The Company

TURCK is one of the leading companies in the field of industrial automation. The family enterprise with more than 2700 employees in 25 countries and representations in further 60 states, achieves a turnover of nearly 330 million euros.

With production sites in Germany, Switzerland, USA, Mexico and China, today TURCK has succeeded in adapting to the conditions of local markets. Despite international orientation, the company's core competence and the main production sites equipped with the latest machinery, will remain in Germany.

RFID

With more than 13000 products covering the areas sensor, fieldbus, interface and connection technology, TURCK offers the full range of solutions for factory and process automation. Examples for the outstanding innovation skills of the company are the inductive *uprox®+* factor1 sensor, the modular I/O system BL67 and *excom®* the compact remote I/O system for application in explosion-hazardous areas.

Whether for machine & system engineering, automotive, transport & handling, food & beverage or the chemical and pharmaceutical industries, TURCK products optimise the system availability with robust and reliable technologies. Due to effective standardisation, the smart solutions also contribute to cost savings in purchase, inventory management, installation and maintenance.

BUS IT!

FIELDBUS TECHNOLOGY

Service & Support

A fast shipment service and a comprehensive e-support system perfectly complement the extensive TURCK programme.

With the product database, available on www.turck.com, TURCK offers a fast way to problem solving around the clock, seven days a week, at any place in this world and in six different languages.

Around 13000 products, clearly structured and completely documented, are ready for you to download together with all the necessary information you need. Please have a look on: www.turck.com

PROFIBUS
PROCESS FIELD BUS

DeviceNet™

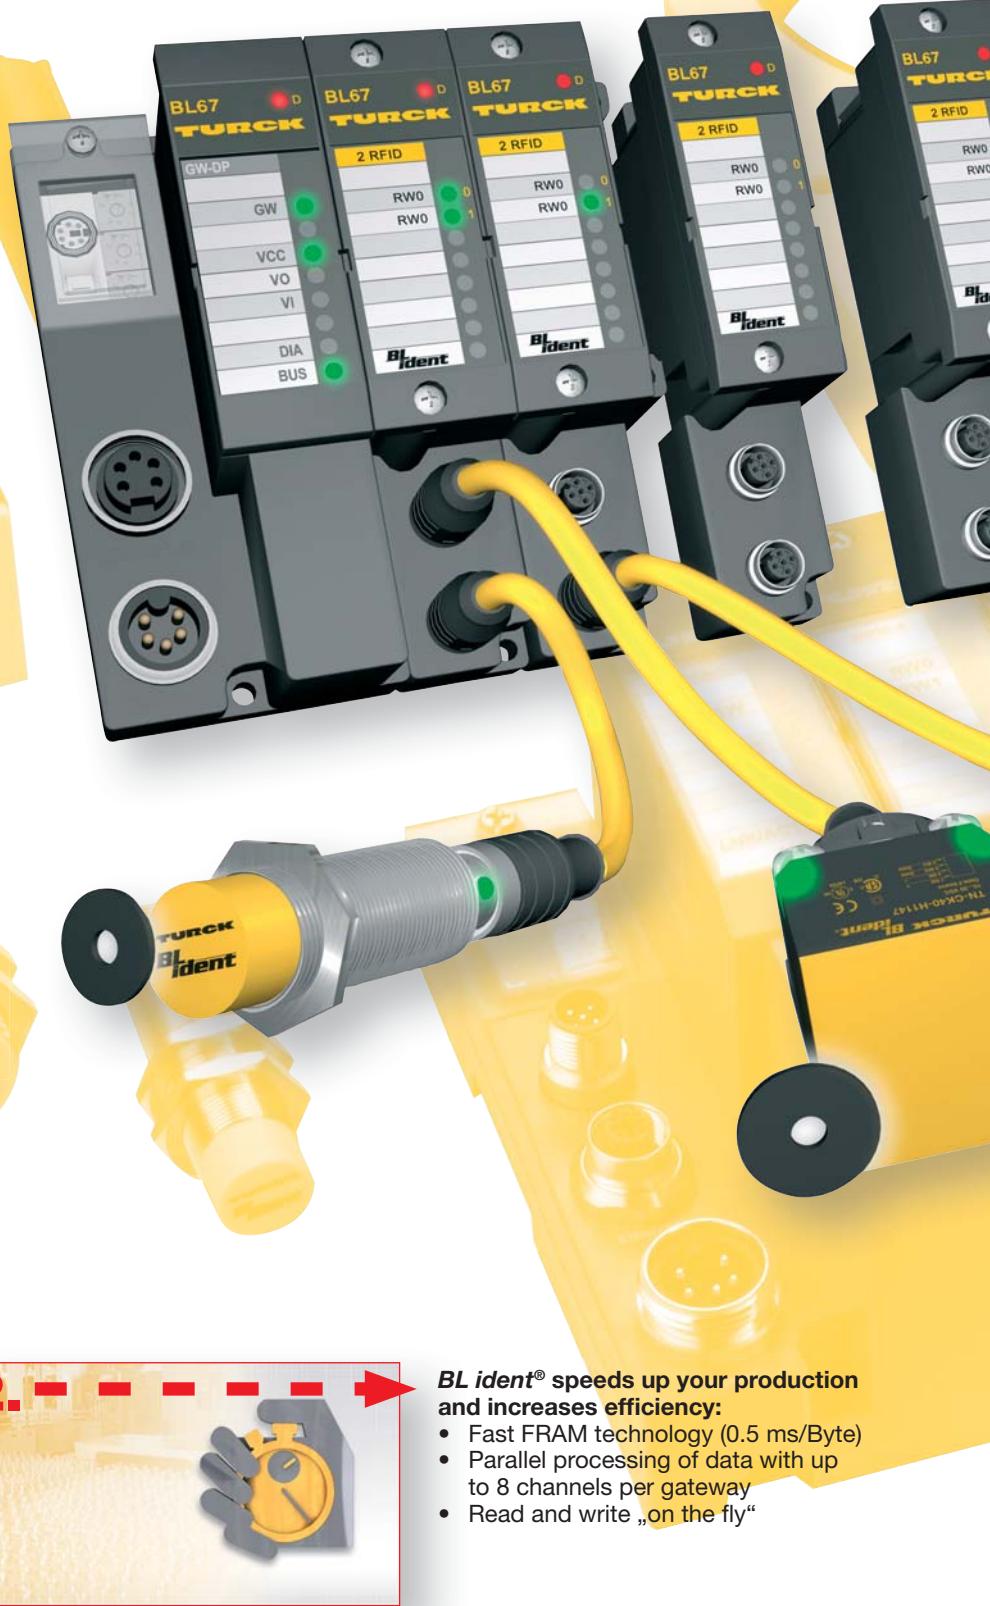

The BL ident® modular RFID system

Make use of the advantages!

BL ident® is a complete RFID system which is mainly designed for industrial applications and thus develops its special strengths in this field. It is based on the modular I/O systems BL67 (field application) and BL20 (cabinet mounting) and consists of data carriers (tags), read-write heads, interconnects and gateways.

The data carriers are adjusted to the correspondent industrial application. The product portfolio comprises not only extremely quick and almost infinitely re-writeable FRAM data carriers, but also high temperature versions with an applicability of up to 210 °C which can be applied in coating lines. Moreover, BL ident® can be integrated in existing BL67 and BL20 I/O systems without any problems.

Make use of the new advantages for industrial applications with RFID solutions made by TURCK.

1. The BL ident® system guarantees significant potentials for cost-saving:

- Easy integration in the existing control world
- Efficient production and increased system availability

The short period of amortisation and a quick ROI (Return on Investment) of the system are a considerable contribution to the success of your company.

2. BL ident® speeds up your production and increases efficiency:

- Fast FRAM technology (0.5 ms/Byte)
- Parallel processing of data with up to 8 channels per gateway
- Read and write „on the fly“

BL ident® offers maximum freedom and highest flexibility with respect to system integration. Your projects can thus be implemented quicker:

- Read-write heads are available in industrial housings (M18, M30, CK40, Q80, S32XL, Q350), in IP67/IP69K and read-write distances of up to 500 mm!
- Robust IP68 tags
- Modular interfaces allow the integration of additional I/O modules
- Up to 50 m connection cable between read-write head and interface
- Extensive range of mounting accessories
- Multiple fieldbus interfaces such as PROFIBUS-DP, EtherNet/IP, Modbus TCP, DeviceNet™ and PROFINET IO, in IP20 and IP67
- Programmable gateways with decentralised pre-processing relieve the higher-level control and bus system

With the *BL ident®* technology, maintenance intervals can be extended, thus improving system availability:

- High safety level due to long data storage period (10 years if operated at prescribed temperature)
- nearly infinite re-writing of the FRAM data carriers (10^{10}), EEPROM: 10^5
- Extremely resistant:
The materials used for the read-write heads of the WD-series are resistant to all common acid and alkaline detergent and disinfectants. Problems caused by aggressive cleaning materials are thus reduced to a minimum

Easy maintenance is a further contribution of the *BL ident®* system to safety and cost reduction:

- No down-times of the system due to the „Hot-Swapping“ function
- Local display of the fieldbus diagnostics directly in the field by LEDs on the read-write heads and on the interface

- Connection to other fieldbuses is simply implemented by replacing the gateway – the remaining configuration is left unchanged
- Same mounting accessories as for inductive sensors – less mounting accessories are needed

System description PROFIBUS-DP (Overview)

PROFIBUS-DP

- Open fieldbus standard according to EN 50170
- Transmission medium: 2-wire cable, twisted, shielded
- Transmission technology: RS485
- Bus topology: line structure with bus termination at both ends
- Bus access mode: Master-Slave/Master-Master with "Token Passing"
- 32 stations per segment, max. 126 stations.
- Repeater modules for signal regeneration
- Addressing via coding switches
- Configuration/parameterisation of devices via standardised device data base files (GSD files = Gerätestammdaten-Dateien)

PROFIBUS (Process Field Bus) is a standardised and open communication fieldbus. It complies with EN 50170 and consists of three different protocol profiles:

- PROFIBUS-FMS (Fieldbus Message Specification) is primarily designed for data exchange between programmable logic controllers (PLCs or PCs).
- PROFIBUS-DP (Decentral Periphery) is designed for fast data exchange between the central control and the remote field devices
- PROFIBUS-PA (Process Automation) is an intrinsically safe network for the process industry.

TURCK fieldbus components support PROFIBUS-DP. Within the PROFIBUS-DP network, the central control (e.g. the PLC) communicates with the remote input and output stations via a fast serial connection.

Data are exchanged cyclically between master and slave.

PROFIBUS-DP systems excel in their fast system response times. At a transmission rate of 12 Mbps, 512 bit input and 512 bit output data can be transferred, for instance, in less than 2 ms to 32 stations.

The system speed corresponds to the transmission rate set via the PROFIBUS master. The transmission speed is automatically detected by the TURCK PROFIBUS modules (auto baud).

The manufacturer provides device data base files (GSD files = Gerätestammdaten) for the individual PROFIBUS stations for configuration. TURCK additionally offers the I/O-ASSISTANT, a helpful software tool for configuration, parameterisation and set-up of the individual modules.

Transmission speed	Length of bus line (max.)	Max. numbers of repeaters ¹⁾	Max. numbers of stations
9,6...93,75 kbps	1200 m	2	126
187,5 kbps	1000 m	2	126
500 kbps	400 m	4	126
1500 kbps	200 m	6	126
3000...12000 kbps	100 m	9	126

¹⁾ At maximum transmission speed up to 9 repeaters of the TURCK series REP-DP 0002 can be connected in series (applicable to DP-profile bus parameters). If more repeaters are to be cascaded, the bus timing parameters must be adapted accordingly by the user.

Systemdaten PROFIBUS-DP	
Number of I/O stations	126 (incl. Repeater)
Number of I/O points	approx. 6000, depending on master
Transmission medium	shielded twisted copper cable, 2 x 0.34 mm ²

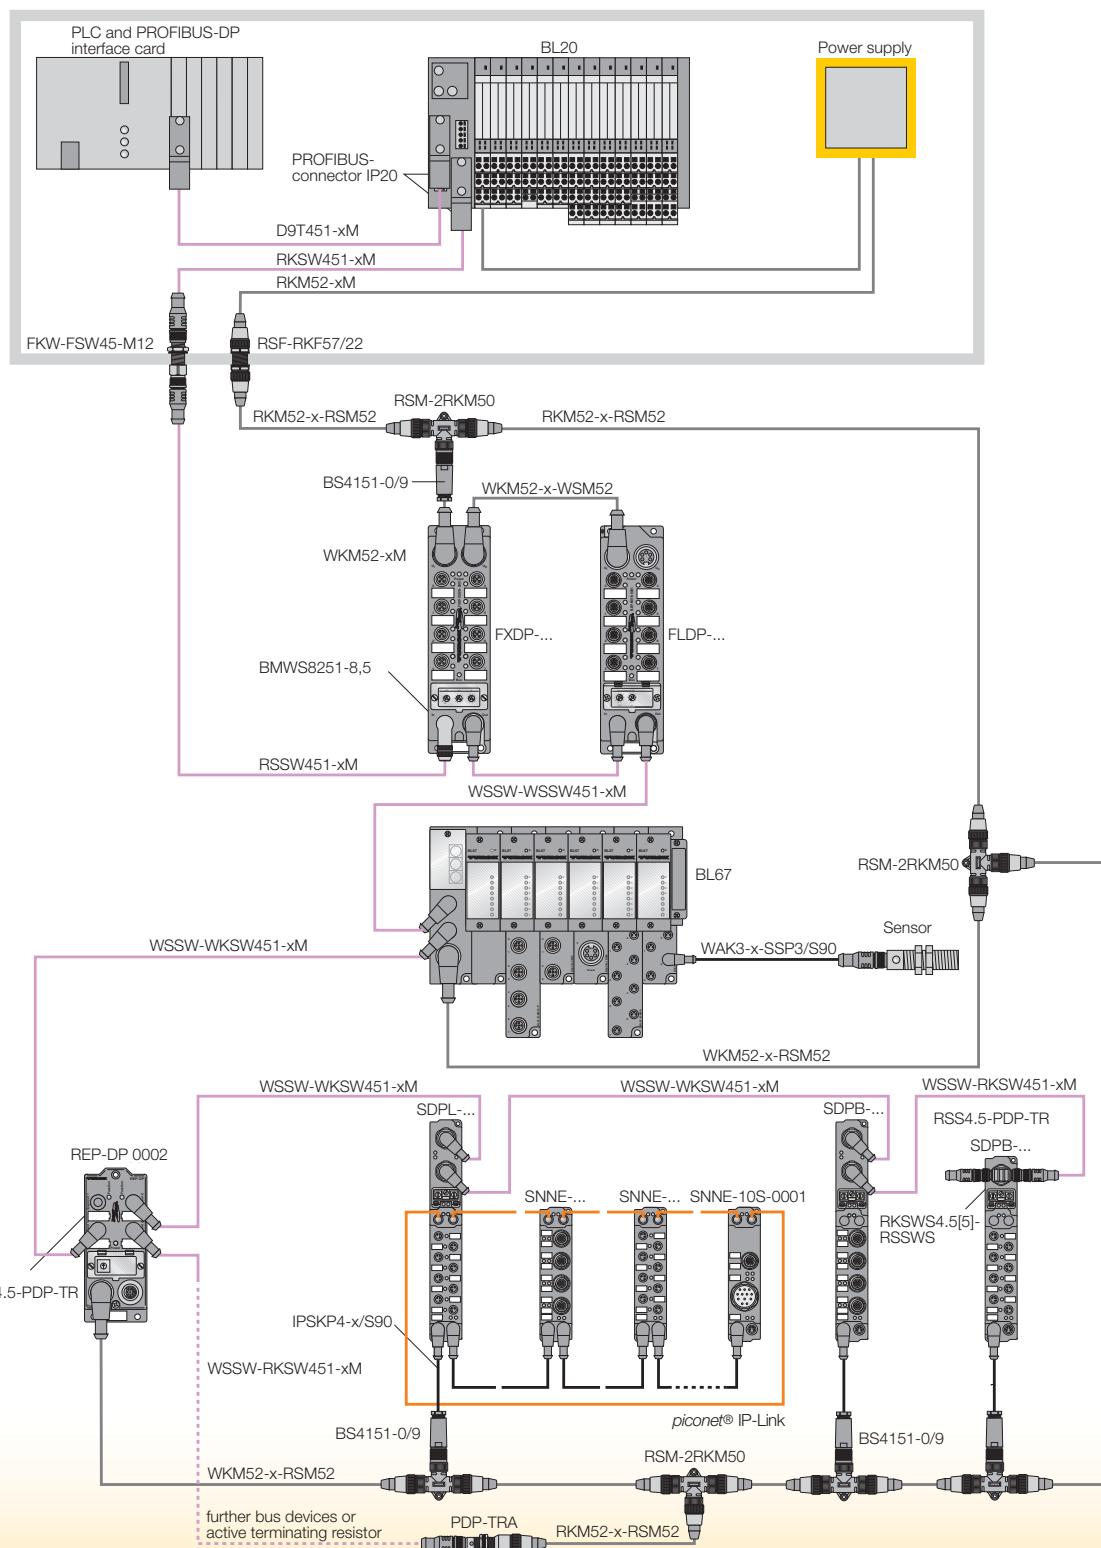

Application example: TURCK fieldbus components for PROFIBUS-DP

The schematic representation below shows a PROFIBUS-DP network based on components offered by TURCK. In addition to BL67 fieldbus stations in IP67, TURCK offers further modular bus components in IP20 (BL20) and IP67 (miniature piconet® modules and com-

pact fieldbus stations) which are characterised by flexibility and a user-friendly set-up.

