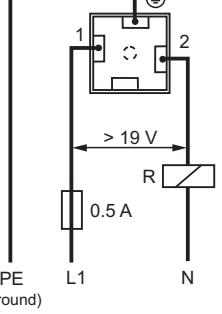

When both outputs are connected, the MIN and MAX outputs take on opposite states in trouble-free operation. In the event of an alarm condition or a line break, both electronic switches are open. In addition to level monitoring, function-dependent sensor monitoring can also be performed with the aid of 2-channel evaluation.

Operating mode MAX (NC contact)	Operating mode MIN (NO contact)
<p>Operating mode MAX (NC contact)</p> <p>L00-FTL20xxx-04-05-xx-xx-002</p>	<p>Operating mode MIN (NO contact)</p> <p>L00-FTL20xxx-04-05-xx-xx-003</p>

Variant AC (alternating current) valve connector

 Operating mode MAX	 Operating mode MIN
 L00-FTL20xxx-04-05-xx-xx-006	 L00-FTL20xxx-04-05-xx-xx-007
 L00-FTL20xxx-04-05-xx-xx-013	 L00-FTL20xxx-04-05-xx-xx-014

**Note!**

Approved for relays with a holding power/rated power $> 2.5 \text{ VA}$ (253 V) or $> 0.5 \text{ VA}$ (24 V).
Relays with lower holding power/rated power can be operated via a parallel-connected RC-element (option).

Connect AS-i bus

L00-FTL20xxx-04-05-xx-xx-008

Programming instructions for the AS-i

AS-i profile: S-3.A.1

The address is defaulted to 0 (HEX). It is changeable via the bus master or programming unit.

Data bit:

D0:1 Sensor covered	D1:1 Status = O.K.
D0:0 Sensor free	D1:0 Status = error
D2 and D3 are not used.	

Parameter bits (P0...P3) are not used.

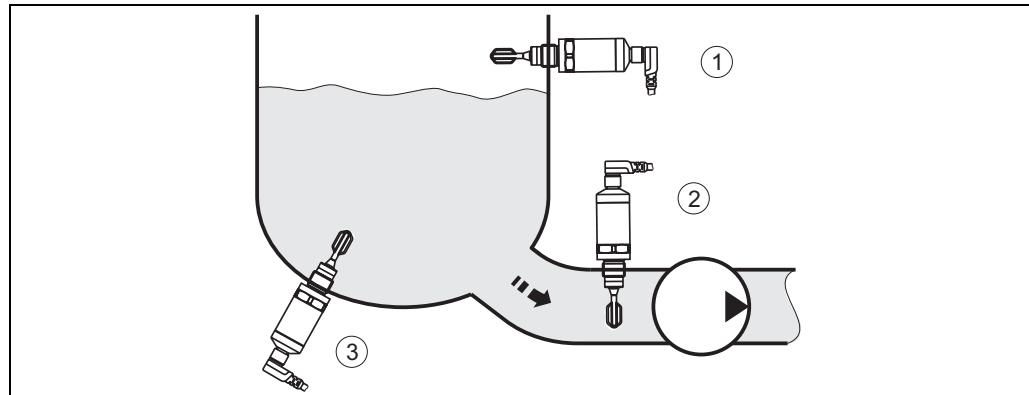

Electrical connection	DC-PNP valve connector	DC-PNP M 12x1	AC 2 wire	AS-i
Supply voltage	10...35 V DC	10...35 V DC	19...253 V AC	24.5...31 V DC
Cable entry	Pg 11 / ½ NPT	M 12x1	Pg 11 / ½ NPT	M 12x1
Cable specification	Max 1.5 mm ² and ø 3.5...6.5	IEC 60947-5-2	Max 1.5 mm ² and ø 3.5...6.5	IEC 62026-2

Human interface

Function test with test magnet Variants AC and DC-PNP:

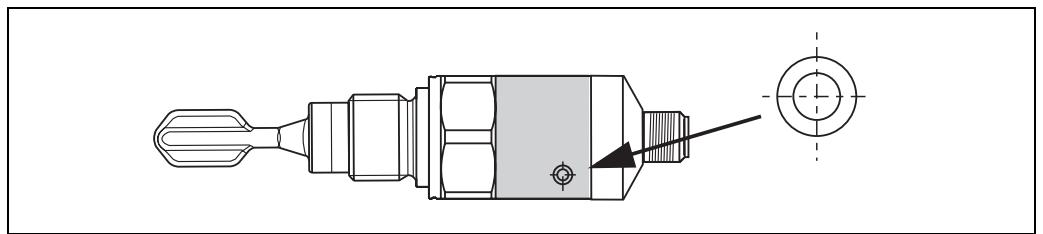

On testing, the current state of the electronic switch is reversed.

Variant AS-interface:

On testing, D0 is inverted.