Premoulded cables in various designs, as well as field-wireable connectors, feed-through receptacles for cabinet mounting, flange connectors, T-pieces.

terminating resistors and repeaters are available for network construction.

System description DeviceNet™ (Overview)

DeviceNet™

- Open fieldbus standard according to EN 50325
- Transmission medium:
2-pair cable, twisted shielded, for data transmission and for power supply (24 volt)
- Transmission technology: CAN
- Bus topology: Line structure (bus termination at both ends) with drop lines
- Bus access mode:
Multi-master system with CSMA/CA access mode, network-wide multi/broadcasting
- Use of repeaters in order to extend the length of the trunk and drop line
- Max. 64 nodes (incl. master)
- Addressing via coding switches
- Configuration/parameterisation of the devices via standardised EDS files (Electronic Data sheets)

DeviceNet™ is an open, standardised bus system according to EN 50325 and is based on the CAN specification (Controller Area Network). As a multimaster system DeviceNet™ provides the following I/O communication modes:

- Polling: the master module cyclically sends output data to all subordinate slaves and receives input data via the response message.
- Change of state: telegrams are not sent constantly, but only if the contents has changed, i.e. the process image/mapping is only transferred when it changes.
- Cyclic: the nodes automatically send data after a certain cycle time
- Strobed: the scanner requests input data via a broadcast message to all bus nodes.

TURCK fieldbus components support all these I/O communication modes. The bus length depends on the transmission speed (125, 250 or 500 kbps) as shown in the table below. Due to this especially efficient usage of the bus capacities, it is possible to achieve short response times, particularly in the change-of-state mode (despite relatively low data rates).

The manufacturer provides EDS files (EDS = Electronic Data Sheet) for configuration of the individual DeviceNet™ nodes.

DeviceNet™ devices are parameterised via acyclic services (Explicit Messaging). TURCK additionally offers the I/O-ASSISTANT, a helpful software tool for configuration, parameterisation and set-up of the individual modules.

DeviceNet™ – Transmission speed and bus lengths

Transmission speed	Flat Cable	Bus lines – max. length			Drop lines – max. length (per drop)		Number of nodes (max.)
		Thick Cable	Mid Cable	Thin Cable	(total)		
125 kbps	420 m	500 m	300 m	100 m	6 m	156 m	64
250 kbps	200 m	250 m	250 m	100 m	6 m	78 m	64
500 Kbps	75 m	100 m	100 m	100 m	6 m	39 m	64

System data DeviceNet™	
Number of nodes	64 (incl. master)
Number of I/O points	depending on control system
Transmission medium	shielded twisted copper cable, at least 2 x 2 x 0.21 mm ²
i/O communication modes	polling, change of State, cyclic, strobed

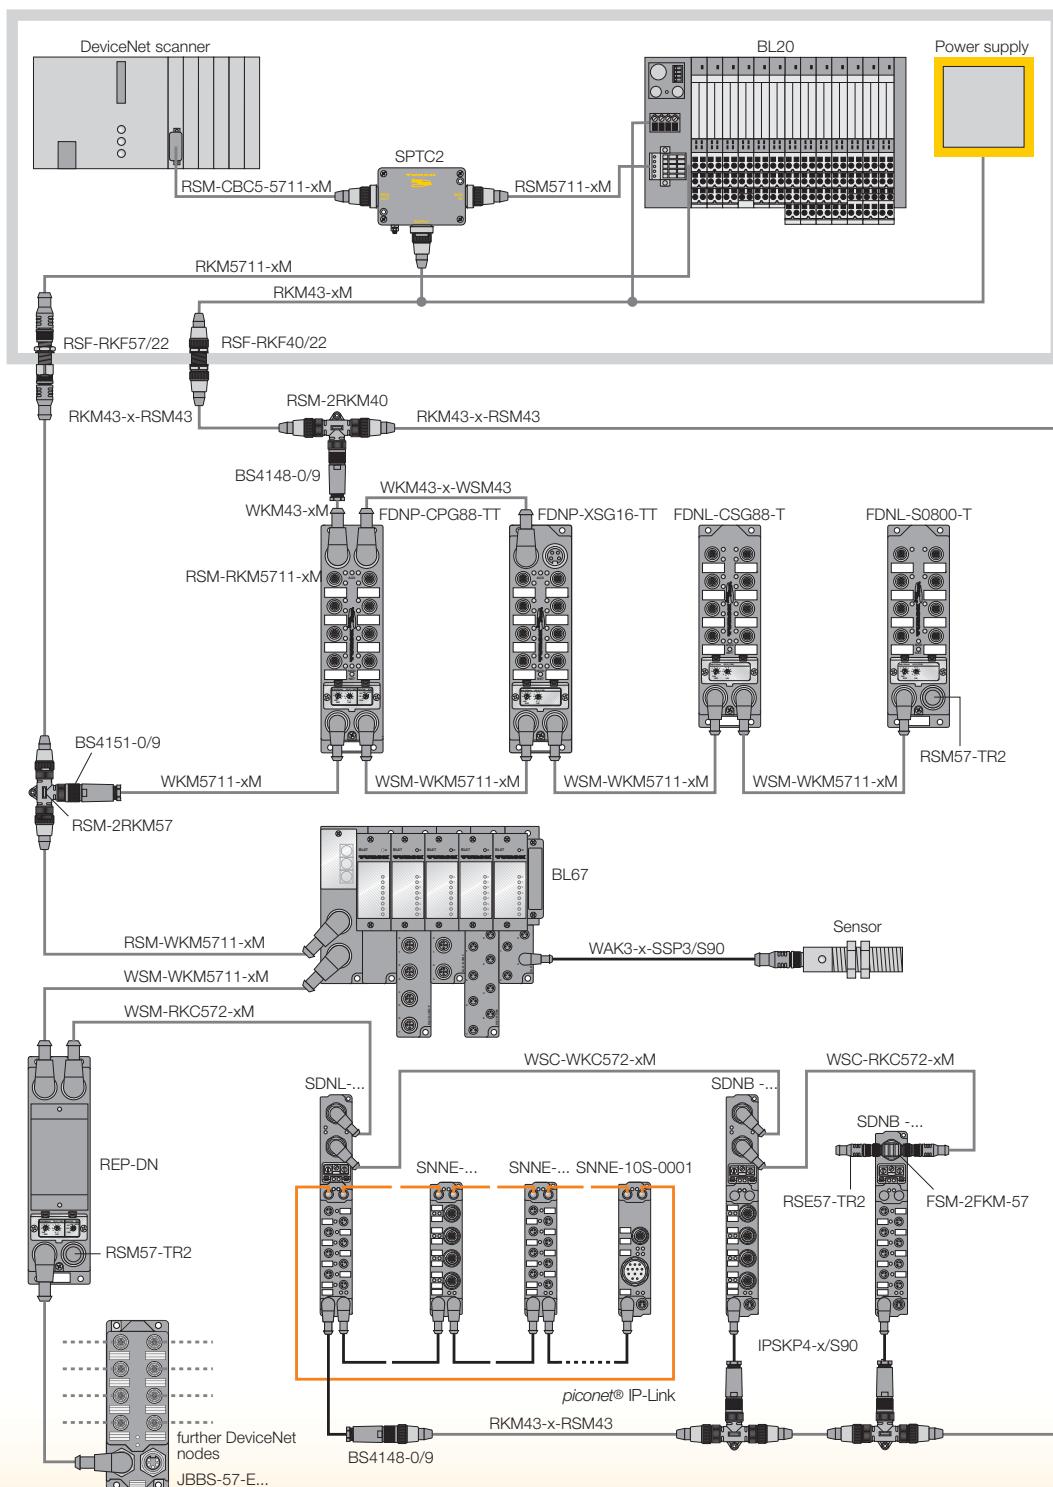

Application example: TURCK fieldbus-components for DeviceNet™

The schematic representation below shows a DeviceNet™ network based on components offered by TURCK. In addition to BL67 fieldbus stations in IP67, TURCK offers further modular bus components for the IP20 (BL20) and the

IP67 environment (miniature piconet® modules and compact fieldbus stations) which are characterised by flexibility and user-friendly set-up.

Premoulded cables in various designs, as well as field-wireable connectors,

feed-through receptacles for cabinet mounting, flange connectors, T-pieces, terminating resistors and repeaters are available for network construction.

System description CANopen (Overview)

CANopen

- Open fieldbus standard according to EN 50325-4
- Transmission medium: 2-pair cable, twisted and shielded, for data transmission and for power supply (24 volt)
- Transmission technology: CAN
- Bus topology: Line structure (bus termination at both ends) with drop lines
- Bus access mode: Multi-master system with CSMA/CA access mode, network-wide multi/broadcasting
- Max. 127 nodes (incl. repeaters)
- Addressing via coding switches
- Use of repeaters in order to extend the length of the trunk and drop line
- Configuration/parameterisation of the devices via standardised EDS files (Electronic Data sheets)

The CAN user layer CANopen consists of device profiles, which standardise the data contents of the respective device categories, and of communication profiles. The communication profile determines the method of data exchange between the devices. In this context, one differentiates between real time data (process data objects – PDO) and parameter data (service data objects – SDO). CANopen defines different communication modes for the transmission of the process data (PDOs):

- Event-controlled: Messages are sent as soon as the content has changed. Therefore, the process image/mapping is not transferred permanently; only the changed signals are transmitted.
- Cyclic synchronous mode: The components are requested to accept the output data received and to send new input data via a SYNC telegram.

- Request-controlled: The components are triggered to send their input data via a CAN data request message.

CANopen devices are parameterised via SDOs. These are primarily used to transfer parameters during device configuration and to transmit longer data fields. Due to effective usage of the bus bandwidth CANopen offers short system response times despite a relatively low transmission speed (max. 1 Mbps).

The manufacturer provides EDS files (EDS = Electronic Data Sheet) for configuration of the individual CANopen nodes. TURCK additionally offers the I/O-ASSISTANT, a helpful software tool for configuration, parameterisation and set-up of the individual modules.

Transmission speed	Bus trunk line (max.)	Number of nodes (max.)
10 kbps	5000 m	127
20 kbps	2500 m	127
50 kbps	1000 m	127
125 kbps	500 m	127
250 kbps	250 m	127
500 kbps	100 m	127
800 kbps	50 m	127
1000 kbps	25 m	127

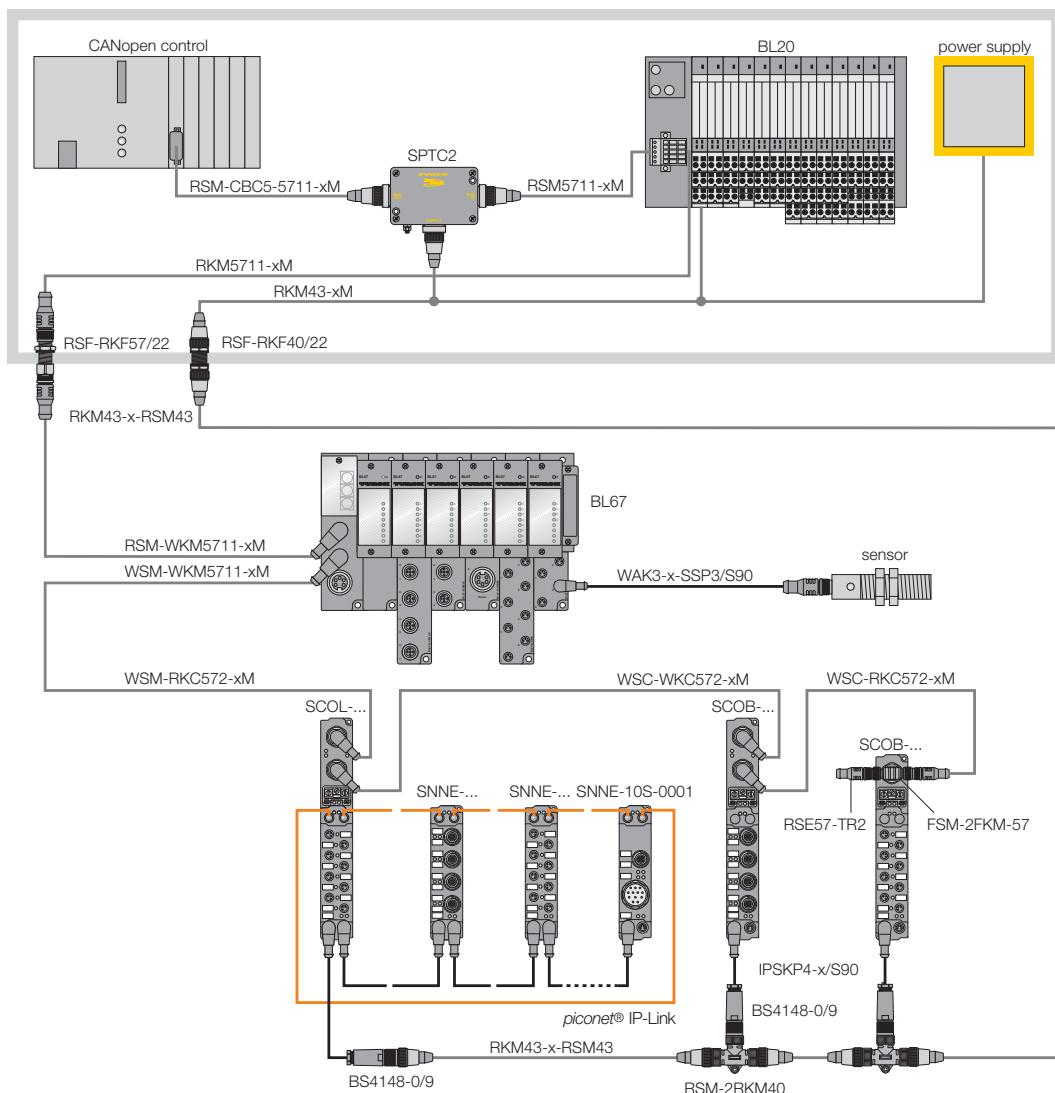

System data CANopen	
Number of I/O stations	127 (incl. Repeater)
Number of I/O points	depending on control system

Application example: TURCK fieldbus-components for CANopen

The schematic representation below shows a CANopen network based on components offered by TURCK. In addition to BL67 fieldbus stations in IP67 TURCK offers further modular bus components for the IP20 (BL20) and the IP67 environment (miniature *piconet*[®] modules and compact fieldbus stations)

which are characterised by flexibility and user-friendly set-up.

Premoulded cables in various designs, as well as field-wireable connectors, feed-through receptacles for cabinet mounting, flange connectors, T-pieces, terminating resistors and repeaters are available for network construction.

System description Ethernet (Overview)

Ethernet

- Open fieldbus standard acc. to IEE 802.3
- Transmission medium:
2 x 2 twisted-pair copper cable, shielded, category 3 (10 Mbps), category 5 (100 Mbps)
- Bus topology: star structure/tree structure
- Switches and hubs as junction points for connection of the Ethernet nodes
- Bus access mode:
multi-master system with CSMA/CD access mode, network-wide multi/broadcasting
- Number of bus nodes theoretically unlimited
- Protocols: MODBUS TCP, EtherNet/IP und PROFINET IO

The term Ethernet generally refers to the IEEE 802.3 specification. The modules are networked within a tree or star structure and are identified using a 6-byte, worldwide and unique identification code (MAC ID). The distance between two bus nodes may not exceed 100 m when using rigid cables. If flexible cables are used, the maximum length depends on the network construction.

Switches and hubs interconnect the Ethernet nodes and are thus the nodal points within the network. Hubs always send data to and receive data from all nodes, whereas switches feature a selective data transmission mode. Switches dynamically maintain a list with the IP addresses of all connected bus nodes. This ensures that data are only sent to the relevant target address. Data collisions are avoided and the network bandwidth is increased.

The original Ethernet protocol transfers the data frame from one to a single or several other nodes. The transmission mode does not include acknowledgement messages (handshake communication) and re-transfer of lost data frames. The Internet Protocol (IP) handles segmenting, routing (path finding), searching and allocation of the permanent MAC-IDs.

Just like the Ethernet protocol, the IP does not ensure secure data transport. Data frames can get lost or be disrupted in their order.

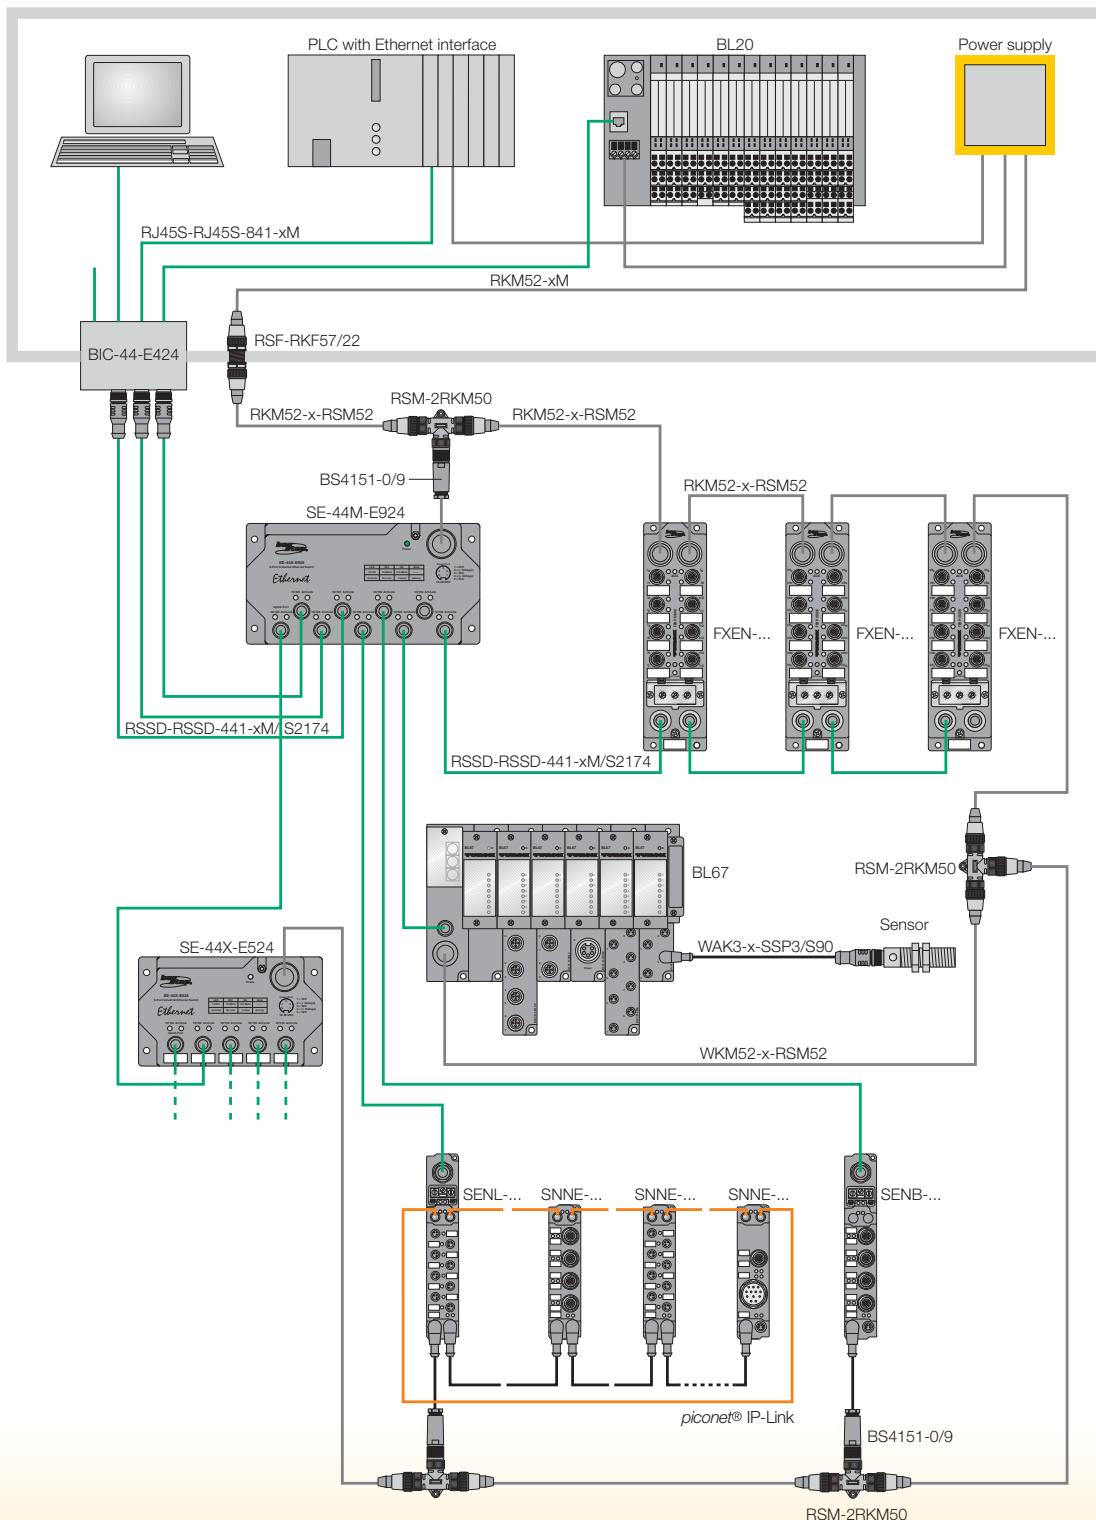

Protocols such as TCP/IP, which ensure safe data transmission, are available. The Transmission Control Protocol (TCP) is based on the IP and is a connection-orientated transfer protocol, comprising error diagnostics and error handling mechanisms. This protocol ensures that lost telegrams are re-transmitted. Based on TCP, further protocols such as MODBUS TCP, EtherNet/IP and PROFINET IO have been developed for applications involving industrial data communication.

System data Ethernet	
Number of I/O stations	only limited through IP address area
Number of I/O points	depending on control system
Transmission medium	2 x 2 twisted-pair copper cable, shielded, category 3 (10 Mbps), category 5 (100 Mbps)

Application example: TURCK-Fieldbus components for Ethernet

The schematic representation below shows an Ethernet network based on components offered by TURCK. In addition to BL67 fieldbus stations in IP67, TURCK offers further modular bus components for the IP20 (BL20) and the IP67 environment (miniature *piconet*[®]

modules and compact fieldbus stations) which are characterised by flexibility and user-friendly set-up. Premoulded cables in various designs, as well as field-wireable connectors, feed-through receptacles for cabinet mounting.

System description INTERBUS (Overview)

INTERBUS

- Open fieldbus standard acc. to IEC 61158
- Transmission medium: multicore cable, 6-wire, twisted, shielded
- Transmission technology: RS485
- Bus topology: active ring, each node acts as a repeater
- Bus access mode: Master/slave system, defined telegram length, deterministic
- Max. 512 nodes
- Addressing: automatic addressing according to the physical order of the nodes within the system

INTERBUS is an open and standardised fieldbus system according to IEC 61158. The system always features a ring structure. All bus nodes are actively interconnected within a closed transmission path.

In contrast to other ring systems, the data forward and data return line of the INTERBUS system are routed in a single cable. The last node automatically terminates the ring. Based on this construction, the physical appearance of a line

or tree structure can be created. Several sub-systems for structuring the entire system can be branched off the main (trunk) line which exits the master. As a result, the bus system can be flexibly adapted to any application.

Bus access is based on the master/slave mode, in which data are sent from the master to the first node and then transferred sequentially from one node to the other. Due to its active coupling, each node functions as a repeater, which regenerates the signal.

Up to 512 nodes can be connected to the so-called "data highway". The distance between the individual nodes is specified with 400 m max., so that the total length of the "data highway" amounts to 12 km max. (copper cables).

The data transmission rate is 500 kbps. The cycle time depends on the user data volume of the respective system and increases linearly with the number of I/O points.

INTERBUS operates on the summation frame method. As the summation frame is always identical, the cycle time is also constant. Thus deterministic operation is ensured.

Addressing

Data are allocated to the individual nodes automatically according to their physical order in the ring. It is thus not required to assign a bus address to each node via coding switches.

Configuration

With INTERBUS, configuration is triggered via an identification cycle. Via this cycle the master automatically detects all connected devices. Identification is accomplished via an identification code which is stored in each node and a length code, containing the length of the data to be transferred.

System data INTERBUS

Number of I/O stations	depending on master (max. 512)

The BL67 I/O system – the modular I/O system in IP67

Gateway:

The system control

- The interface to the higher level control system
- Gateways for PROFIBUS-DP, CANopen, DeviceNet™, PROFINET IO, EtherNet/IP and Ethernet Modbus TCP

Optional:

CoDeSys-programmable according to IEC 61131

- Relieves higher-level controller and bus system
- I/O modules independent of the fieldbus
- Prefabricated function blocks e.g. for the RFID *BL ident®* system and serial interfaces

Power Feeding Module

- Power supply for the field, sensors and actuators
- Enables the creation of potential groups which can be switched on or off according to the requirements of the application

Operation control with Pick-to-Light sensors

- Combined digital modules enable one input and one output per M12 connector
- Prefabricated standard M12 sensor cables

BL ident® system

- The modular RFID system made by TURCK
- Modular extension, up to 8 channels
- Temperature range of the data carriers between -40 and +210 °C

EtherNet/IP™

PROFINET®
INDUSTRIAL ETHERNET
NET

Modbus TCP

Electronic modules

- Digital, analog, temperature, RS232, SSI, CANopen interface and more
- Independent form the applied fieldbus
- Free choice of connection technology
- Available as 2, 4, 8 or 16-channel version
- Local diagnostics and status display via LEDs
- Hot-Swapping function

Base modules

- Passive connection components for sensors and actuators
- Available as M8, M12, M23 and 7/8 connectors
- Connection of I/O modules with single, dual or multicore wiring
- Fast replacement of electronics through the use of separate connection bases

Material recognition

- Distinction of different metals or metallic compositions
- Distance independent material detection
- Inductive sensor with two analog voltage outputs

Integration of valve terminals

- 4, 8 or 16-channel digital output modules with M23 base modules for multipole valve terminals
- Up to 8 CANopen valve terminals with one CAN-valve interface connection module

**I/O-ASSISTANT**

- Planning, configuration, commissioning and diagnostic software

DeviceNet™

Easy programming with CoDeSys according to IEC 61131-3

The programmable gateways become decentral control units with the CoDeSys programming software.

The graphical programming interface supports all IEC-61131-3 programming languages

- Statement list (STL)
- Ladder Diagram (LD)
- Continuous Function Chart (CFC)
- Structured Text (ST)
- Sequential Function Chart (AS)

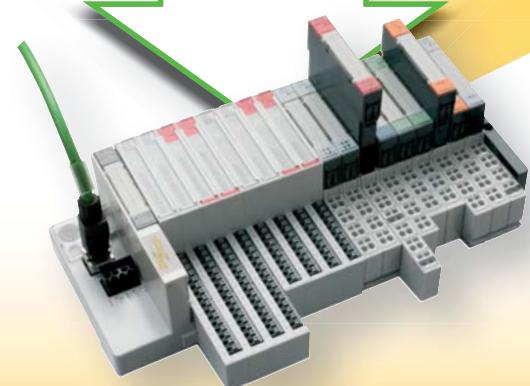

- Project planning and configuration**
- Target-Support-Package as driver for the target system
 - Drag and Drop function for the hardware configuration
 - Standard editor for I/O configuration and parameterisation
 - Symbolic display of variables for I/O addresses
 - Numerous diagnostics and commissioning functions
 - Funktion blocks e. g. for the RFID system *BL ident®*

Simple connection

- Quick and simple connection of heterogeneous systems
- Standard transmission protocols such as e.g. TCP/IP and UDP/IP
- Network-global variables
- Bidirectional data exchange between CoDeSys systems
- Additional programming is not required

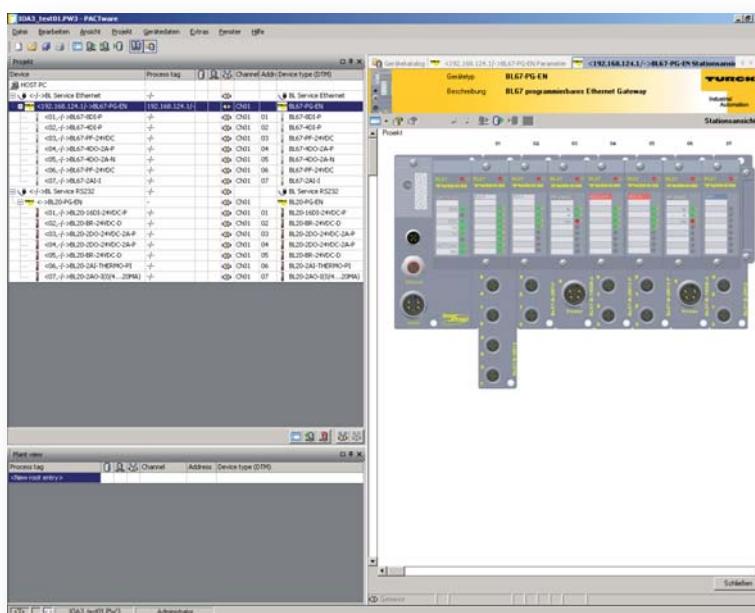

Data exchange via Ethernet

Easy parameterisation with I/O-ASSISTANT on the basis of FDT/DTM

- System configuration, parameterisation and diagnostics with a graphical interface based on FDT/DTM technology
- DTM can be integrated in any FDT frame application for configuration, commissioning and maintenance
- I/O-ASSISTANT and DTMs are available free of charge on www.turck.com

Description

The configuration software I/O-ASSISTANT supports you in planning and implementation of an I/O system.