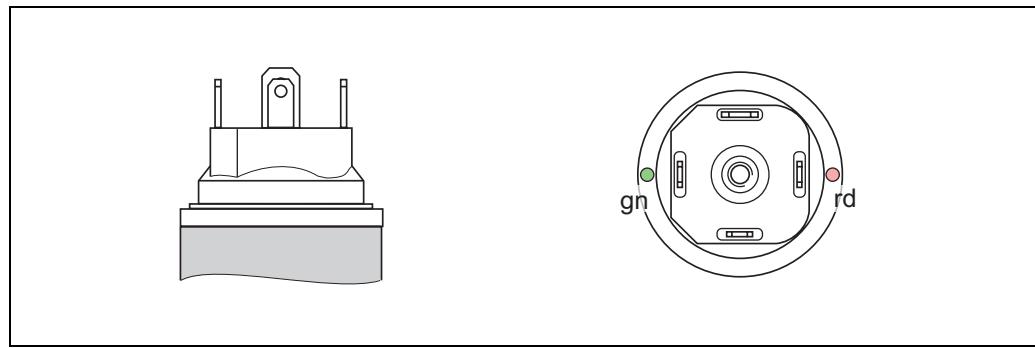

Performing test

Hold the test magnet against the mark on the nameplate:

L00-FTL20xxx-19-05-xx-xx-001

The switching state changes.

Light signals**Variants AC and DC-PNP with valve connector/QUICKON****Green light (gn) lighting:**

FTL20 is connected to the power supply and is operational.

Red light (rd) lighting:

Mode of operation MAX (overfill protection): sensor is immersed in liquid.

Mode of operation MIN (dry running protection): sensor is immersed in liquid.

Green light (gn) does not come on

Error:

No power supply.

- Check plug, cable and power supply

Red light (rd) flashing:

Error:

Overload or short-circuit in load circuit.

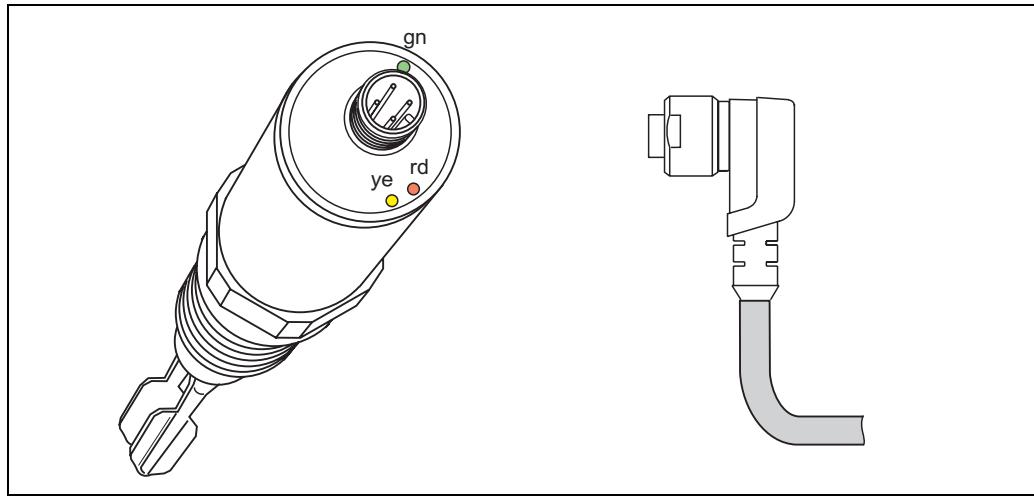

- Rectify the short-circuit
- Reduce maximum load current to below 250 mA

Error:

Internal sensor error or sensor corroded.

- Replace device

Variant AS-interface and DC-PNP with M 12x1 circular connector PPSU

L00-FTL20Hxx-07-05-xx-xx-002

Green light (gn) lighting:

FTL20 is connected to the power supply and is operational.

Yellow light (ye) lighting:

Sensor is immersed in liquid.

Red light (rd) lighting with AS-interface:

Error:

Address 0 set or communication error.

- Carry out addressing process
- Parameterise slave
- Or reduce line length (< 100 m total length)

Red light (rd) lighting with DC-PNP

Error:

Overload or short-circuit in load circuit.

- Rectify the short-circuit
- Reduce maximum load current to below 250 mA

Green light (gn) does not come on

Error:

No power supply.

- Check plug, cable and power supply

Red light (rd) flashing (2 Hz):

Error:

Internal sensor error or sensor corroded.

- Replace device

Certificates and approvals

Note

The specified certificates and approvals are available on www.endress.com/ftl20.

CE approval

The device is in conformity with the statutory requirements of the EC Directives.
Endress+Hauser confirms successful testing of the device by affixing the CE mark.

Sanitary compatibility

EHEDG (see process connections, Page 11),
Approval number: 3119/03/0445