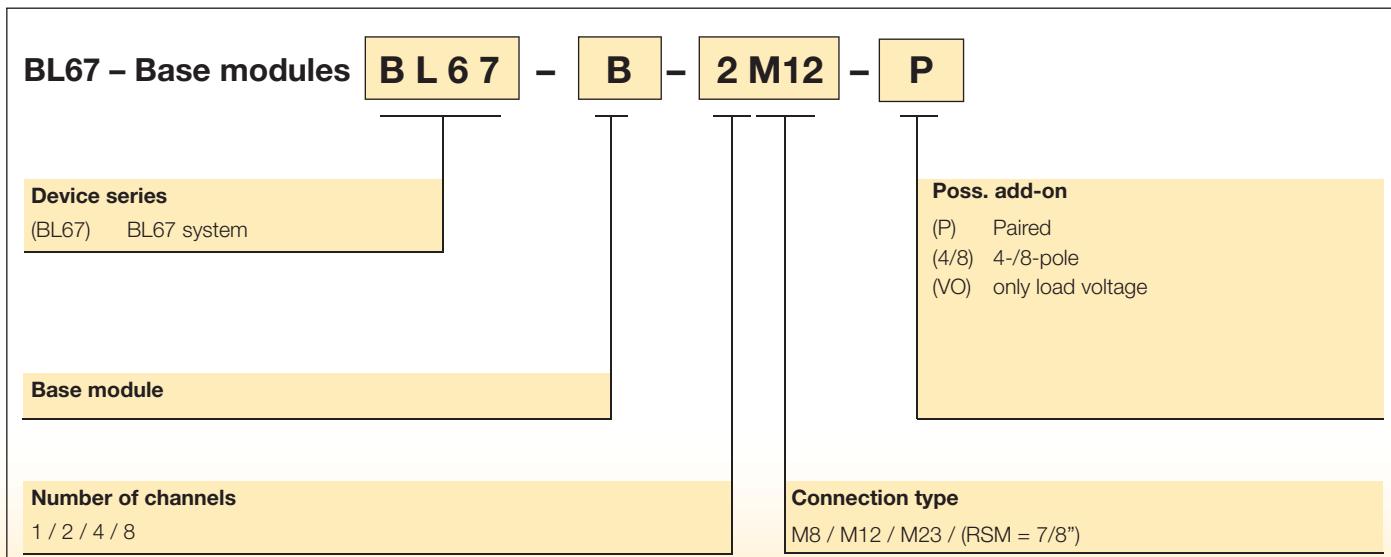

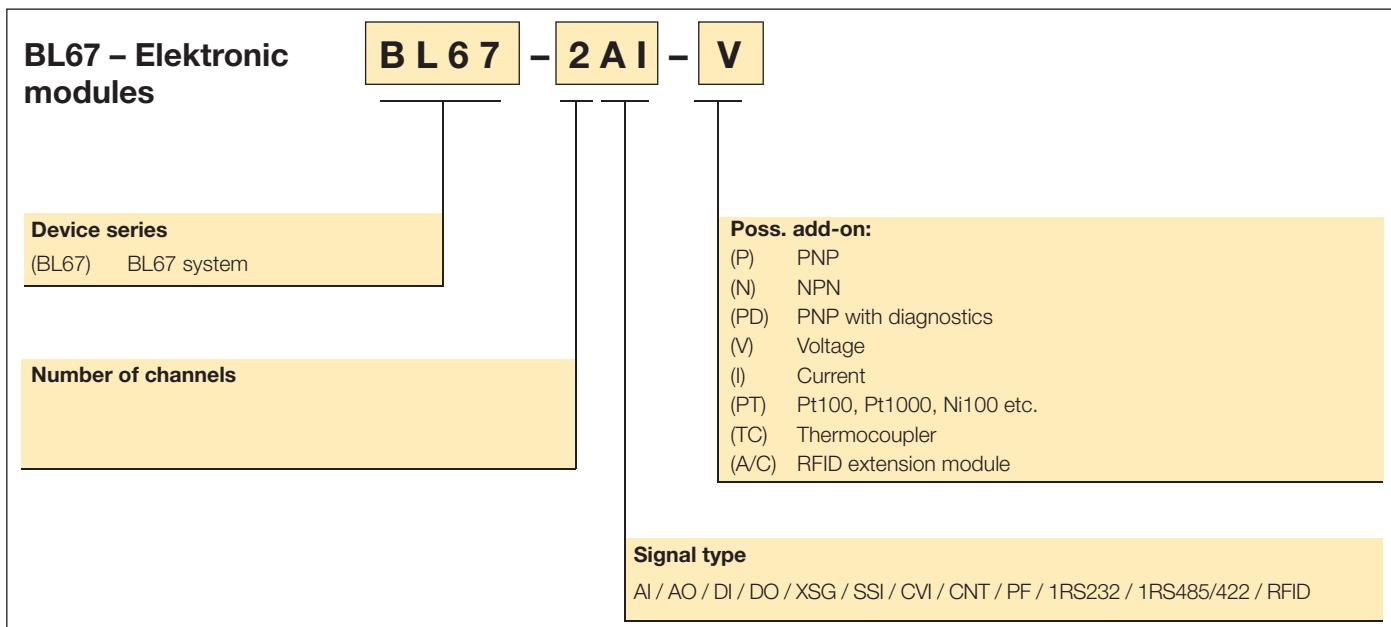

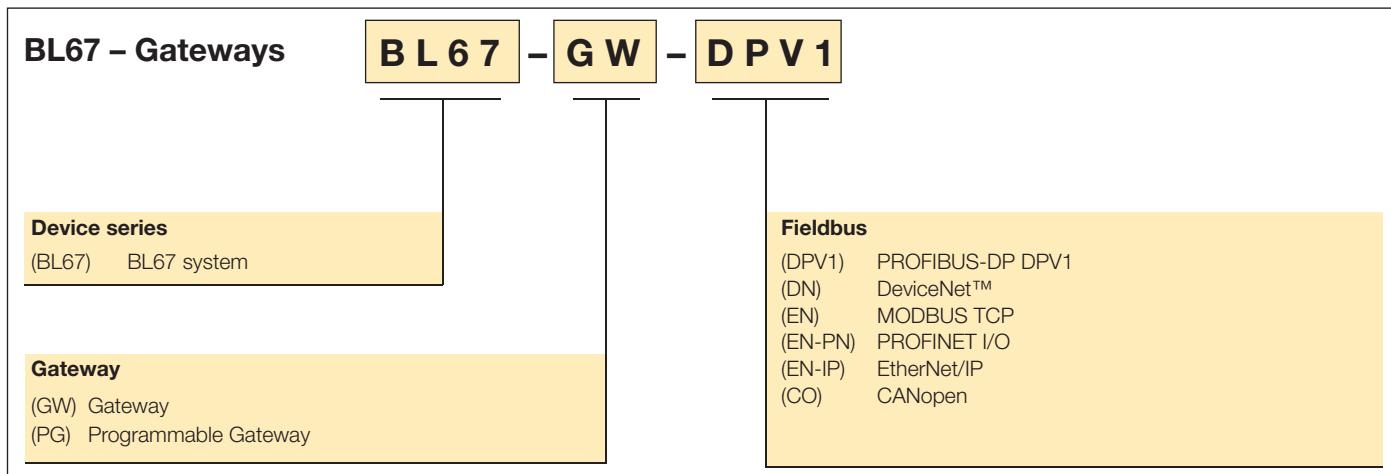

No matter if you are online or offline, the I/O-ASSISTANT simplifies the configuration as well as the configuration and parameterisation of the modules.

This software is also extremely helpful in system set-up and testing.

Functions

- Supporting software tool
- Selection of the required modules
- Offline planning and configuration of BL67 modules
- Configuration, parameterisation and commissioning of individual modules
- Reading and setting of process data
- Commissioning help for testing the wiring and sensors without PLC
- Realistic display of configured BL67 components
- Automatic documentation of configured BL67 systems

Electronic modules and base modules

BL67 – Maximum system extension/System supply

Maximum system extension

The maximum number of modules for extension depends on the respective system configuration. As the maximum current consumption of the modulbus should not exceed 1.5 A, the number of modules is restricted (see table Nominal current consumption, p.31).

The use of modules with a high volume of process, parameter and diagnostic data might also impose restrictions to the extension of the system.

The I/O- ASSISTANT takes these aspects into account and issues a warning message if appropriate.

A BL67 system can be extended to a total length of 1 m, comprising of a gateway for PROFIBUS-DP, DeviceNet™/ CANopen or Ethernet and a maximum of 32 modules.

Maximum system extension PROFIBUS-DP, DeviceNet™, CANopen

System supply: General

The power supply for the BL67 system is either derived separately for PROFIBUS-DP and Ethernet gateways or directly from the DeviceNet™ / CANopen cable for the DeviceNet™ / CANopen gateway.

Power-Feeding modules can be inserted anywhere in the BL67 station. They provide isolated field voltage for the I/O modules mounted to their right. Thus Power-Feeding modules can also be used to create different potential groups.

System supply via the module bus

The number of BL67 modules, which can be powered via the internal module bus, depends on the nominal current rating I_{MB} of the individual modules on the module bus. The total current consumption of the installed BL67 modules may not exceed 1.5 A.

When using the software I/O-ASSISTANT, the menu item <Station - Verify> will automatically generate an error message if the system supply via the module bus is not reliably ensured.

Nominal current consumption

The following table shows the nominal current consumption $I_{MB(5V)}$ of the various BL67 modules on the module bus, the resulting nominal current consumption $I_{MB(24V)}$ of the modules via the 24 VDC supply and the nominal current consumption I_I or I_O of the modules via the supply:

Modules	Nom. current module bus $I_{MB(5V)}^1)$	Nom. current module bus $I_{MB(24V)}^2)$	$I_{ges.}^5)$		
			+	Nom. current input module $I_I^3)$	Nom. current Output module $I_O^4)$

1) The nominal current consumption via the 5 VDC system supply may not exceed 1.5 A. The primary product of $V_{MB(24V)}$ and $I_{MB(24V)}$ accords to the secondary product of $V_{MB(5V)}$ and $I_{MB(5V)}$. Power losses have not been considered.

2) The nominal current consumption via the 24 VDC field supply.

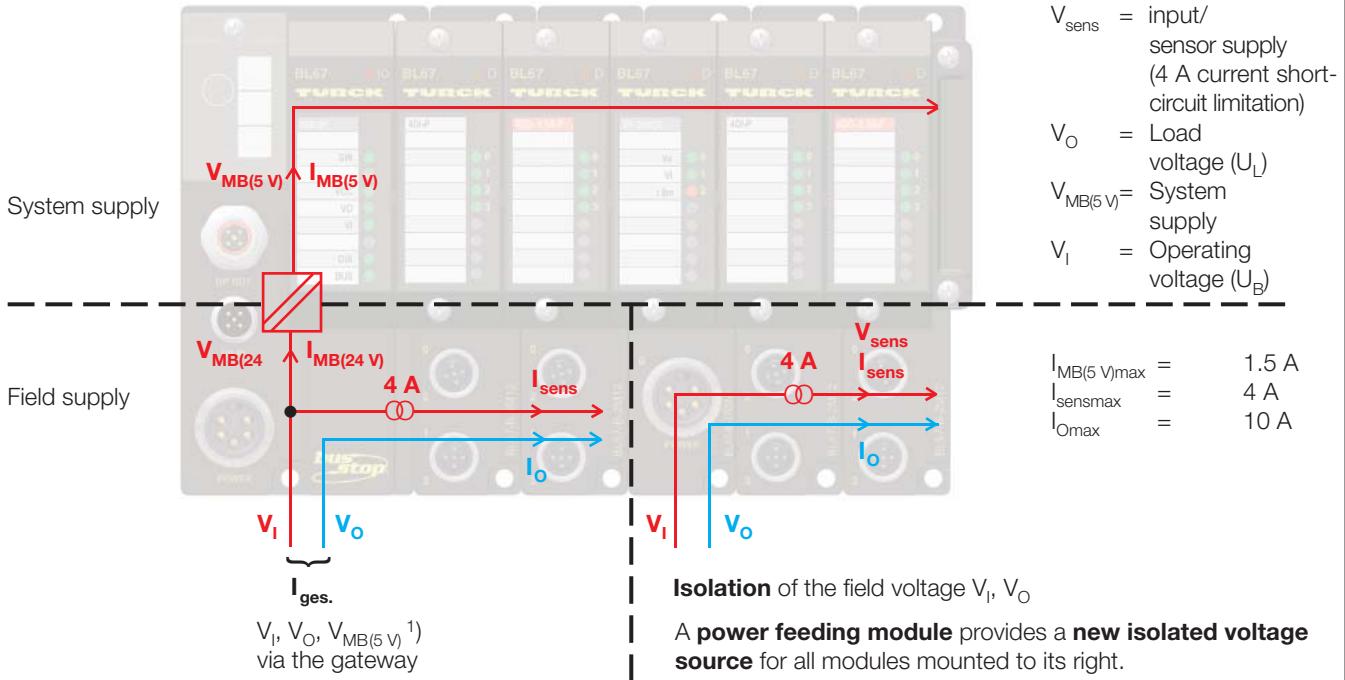

3) Is limited to 4 A by means of the integrated short-circuit protection.

4) The nominal current consumption via the field supply: with PROFIBUS-DP it may not exceed 10 A and with DeviceNet™ 8 A.

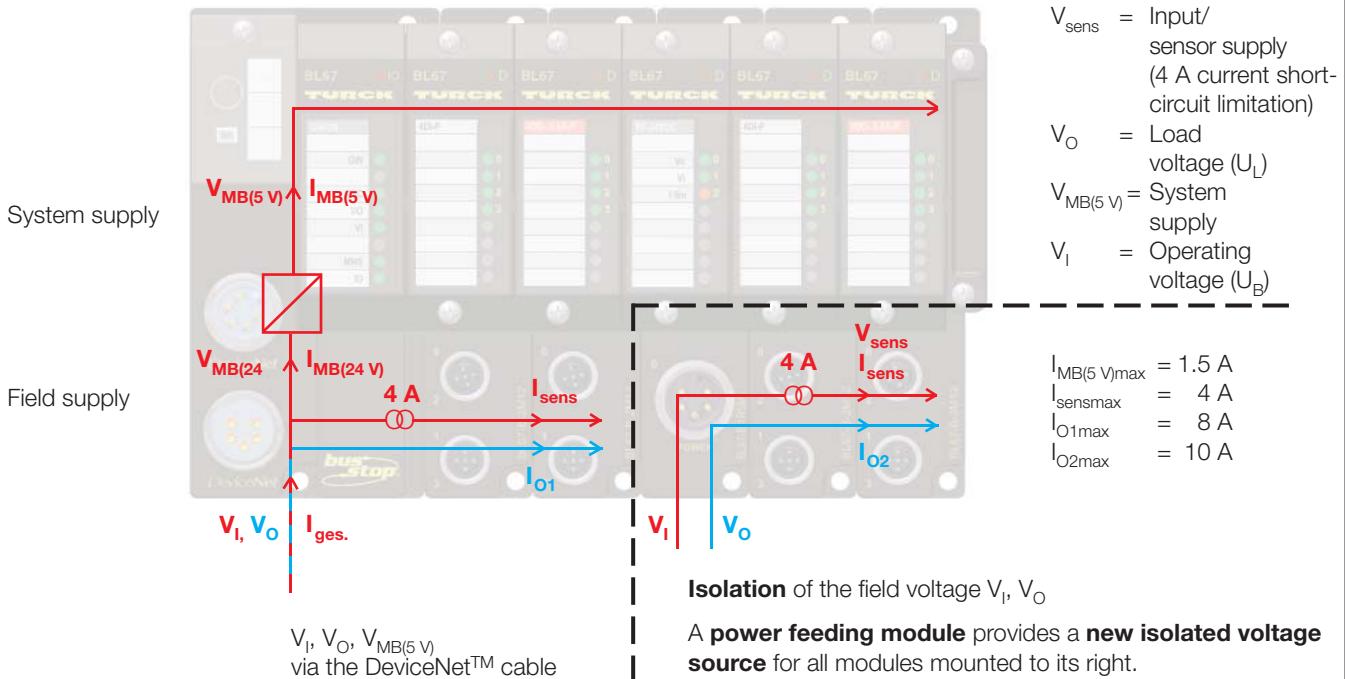

5) $I_{total} = \sum I_{MB(24V)} + \sum I_I + \sum I_O$

BL67 – Power supply concept

PROFIBUS-DP/CANopen/Ethernet system

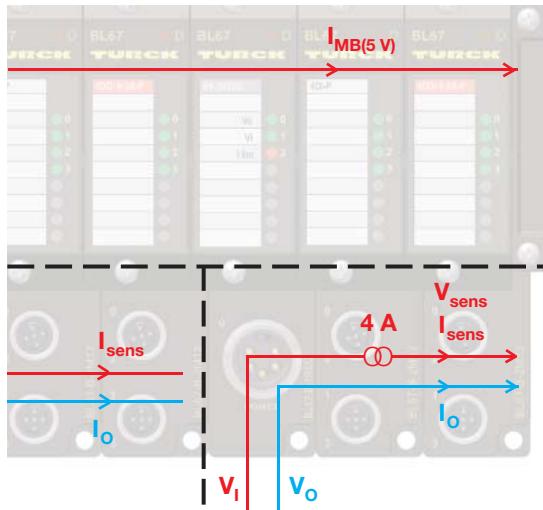

DeviceNet™ system

¹⁾ $V_{MB(5\text{ V})}$ is galvanically isolated from the supply. V_I and V_O are not galvanically isolated and use a common GND potential.

BL67 – General technical data

Dimensions and mounting holes

Note:

Extended vibration resistance:

- Max. 5 g when mounted on non-perforated DIN rail acc. to EN 60715, with end brackets
- Max. 20 g when mounted on a base plate or directly on the machine. At least the gateway and each second module has to be fixed with two screws.

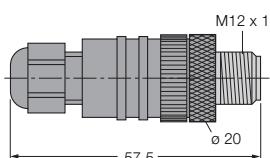

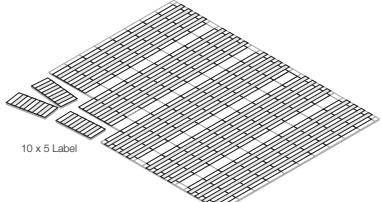

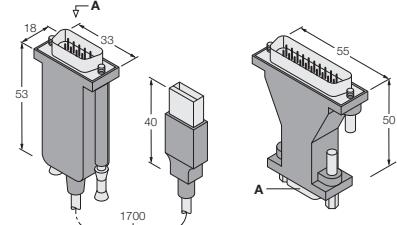

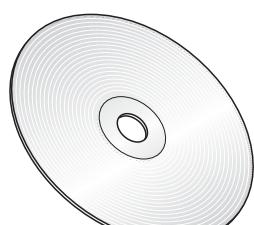

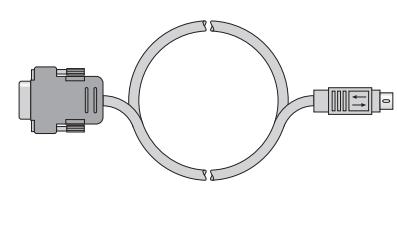

General technical data**BL67 general data**

Potential isolation	via opto-coupler
Ambient temperature	-25 ... +70 °C (possible function limitation of single modules < 0 °C or > 55 °C, see module description)
- Operating temperature	-25 up to +85 °C
- Storage temperature	5 up to 95 % (inside), level RH-2, no condensation (at 45 °C storage temperature) acc. to IEC 60068-2-42/43
Relative humidity	10 ppm (rel. humidity < 75 %, no condensation)
Schadgas	1.0 ppm (rel. humidity < 75 %, no condensation)
- SO ₂	according to EN 61131
- H ₂ S	
Vibration resistance	yes
- 10 to 57 Hz, constant amplitude 0,075 mm, 1 g	frequency cycles with a change rate of 1 octave/min
- 57 to 150 Hz, constant acceleration 1 g	20 frequency cycles per coordinate axis (gateways VN 02-00)
- Vibration mode	mounting on non-perforated DIN rail acc. to EN 60715, with end brackets
- Vibration duration	firm mounting on base plate or machine. Each second module has to be fixed with two screws.
Extended vibration resistance	according to EN 61131
- up tp 5 g (between 10 and 150 Hz)	according to IEC 68-2-27, 18 shocks, semi-sinusoidal 15 g threshold/11 ms, each in ±-direction per space coordinate
- up to 20 g (between 10 and 150 Hz)	according to IEC 68-2-29, 1000 shocks, semi-sinusoidal 25 g threshold/6 ms, each in ±-direction per space coordinate
Application conditions	according to IEC 68-2-31 and free fall according to IEC 68-2-32
Shock resistance	1.0 m
Repetitive shock resistance	0.5 m
Drop and topple	7
- Drop height (weight < 10 kg)	IP67
- Drop height (weight 10 to 40 kg)	according to EN 61131-2/EN 50082-2 (Industrial)
- Test cycles	
Protection degree	8 kV
Electromagnetic capability (EMC)	4 kV
- Static electricity according to EN 61000-4-2	PC-V0 (Lexan)
- Air discharge (direct)	
- Relay discharge (indirect)	
Housing material	

Approvals

The I/O system BL67 does not require mounting in an extra housing. It was specially designed for harsh industrial environments and for direct mounting on the machine and in the process. The system is extremely robust and protected against dirt, dust and most liquids through its high degree of protection. However, it is not suited for the following applications: high pressure jet cleaning, 100% humidity, outdoor installation or permanent operation in liquids.

User manuals

The user manuals for BL67 systems are only available as PDF file and can be downloaded on www.turck.com

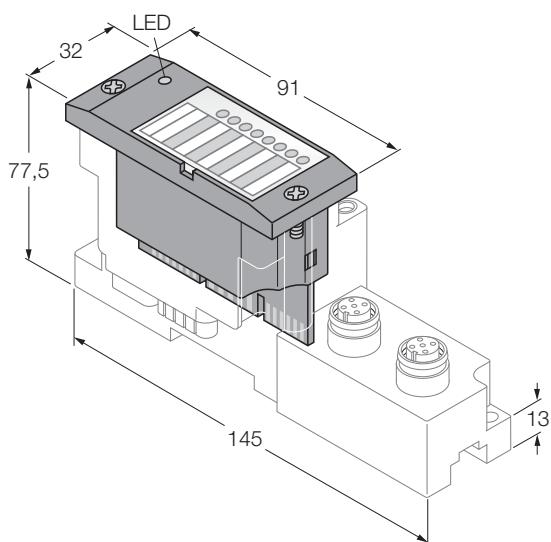

Gateway

BL67 gateways are the heart of a BL67 station. They are designed to connect the modular fieldbus nodes to the higher level fieldbus (PROFIBUS-DP, DeviceNet™, CANopen, Ethernet).

All BL67 electronic modules communicate over the internal module bus with the gateway. The gateway structures the data and sends them clustered via fieldbus nodes to the higher control system. This way all I/O modules can be configured independently of the bus system.

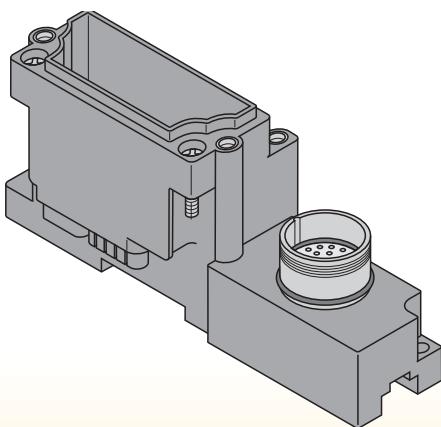

Electronic module

BL67 electronic modules are inserted into the passive base modules from above and then simply affixed with two screws. Maintenance is extremely simplified due to the separation of connection level and module electronics. Moreover, flexibility is enhanced because the base modules provide different types of connectors.

Voltage supply for the electronic modules is either provided via the gateway or a Power-Feeding module. Power-Feeding modules can be used to create galvanically isolated potential groups.

Base module

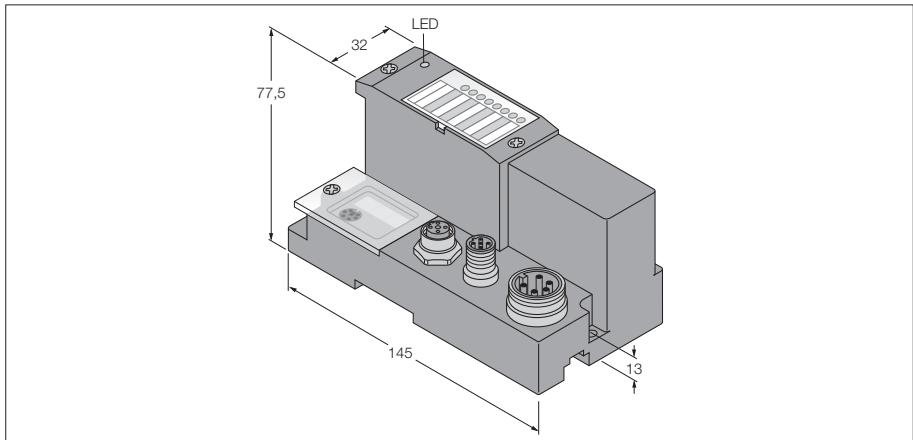

BL67 base modules are aligned one by one to the right of the gateway and are tightened each with two screws, either with the gateway or with the previous module. A DIN rail is not required. This way a compact and stable unit is created which can be mounted directly on the machine or on a DIN-rail.

The base modules serve for connection of the field devices and are available with different connection types (M8, M12, M23 und 7/8").

Gateway for BL67 I/O system

Interface for PROFIBUS-DP

BL67-GW-DPV1

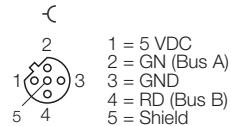

- 3 decimally coded rotary switches
- Degree of protection IP67
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL67 system and PROFIBUS-DPV0/DPV1
- 12 Mbps
- Two 5-pole reverse-keyed M12 x 1 connectors for fieldbus connection
- One 5-pole 7/8" connector for power connection

Type	BL67-GW-DPV1
Ident-No.	6827232
Supply voltage	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 650 mA
Max. field supply current	10 A
Max. system supply current	1.5 A
Voltage supply connection	5-pole male 7/8" connector
Fieldbus transmission rate	9.6 kbps up to 12 Mbps 1...125
Fieldbus addressing range	3 decimally coded rotary switches
Fieldbus addressing	RS232 interface (PS/2 socket)
Service interface	2 x M12, 5-pole, inversely coded
Fieldbus connection technology	5-pole male 7/8" connector
Voltage supply connection	external
Fieldbus connection	
Operating temperature	-25...+70 °C
Function degrading operating temperature	no limitation
> 55 °C circulating air (ventilation)	I _{sens} < 3A, I _{mb} < 1A
> 55 °C steady ambient air	
General technical data	see page 35

Supply voltage	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 600 mA
Max. field supply current	10 A
Max. system supply current	1.5 A
Voltage supply connection	5-pole male 7/8" connector
Fieldbus transmission rate	10/100 Mbps
Fieldbus addressing	rotary switch, BOOTP, DHCP, IO-ASSISTANT
Service interface	RS232 interface (PS/2 socket)
Fieldbus connection technology	female M12 x 1 connector, 4-pole, D-coded
Voltage supply connection	5-pole male 7/8" connector
Operating temperature	-25...+70 °C
Function degrading operating temperature > 55 °C circulating air (ventilation)	no limitation
> 55 °C steady ambient air	Isens < 3A, Imb < 1A
General technical data	see page 35
Accessories	
6914219 RSSD-RSSD-441-6M/S2174	Ethernet cable M12 to M12 (4-pole, D-coded)
6915781 RSSD-RJ45-441-2M/S2174	Ethernet cable RJ45 to M12 (4-pole, D-coded)
6914145 RKM52-6M	power cable 7/8" unterminated end

- 3 decimaly coded rotary switches
- Degree of protection IP67
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL67 system and EtherNet/IP
- 10/100 Mbps
- One 4-pole M12 connector, D coding, for fieldbus connection
- One 5-pole 7/8" connector for power connection

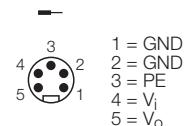

Without function

Ethernet

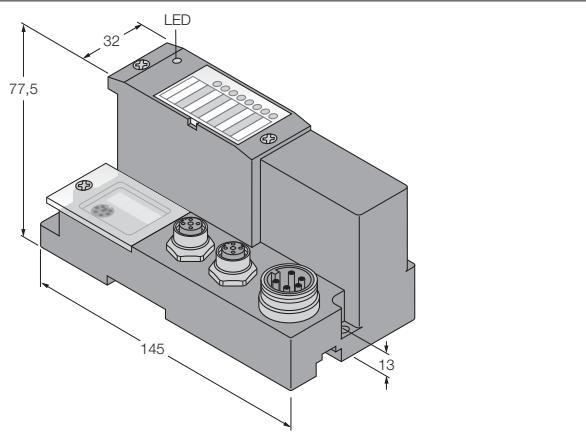

Voltage supply

Programmable gateway for the BL67 I/O system

Interface for PROFIBUS-DP

BL67-PG-DP

- Programmable acc.to IEC 61131-3 with CoDeSys
- Ethernet and RS232 programmable interface
- 512 kByte program memory
- 32 Bit RISC processor
- < 1 ms for 1000 instructions
- Degree of protection IP67
- LEDs for display of supply voltage, common alarm and bus errors
- Interface for PROFIBUS-DP (Slave)
- 12 Mbps

Type	BL67-PG-DP
Ident-No.	6827240
Supply voltage	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 600 mA
Max. field supply current	10 A
Max. system supply current	1.5 A
Voltage supply connection	5-pole male 7/8" connector
Fieldbus transmission rate	9.6 kbps up to 12 Mbps
Fieldbus addressing range	1...125
Fieldbus addressing	Adjustment via CoDeSys software
Service interface	RS232 interface (PS/2 socket)
Fieldbus connection technology	female M12 x 1 connector, 5-pole, reverse-keyed
Voltage supply connection	5-pole male 7/8" connector
Fieldbus connection	external
PLC data	
Programming	CoDeSys V2.3
Released for CoDeSys version	V 2.3.6.4
Programming languages	IEC 61131-3 (IL, LD, FBD, SFC, ST)
Application tasks	1
Number of POUs	1024
Programming interface	RS232 interface, Ethernet
Processor	RISC, 32 bit
Cycle time	< 1 ms for 1000 IL commands (without I/O cycle)
Program memory	512 kByte
Data memory	512 kByte
Input data	4 kByte
Output data	4 kByte
Non-volatile memory	16 kByte
Operating temperature	-25...+70 °C
Function degrading operating temperature	
> 55 °C circulating air (ventilation)	no limitation
> 55 °C steady ambient air	I _{sens} < 3A, I _{mb} < 1A

BL67 electronic modules

Power feeding module with diagnostics

BL67-PF-24VDC

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of system status, field supply and diagnostic information
- Can be used to form potential groups
- Field supply featuring a rated voltage of 24 VDC

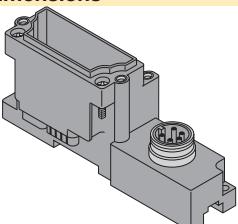

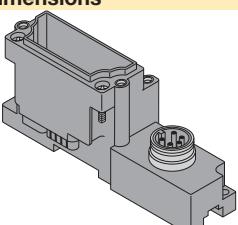

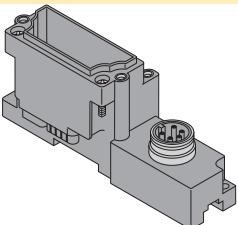

Type	BL67-PF-24VDC
Ident-No.	6827182
Nominal voltage Vi	24 VDC
Nominal voltage V_o	24 VDC
Max. system supply I_{mb}	1.5 A
Max. sensor supply I_{sens}	4.0 A
Max. load current I_o	10 A
Admissible range	18...30 VDC
Rated current from module bus	≤ 30 mA
Number of diagnostic bits	3
Operating temperature	-25...+70 °C
General technical data	see page 35

4 digital inputs

BL67-4DI-P

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 4 digital inputs, 24 VDC
- pnp

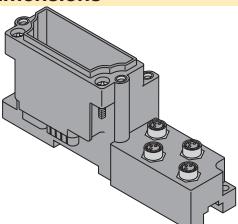

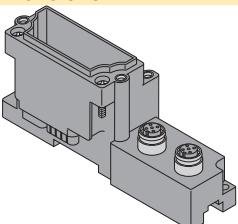

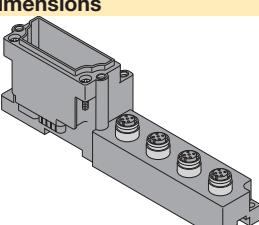

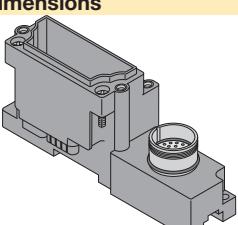

Type	BL67-4DI-P
Ident-No.	6827171
Number of channels	4
Nominal voltage V_i	24 VDC
Rated current from field supply	≤ 40 mA
Rated current from module bus	≤ 30 mA
Power loss, typical	≤ 0.25 W
Input type	pnp
Type of input diagnostics	group diagnostics
Low level signal voltage	< 4.5 V
High level signal voltage	7...30 V
Low level signal current	< 1.5 mA
High level signal current	2.1...3.7 mA
Input delay	0.25 ms
Electrical isolation	electronics for the field level
Operating temperature	-25...+70 °C
Function degrading operating temperature < 0 °C ambient temperature	switching on threshold drop, $1\text{mA} < I_e < 2.5\text{mA}$
General technical data	see page 35

BL67 electronic modules

4 digital inputs

BL67-4DI-PD

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 4 digital inputs, 24 VDC
- pnp
- Channel diagnostics
- Wire-break monitoring
- Selection of filter times
- Input inverting possible

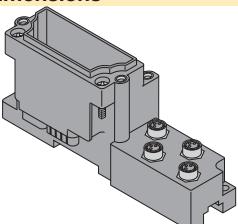

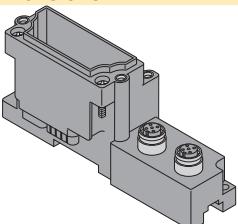

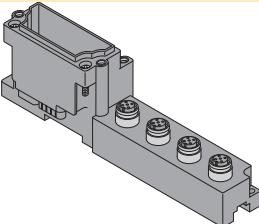

Type	BL67-4DI-PD
Ident-No.	6827204
Number of channels	4
Nominal voltage V_i	24 VDC
Rated current from field supply	$\leq 100 \text{ mA}$
Rated current from module bus	$\leq 30 \text{ mA}$
Power loss, typical	$\leq 1.5 \text{ W}$
Input type	pnp
Type of input diagnostics	channel diagnostics
Low level signal voltage	$< 4.5 \text{ V}$
High level signal voltage	$7 \dots 30 \text{ V}$
Low level signal current	$< 1.5 \text{ mA}$
High level signal current	$2.1 \dots 3.7 \text{ mA}$
Input delay	0.25; 2.5 ms
Electrical isolation	electronics for the field level
Number of diagnostic bits	6
Number of parameter bytes	4
Operating temperature	-25...+70 °C
Function degrading operating temperature	
< 0 °C ambient temperature	support for version VN 01-03 and higher, no limitation
General technical data	see page 35

BL67 electronic modules

4 digital outputs

BL67-4DO-0.5A-P

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 4 digital outputs, 24 VDC
- 0.5 A max.
- pnp

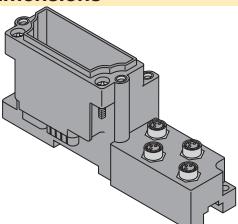

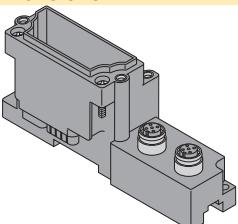

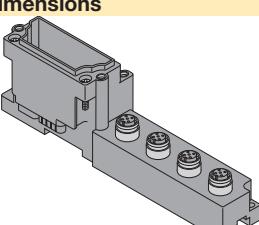

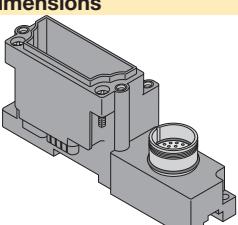

Type	BL67-4DO-0.5A-P
Ident-No.	6827173
Number of channels	4
Nominal voltage V_o	24 VDC
Rated current from field supply	≤ 100 mA
Rated current from module bus	≤ 30 mA
Power loss, typical	≤ 1.5 W
Output type	pnp
Output voltage	24 VDC
Output current per channel	0.5 A
Output delay	3 ms
Load type	resistive, inductive, lamp load
Load resistance, resistive	$> 48 \Omega$
Load resistance, inductive	< 1.2 H
Lamp load	< 3 W
Switching frequency, resistive	< 200 Hz
Inductive switching frequency	< 2 Hz
Switching frequency, lamp load	< 20 Hz
Short-circuit protection	yes
Simultaneity factor	1
Electrical isolation	electronics for the field level
Number of diagnostic bits	4
Operating temperature	-25...+70 °C
Function degrading operating temperature < 0 °C ambient temperature	support for version VN 01-03 and higher, no limitation
General technical data	see page 35

BL67-4DO-2A-P

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 4 digital outputs, 24 VDC
- 2 A max.
- pnp

Type	BL67-4DO-2A-P
Ident-No.	6827174
Number of channels	4
Nominal voltage V_o	24 VDC
Rated current from field supply	≤ 100 mA
Rated current from module bus	≤ 30 mA
Power loss, typical	≤ 1.5 W
Output type	pnp
Output voltage	24 VDC
Output current per channel	2.0 A
Output delay	3 ms
Load type	resistive, inductive, lamp load
Load resistance, resistive	$> 12 \Omega$
Load resistance, inductive	< 1.2 H
Lamp load	< 10 W
Switching frequency, resistive	< 200 Hz
Inductive switching frequency	< 2 Hz
Switching frequency, lamp load	< 20 Hz
Short-circuit protection	yes
Simultaneity factor	1
Electrical isolation	electronics for the field level
Number of diagnostic bits	4
Operating temperature	-25...+70 °C
Function degrading operating temperature	
< 0 °C ambient temperature	support for version VN 01-03 and higher, no limitation
> 55 °C circulating air (Ventilation)	no limitation
> 55 °C steady ambient air	simultaneity factor 0.5
General technical data	see page 35

2 analogue inputs

BL67-2AI-I

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 2 analogue inputs 0/4...20 mA

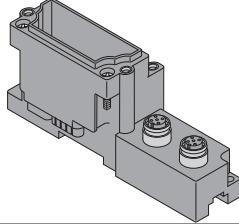

Type	BL67-2AI-I
Ident-No.	6827175
Number of channels	2
Nominal voltage V_i	24 VDC
Rated current from field supply	$\leq 12 \text{ mA}$
Rated current from module bus	$\leq 35 \text{ mA}$
Power loss, typical	$\leq 1 \text{ W}$
Inputs	
Input type	0/4...20 mA
Input resistance	$< 0.125 \Omega$
Maximum limiting frequency, analogue	< 50 Hz
Basic fault limit at 23 °C	< 0.2 %
Repeatability	0.05 %
Temperature coefficient	< 300 ppm/°C of full scale
Resolution	16 Bit
Measuring principle	Sigma Delta
Measured-value display	16 bit signed integer 12 bit full range left justified
Number of diagnostic bytes	2
Number of parameter bytes	2
Operating temperature	-25...+70 °C
General technical data	see page 35

BL67 electronic modules

2 analogue inputs for temperature measurement

BL67-2AI-PT

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 2 analogue inputs for PT100, PT200, PT500 and PT1000 as well as for Ni100 and Ni1000

Type	BL67-2AI-PT
Ident-No.	6827177
Number of channels	2
Nominal voltage V_i	24 VDC
Rated current from field supply	≤ 30 mA
Rated current from module bus	≤ 45 mA
Power loss, typical	≤ 1 W
Inputs	
Input type	PT100, PT200, PT500, PT1000, Ni100, Ni1000
Basic fault limit at 23 °C	< 0.2 %
Repeatability	0.05 %
Temperature coefficient	< 300 ppm/°C of full scale
Resolution	16 Bit
Measured-value display	16 bit signed integer 12 bit full range left justified
Number of diagnostic bytes	2
Number of parameter bytes	4
Operating temperature	-25...+70 °C
General technical data	see page 35

BL67 electronic modules

2 analogue inputs for temperature measurement

BL67-2AI-TC

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 2 analogue inputs for connection of thermoelements, types B, E, J, K, N, R, S and T
- Cold junction point compensation via Pt1000 probe in a special connector

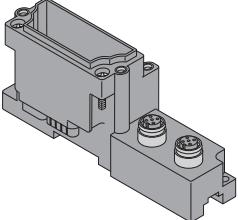

Type	BL67-2AI-TC
Ident-No.	6827178
Number of channels	2
Nominal voltage V_i	24 VDC
Rated current from field supply	$\leq 30 \text{ mA}$
Rated current from module bus	$\leq 35 \text{ mA}$
Power loss, typical	$\leq 1 \text{ W}$
Inputs	
Input type	types B, E, J, K, N, R, S, T
Voltage resolution	
Basic fault limit at 23 °C	$\pm 50\text{mV} < 2\mu\text{V}$
Repeatability	< 0.2 %
Temperature coefficient	0.05 %
Resolution	< 300 ppm/°C of full scale
Measured-value display	16 Bit 16 bit signed integer 12 bit full range left justified
Number of diagnostic bytes	2
Number of parameter bytes	2
Operating temperature	-25...+70 °C
General technical data	see page 35

2 analogue outputs

BL67-2AO-I

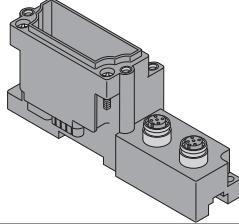

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 2 analogue outputs 0/4...20 mA

Type	BL67-2AO-I
Ident-No.	6827179
Number of channels	2
Nominal voltage V_i	24 VDC
Rated current from field supply	≤ 50 mA
Rated current from module bus	≤ 40 mA
Power loss, typical	≤ 1 W
Outputs	
Output type	0/4...20 mA
Load resistance, resistive	< 0.45 k Ω
Load resistance, inductive	< 1 mH
Transmission frequency	
Basic fault limit at 23 °C	< 200 Hz
Repeatability	< 0.2 %
Temperature coefficient	0.05 %
Resolution	< 150 ppm/°C of full scale
Measured-value display	16 Bit 16 bit signed integer 12 bit full range left justified
Number of parameter bytes	6
Operating temperature	-25...+70 °C
General technical data	see page 35

BL67-2AO-V

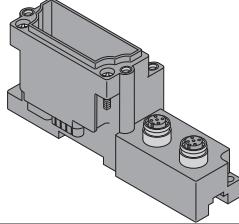

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 2 analogue input -10/0...+10 VDC

Type	BL67-2AO-V
Ident-No.	6827180
Number of channels	2
Nominal voltage V_i	24 VDC
Rated current from field supply	≤ 50 mA
Rated current from module bus	≤ 60 mA
Power loss, typical	≤ 1 W
Outputs	≤ 1 W
Output type	-10/0...+10 VDC
Load resistance, resistive	> 1 k Ω
Load resistance, capacitive	> 1 μ F
Transmission frequency	< 100 Hz
Basic fault limit at 23 °C	< 0.2 %
Repeatability	0.05 %
Temperature coefficient	< 300 ppm/°C of full scale
Resolution	16 Bit
Measured-value display	16 bit signed integer 12 bit full range left justified
Number of parameter bytes	6
Operating temperature	-25...+70 °C

BL67 electronic modules

RS232 interface

BL67-1RS232

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Transmission of serial data via RS232 interface
- For connection of different devices, such as printers, scanners or bar code readers

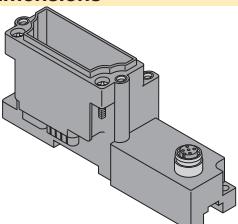

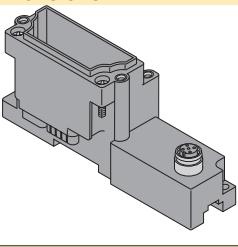

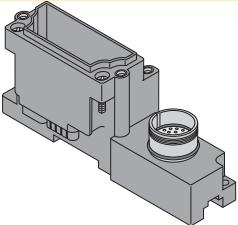

Type	BL67-1RS232
Ident-No.	6827181
Number of channels	1
Nominal voltage V_i	24 VDC
Rated current from field supply	≤ 50 mA
Rated current from module bus	≤ 140 mA
Power loss, typical	≤ 1 W
Inputs / Outputs	
Transmission level active (URS1)	-15 to -3 VDC
Transmission level inactive (URSO)	3 to 15 VDC
Common-mode range (UGL)	-7 to 12 VDC
Transmission signals	RxD, TxD, RTS, CTS
Data buffer received	128 Byte
Send data buffer	64 Byte
Connection type	full duplex
Transmission rate	300 to 115200 bps
Parameter	transmission rate, diagnostics, data bits, stop bits, XON - character, XOFF - character, parity, flow control
Cable length	15 m
Electrical isolation	isolation of electronics and field level via opto-couplers
Number of diagnostic bytes	1
Number of parameter bytes	4
Operating temperature	-25...+70 °C
General technical data	see page 35

BL67 electronic modules

RS485/422 interface

BL67-1RS485/422

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Transmission of serial data via RS485/422 interface
- For connection of different devices, such as printers, scanners or bar code readers

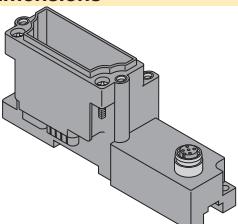

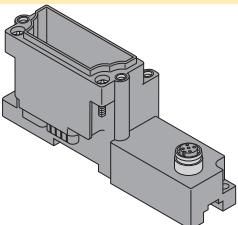

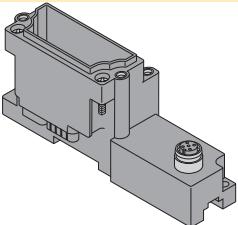

Type	BL67-1RS485/422
Ident-No.	6827192
Number of channels	1
Nominal voltage V_i	24 VDC
Rated current from field supply	≤ 50 mA
Rated current from module bus	≤ 60 mA
Power loss, typical	≤ 1 W
Inputs / Outputs	
Transmission signals	TxD, RxD
Connection type	2-wire half duplex or 4-wire full duplex
Transmission rate	300 to 115200 bps
Parameter	RS485/422, transmission rate, diagnostics, data bits, stop bits, XON - character, XOFF - character, parity, flow control
Cable length	1000 m
Line impedance	120 Ω
Bus termination	external
Electrical isolation	isolation of electronics and field level via opto-couplers
Number of diagnostic bytes	1
Number of parameter bytes	4
Operating temperature	-25...+70 °C
General technical data	see page 35

BL67 electronic modules

Connection of SSI sensors

BL67-1SSI

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Connection of SSI sensors
- Maximum bit transmission rate 1 MBit/s

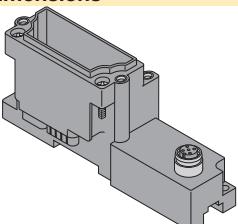

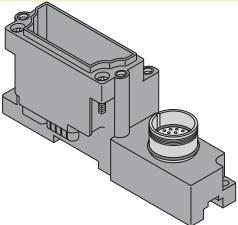

Type	BL67-1SSI
Ident-No.	6827191
Number of channels	1
Nominal voltage V_i	24 VDC
Rated current from field supply	≤ 50 mA
Rated current from module bus	≤ 50 mA
Power loss, typical	≤ 1 W
Inputs / Outputs	
Transmission signals	CL, D
Connection type	4-wire full duplex (clock output/signal input)
Transmission rate	62.5 kbps up to 1 Mbps
Parameter	transmission rate, diagnostics, data format (binary / GRAY coded), data frame bits (1-32), number of invalid bits (LSB: 0-15, MSB 0-7)
Cable length	30 m
Electrical isolation	isolation of electronics and field level via opto-couplers
Number of diagnostic bytes	1
Number of parameter bytes	4
Operating temperature	-25...+70 °C
General technical data	see page 35

Detection of standard counting signals

BL67-1CNT/ENC

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Detection of standard counting signals
- 5 VDC differential
- 5... 24 VDC single ended
- 1 digital input, 24 VDC
- 1 digital output, 24 VDC, 0.5 A
- 2 more digital channels, configurable 24 VDC, 0.5 A

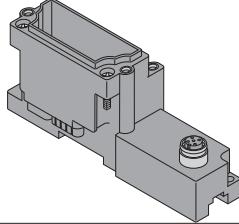

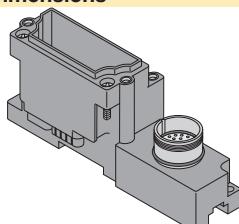

Type	BL67-1CNT
Ident-No.	6827224
Number of channels	1
Nominal voltage V_i	24 VDC
Rated current from field supply	$\leq 100 \text{ mA}$
Rated current from module bus	$\leq 50 \text{ mA}$
Power loss, typical	$\leq 1.2 \text{ W}$
Inputs / Outputs	isolation of electronics and field level via opto-couplers
Input type	pnp
Output type	pnp
Output current per channel	0.5 A
Output delay	0.2 ms
Load type	resistive
Short-circuit protection	yes
Measuring ranges	
Frequency measurement	up to 250 kHz
Speed measurement	factor parameterisable
Period duration measurement	2 μsec
Upper count limit	0x80000000 up to 0xFFFFFFFF
Lower count limit	0x80000000 up to 0xFFFFFFFF
Operating temperature	-25...+70 °C
General technical data	see page 35

Connection of CANopen nodes

BL67-1CVI

- Independent of the type of field-bus and connection technology used
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Connection of up to 8 CANopen nodes
- 8 byte I/O process data per CVI-module
- max. 4 byte I/O data per node
- max. transmission rate 1 MBit/s

Type	BL67-1CVI
Ident-No.	6827223
Number of channels	1
Nominal voltage V_i	24 VDC
Rated current from field supply	≤ 100 mA
Rated current from module bus	≤ 30 mA
Power loss, typical	≤ 1 W
Inputs / Outputs	
Transmission signals	CAN high, CAN low
Connection type	CANopen
Transmission rate	10 kbps up to 1 Mbps
Parameter	transmission rate, diagnostics, bus termination, range of I/O data
Bus termination	internal
Electrical isolation	isolation of electronics and field level via opto-couplers
Number of diagnostic bytes	6
Number of parameter bytes	16
Operating temperature	-25...+70 °C
General technical data	see page 35

RFID system

Interface for connection of BL ident write-read heads

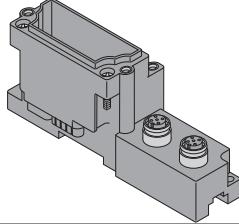

BL67-2RFID-A

- This module is used in conjunction with the BL67-GW-DPV1
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Connection of 2 BL ident write-read heads
- Transmission rate: 115.2 kbps
- Cable length: 50 m maximum

Type	BL67-2RFID-A
Ident-No.	6827225
Number of channels	2
Nominal voltage V_i	24 VDC
Rated current from field supply	≤ 100 mA
Rated current from module bus	≤ 30 mA
Power loss, typical	≤ 1 W
Inputs / Outputs	
Transmission rate	115.2 kbps
Cable length	50 m
Electrical isolation	isolation of electronics and field level via opto-couplers
Simultaneity factor	1
Sensor supply	0.5 A per channel, short-circuit proof
Number of diagnostic bytes	4
Number of parameter bytes	8
Number of input bytes	4
Number of output bytes	4
Operating temperature	-25...+70 °C
General technical data	see page 35

Compatible base modules

Dimensions	Type	Connection
	6827186 BL67-B-2M12 2 x M12, 5-pole, female, a-coded Matching connection cable (for example): RK4.5T5-RS4.5T/S2500 Ident-No. 6699201	F185

RFID system

Interface for connection of BL ident write-read heads

BL67-2RFID-C

- This module is used i.e. with Gateway BL67-GW-DPV1 (sensing mode DPV0)
- Degree of protection IP67
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Connection of 2 BL ident write-read heads
- Transmission rate: 115.2 kbps
- Cable length: 50 m maximum

Type	BL67-2RFID-C
Ident-No.	6827238
Number of channels	2
Nominal voltage V_i	24 VDC
Rated current from field supply	≤ 100 mA
Rated current from module bus	≤ 30 mA
Power loss, typical	≤ 1 W
Inputs / Outputs	
Transmission rate	115.2 kbps
Cable length	50 m
Electrical isolation	isolation of electronics and field level via opto-couplers
Simultaneity factor	1
Sensor supply	0.5 A per channel, short-circuit proof
Number of diagnostic bytes	4
Number of parameter bytes	8
Number of input bytes	32
Number of output bytes	32
Operating temperature	-25...+70 °C
General technical data	see page 35

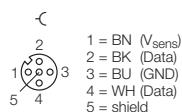

Compatible base modules

The piconet® I/O system – in miniature housings for highest industrial requirements

piconet® – Coupling modules

- As interface to the higher level control system
- Gateway between PROFIBUS-DP, CANopen, DeviceNet™, INTERBUS, EtherNet/IP, Modbus TCP, PROFINET and fiber-optic cable based Sub-Bus „IP-Link“
- Coupling modules connect the higher level open fieldbus and the economical extension modules.
- Fiber-optic subnet (IP-Link) for connection of up to 120 extension modules per coupling module
- High-speed transmission, 1000 I/Os in approx. 1 ms via prefabricated and interference-free fiber-optic cables.
- Fiber-optic cable length up to 15 m

Bus addressing switch and service interface to I/O-ASSISTANT software
Bus LEDs
Module/ IP-Link LEDs

Compact and robust housing

- Only 26.5 mm high, 30 mm wide and 210, 175 or 126 mm long
- Fully encapsulated IP67 housing
- Suited for direct use on the machine
- Ideally suited for special or serial machine engineering as well as for various field applications

piconet®-Stand-alone module

- Stand-alone modules connect the integrated I/Os directly with the open fieldbus, e.g. PROFIBUS-DP, CANopen, DeviceNet™, INTERBUS, Modbus TCP, EtherNet/IP and PROFINET

A secure connection

- Prefabricated bus, fiber optic, power and I/O cables
- Field-wireable connectors
- Additional networking components such as T-pieces, terminating resistors etc.

piconet® - Extension modules

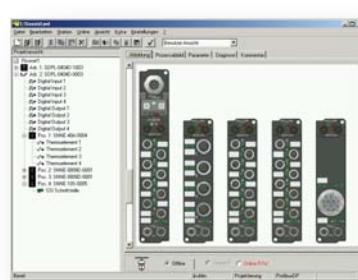

- Flexible and tested I/O connection technology in M8 x 1, M12 x 1 and M23 x 1
- Extension modules independent of the higher lever fieldbus system

piconet® - Bridges for fibre optics and power cables

- Compact mounting
- Reduced space requirements
- Easy installation
- IP67

I/O-ASSISTANT

Easy planning and configuration with the I/O-ASSISTANT

Configuration software for

- Project planning
- Configuration
- Parameterisation

Description

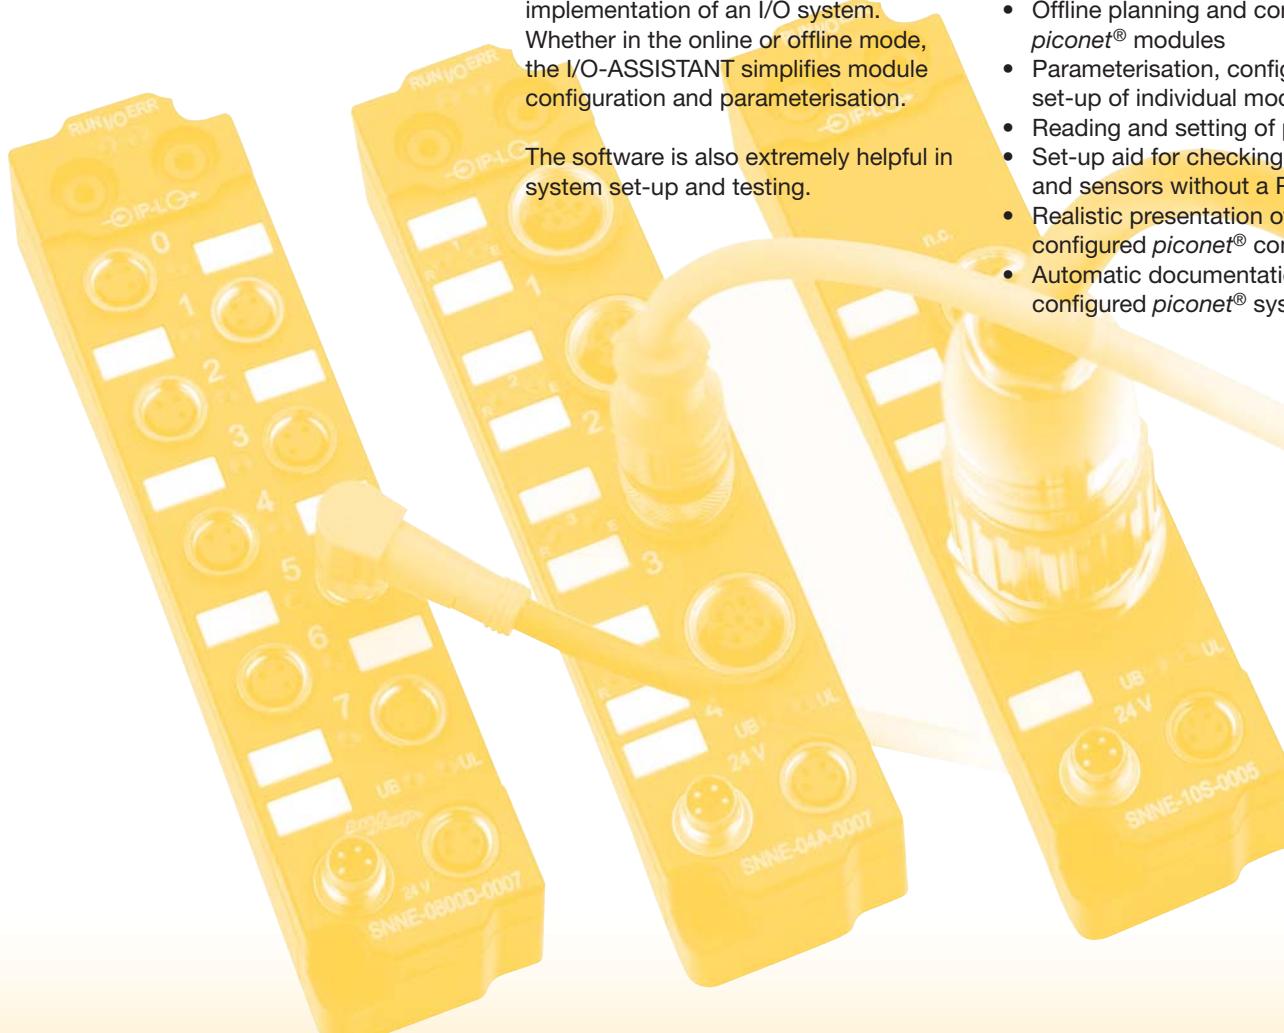

The configuration software I/O-ASSISTANT supports you in planning and implementation of an I/O system.

Whether in the online or offline mode, the I/O-ASSISTANT simplifies module configuration and parameterisation.

The software is also extremely helpful in system set-up and testing.

Functions

- Convenient software tool
- Selection of the required modules
- Offline planning and configuration of piconet® modules
- Parameterisation, configuration and set-up of individual modules
- Reading and setting of process data
- Set-up aid for checking the cabling and sensors without a PLC
- Realistic presentation of the configured piconet® components
- Automatic documentation of configured piconet® systems

piconet® – Compact I/O system in IP67 – Overview

piconet®, the miniature IP67 product family within the TURCK fieldbus programme, featuring extremely compact housings and a fine modular structure, is the ideal solution for serial and special machine engineering and many other field applications. The product line includes:

- **piconet® coupling modules**

The coupling modules function as the gateway between the open fieldbus and the fibre-optic based **piconet®** sub-bus „IP-Link“.

- **piconet® extension modules**

The various extension modules are combined to form a modular network via the fibre-optic based IP-Link .

- **piconet® stand-alone modules**

Stand-alone-modules connect the integrated inputs/outputs directly to the open fieldbus.

Based on the IP-Link, a modular network can be constructed, with which up to 120 extension modules can be operated via a single coupling module. The coupling module collects the I/O data of the connected extension modules via the interference-immune and fast IP-Link network with a transmission speed of 2 Mbps.

The transmission time for 1,000 I/Os is approx 1 ms – if less data are transferred the transmission speed is even higher. The maximum fibre-optic cable length is 15 m.

The product line comprises of extension and stand-alone modules for the entire spectrum of I/O signals – ranging from standardised digital industrial signals to analogue inputs and outputs. The family is complemented by a choice of technology modules, such as a pulse width modulator, an up/down counter, an

incremental encoder as well as various serial interfaces.

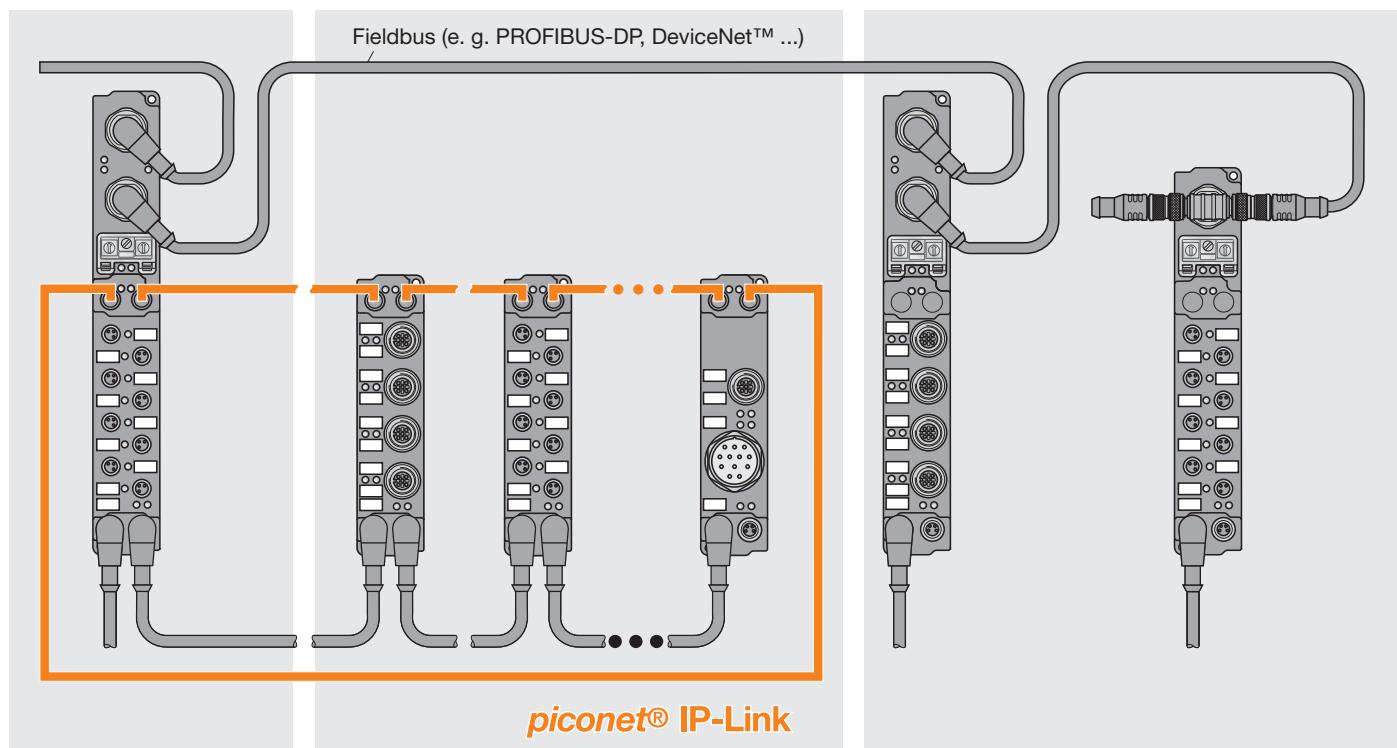

piconet® can be connected to all major industrial fieldbus systems (e.g. PROFIBUS-DP, DeviceNet™, CANopen, INTERBUS, Modbus TCP, EtherNet/IP and PROFINET).

The robust IP67 housing is extremely compact, fully encapsulated and equipped throughout with metal connectors. As a result, the modules are perfectly suited for application in harsh industrial environments as well as in space-critical applications in special and serial machine engineering.

The operating and load supply are fed separately to all **piconet®** modules.

A status LED is assigned to each channel to provide signal status indications.

piconet® – modular network with direct connection to the higher level fieldbus

Coupling module (Gateway)

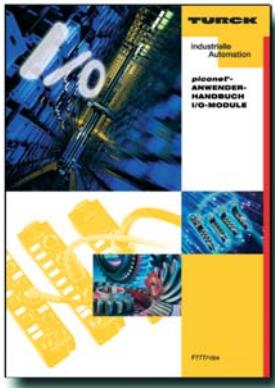

Extension modules

Stand-alone modules

The figure shows a PROFIBUS-DP application.

piconet® – General technical information

A detailed technical system description as well as application guidelines for piconet® fieldbus components are contained in the piconet® – User Manual.

Earthing/Shielding concept

The shield is capacitively coupled with the base of the piconet® modules. In order to eliminate interferences effectively via the shield, the surface on which the module is mounted must provide a low impedance or low-resistance connection to the ground (e.g. the ground reference plane, the machine's ground). Optionally, the shield of the bus cable can be directly earthed via the piconet® earthing clip EL-0002.

Data mapping

Compact mapping

In the compact data mapping mode, purely process/user data are mapped. Data of bit-oriented modules are mapped in the compact mode only.

Complex mapping

In the complex data mapping mode, control and status byte are mapped in addition to process/user data. Data of byte-oriented modules can be mapped either in the compact or complex mode.

Note: piconet® coupling modules first map the data of the byte-oriented (complex) extension modules to the process image according to their physical order within the IP-Link network. Then the data of the bit-oriented extension modules are added to the process image

Data formats

The Intel format

In the Intel format, the most significant data byte follows the least significant data byte. The Intel format is colloquially also referred to as the "little Endian".

The Motorola format

In the Motorola format, the least significant data byte follows the most significant data byte. The Motorola format is colloquially also referred to as the "big Endian".

Note: The default data format setting of the various fieldbus types differs. Fieldbus components for DeviceNet™, CANopen and Ethernet are set by default to Intel, while PROFIBUS-DP and INTERBUS components are preset to the Motorola format. In the catalogue, the mapping tables (process images) of the extension modules are exclusively shown in the Motorola format.

Alignment

Byte alignment

In order to ensure that the addressing area always starts at the beginning of a byte, so-called filler bits (unused/idle) are inserted into the process image when the byte alignment option is activated.

Word alignment

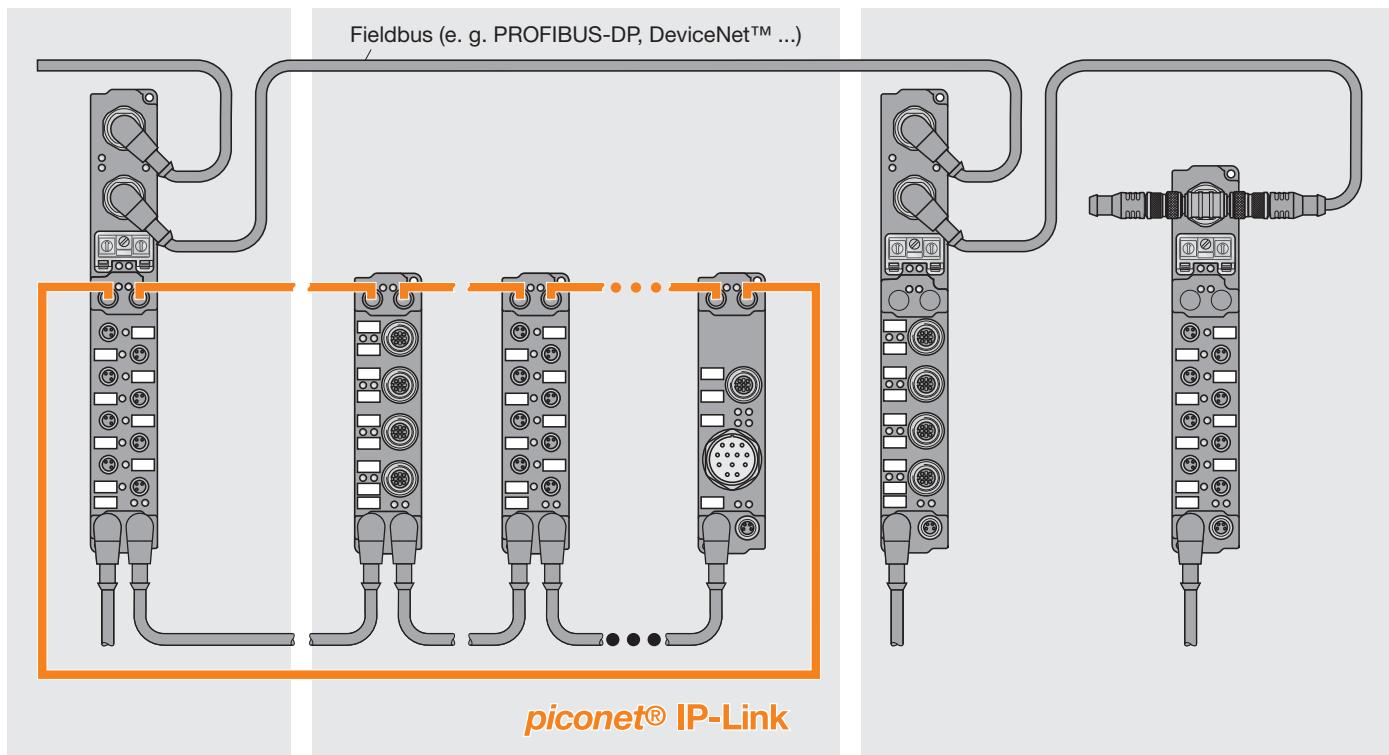

In order to ensure that the addressing area always starts at the beginning of a word, so-called filler bytes (unused/idle) are inserted into the process image when the word alignment option is activated.

piconet® – technical data of fibre-optic cables “IP-Link”

ATTENTION:

For detailed assembly instructions concerning the IP-Link fiber optic cables, please refer to the “piconet® - User manual I/O modules” i.e. the mounting instructions of the IP-Link connector SFOC-0002-10

Profile	step index
Material fibre core	PMMA, Ø 980 µm
Material fibre jacket	PMMA, Ø 1000 µm
Material fibre insulation	PE, colour black, Ø 2,2 mm
Material strain relief	Aramid (Kevlar)
Material outer jacket	PUR, colour orange, Ø 5,5 ± 0,2 mm
Application	for stationary installation in the machine sector, in cable ducts and conduits on cable racks for flexible use in robot applications with slight dynamic strain for use in trailing cables
Transmission characteristics	
– Attenuation at 650 nm	typ. 170...180 dB/km, max. 200 dB/km
Numerical aperture	0,5
Mechanical features	
– Bending radius, static	min. 50 mm
– Bending radius, dynamic	min. 10 x outer diameter
– Bending radius, trailing chain	min. 10 x outer diameter (approx. 2 million cycles)
Chemical features	very good resistance to oils, fat, acids, alkalis long-term installation in water not admissible
Operating temperature	-20...+ 70 °C
Storage temperature	-40...+ 70 °C
Flammability	flame-retardant halogen-free to IEC 60754-2A1:1997, no corrosive and toxic gases

piconet® – premoulded IP-Link fibre-optic cables

	The fiber-optic assembly kit is the ideal tool for all users who want to assemble the fiber-optic cables for the piconet® sub-system IP-Link themselves. Content: 1 cable stripper 1 diagonal cutter 1 grinding gauge for connector type SFOC-0002 1 sand paper, grain size 600 1 mounting guidelines	LWL-KS-SFOC-0002	6901181

piconet® – Special accessories

piconet® – Fibre-optic cable IP-Link – Measuring device

Figure	Description	Type	Ident-No.
	The optical measuring device determines the light intensity and the degree of attenuation produced by the fibre-optic cable IP-Link by using a stabilized light source. The integrated microprocessor enables the measuring of wave lengths of 590 nm which are displayed either as µW or dBm. Zero calibration is automatically started after switching on the device.	LWL-MG	6901182

piconet® – Fibre-optic cable IP-Link – Bridge

Figure	Description	Type	Ident-No.
	The IP-Link bridge provides considerable mounting comfort, especially for compact mounting of the extension modules. The flexible centerpiece of the jumper enables the line up of extension modules at a distance between 0 and 5 mm. If the optional DIN rail SNNE-RAIL500 with M3 drills is used, the time for mounting is further reduced. Degree of protection IP67.	SFOB-0001	6603817

piconet® – Power bridge

Figure	Description	Type	Ident-No.
	The power bridge eases assembly of extension modules, especially for compact mounting of the extension modules. If the optional DIN rail SNNE-RAIL500 with M3 threaded holes is used, the time for mounting is further reduced. Degree of protection IP67. Further information about power cables is provided in the chapter General Accessories.	IPSKP4-0,12-SSP4/S90/S2154	8030976

piconet® – DIN rail

Figure	Description	Type	Ident-No.
	The DIN rail with M3 threaded holes for quick mounting of piconet® extension modules is optional and made of stainless steel (V2A). Up to 15 extension modules can be lined up in a distance of 2 mm. Direct mounting on the machine with M5 screws is possible. 175 x 30 x 500 mm (H x W x D)	SNNE-RAIL500	6824470

piconet® – IP20 terminal blocks

Figure	Description	Type	Ident-No.
	Single-row terminal block with 10 terminals for 8 I/O channels, „Push-in“ technology for tool free connections, clear display of signal status via LEDs, degree of protection IP20. For usage in combination with piconet® extension module SNNE-0808D-0003.	SNNE-BL I/O 3,5-10/LED-SET	6824475
	3-row terminal block with 30 terminals for 8 I/O channels, „Push in“ technology for tool free connections, clear display of signal status via LEDs, degree of protection IP20 For usage in combination with piconet® extension modules SNNE-0808D-0003.	SNNE-BL I/O 3,5-30/LED-SET	6824474

3

piconet® – SUB-D connector IP67

Figure	Description	Type	Ident-No.
	25-pole SUB-D connector, degree of protection IP67, for cable mounting. For connection cables with outer diameter between 6 and 10mm. For usage in combination with piconet® extension module SNNE-0016D-000x.	SUB-D-IP67	6901390

piconet® – Sets

Housing base plate to be mounted on the module via screws and coupling nuts (included in delivery). 3. Finally let the module snap on the hat-rail via the module carrier clip.	S-BKT2	6603931

piconet® – Power junction boxes

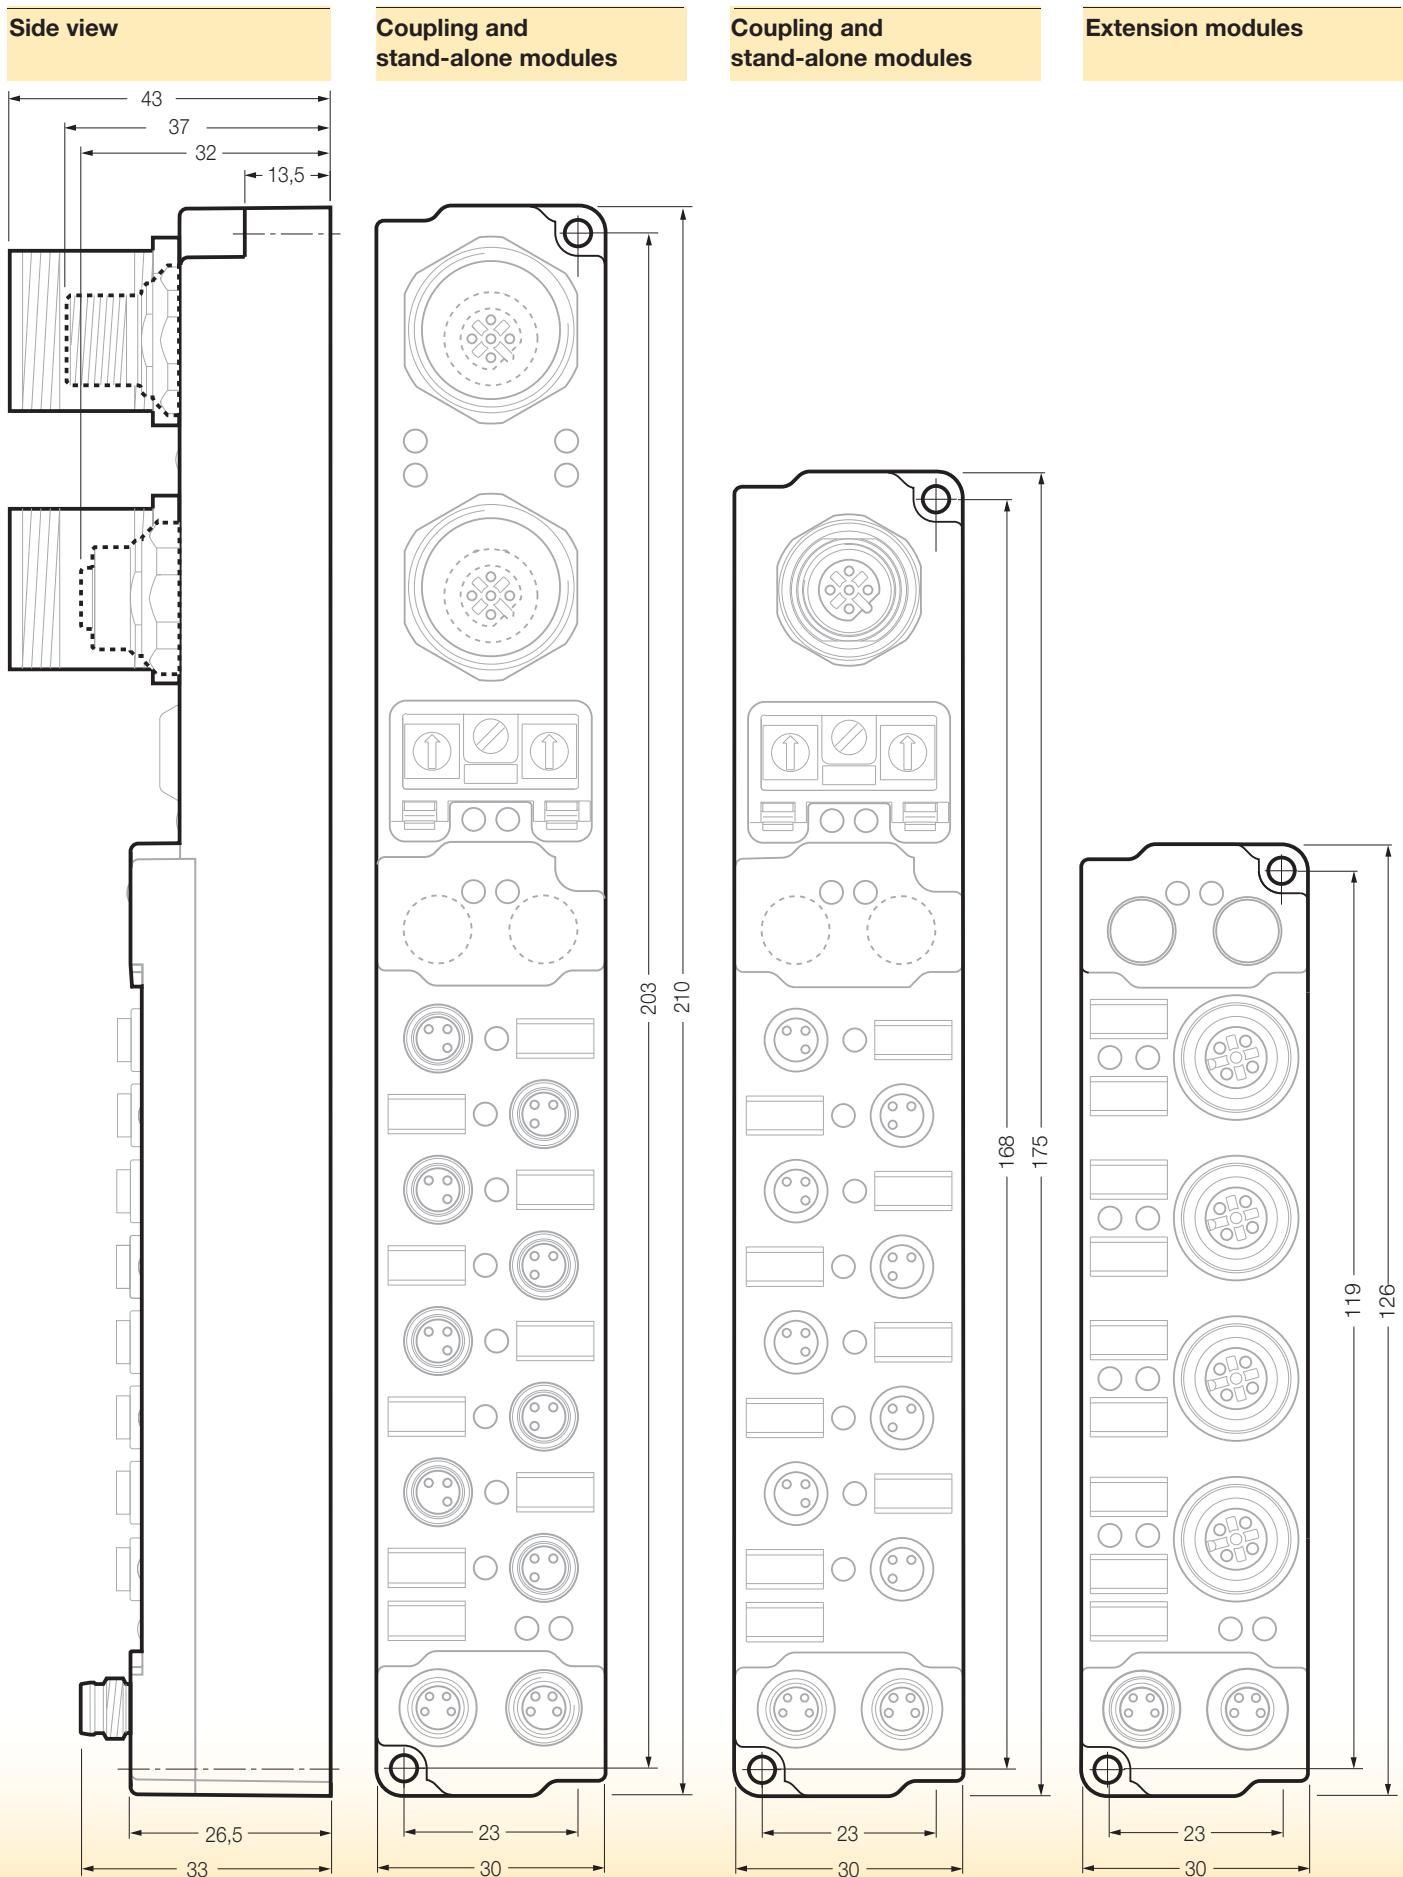

- Power junction for piconet® stations
- Robust and fully encapsulated polyamide housing

ATTENTION:

piconet® power junctions may be powered with a current of max. 9 A each. A maximum of 4 A can be drawn from the power junction per channel. The junctions have to be protected with correspondent fuse elements at the power connector (7/8") and the outputs (M8)!

PROFIBUS-DP	132
DeviceNet™	134
CANopen	136
INTERBUS	138
Modbus TCP	140
EtherNet/IP	142
PROFINET	144

piconet® – Coupling modules

piconet® coupling modules are the gateway between the higher level fieldbus (e.g. PROFIBUS-DP, Device-Net™, CANopen, INTERBUS, Modbus TCP, EtherNet/IP and PROFINET) and the fibre-optic based *piconet*® sub-bus “IP-Link”. Depending on the type of coupling module, they are equipped with one or two fieldbus connections and two further connectors for connection to the *piconet*® IP-Link.

On basis of the IP-Link, it is possible to construct a modular network, for operation of up to 120 extension modules per coupling module.

The coupling module collects the I/O data of the connected extension modules via the interference immune and fast (2 Mbps) IP-Link network.

The transmission time for 1,000 I/Os is approx. 1 ms – if less data are transferred the transmission speed is even higher. The maximum fibre-optic cable length is 15 m.

The robust IP67 housing is extremely compact, fully encapsulated and equipped throughout with metal connectors. As a result, our *piconet*® modules are suited for application both in rough industrial

environments as well as in space-critical applications in serial and special machine engineering.

Operating and load voltage are – as with all *piconet*® module types – fed separately. Alongside the “Power” LED, each channel is assigned a “Status” LED for switching status indications.

piconet® – coupling modules – general technical data

Adjustment

Fieldbus address	1...99 (decimal), adjustable via coded rotary switches
Transmission rate	automatic

LED indications (module-specific)

Fieldbus	fieldbus specific (s. manual)
Status IP-Link or module (local errors)	
– green LED flashing/ON – red LED OFF:	receipt of error-free IP-Link protocols
– green LED flashing/red LED flashing:	receipt of faulty IP-Link protocols (must not lead to a system error)
– green LED OFF/red LED flashing:	receipt of faulty IP-Link protocols
– green LED OFF/red LED ON:	no data transfer via the IP-Link or module error
Operating voltage U_B	green: operational
Load voltage U_L	green: operational

Connections

Fieldbus	brass, nickel-plated
IP-Link	depending on the type of fieldbus system used
Length of fibre-optic cable	(2) IP-Link female connectors
Power supply	max. 15 m
Inputs/outputs	(1) M8 male connectors, 4-pole, (1) M8 female connectors, 4-pole
Service interface	selectable: (8) M8 female connectors, 3-pole, or (4) M12 female connectors, 5-pole
	(1) terminal strip, 5-pole (for I/O-ASSISTANT)

Housing

Material	compact, fully encapsulated plastic housing
Dimensions – device with 1 fieldbus connection	PA6 (Polyamid)
Dimensions – device with 2 fieldbus connections	175 x 30 x 26.5 mm (H x W x D)
Mounting	210 x 30 x 26.5 mm (H x W x D)
Mounting position	via 2 through-holes, Ø 3 mm
Operating temperature (range)	any
Operating temperature (storage)	0 °C to +55 °C (+32 °F to +131 °F)
Degree of protection (IEC 60529/EN 60529)	-25 °C to +85 °C (-13 °F to +185 °F)
Vibration and shock testing	IP65, IP66, IP67
Electromagnetic capability (EMC)	according to IEC 68, part 2-6 / IEC 68, part 2-27
Weight	according to EN 50081-2/EN 50082-2
Approvals	approx. 250–280 g (depending on type)

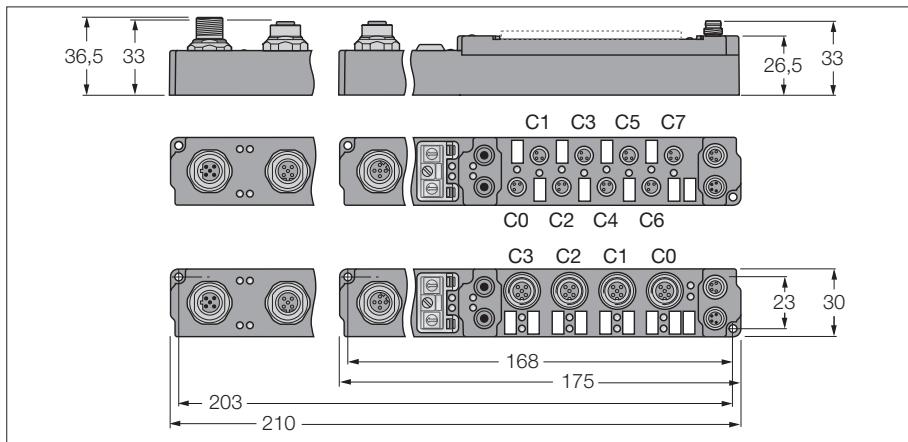

Please note: further technical information is contained in the *piconet*® user manuals.

piconet® coupling module for PROFIBUS-DP

4 digital pnp inputs filter 3 ms

4 digital outputs 0.5 A

- 4 digital pnp inputs
- 4 digital outputs 0.5 A
- Input filter 3 ms
- Configuration interface
- Parameterisable functions
- Supported via I/O-ASSISTANT
- Direct connection to the fieldbus
- Direct connection to the IP link
- Fibre-glass reinforced PA6 housing
- Encapsulated module electronics
- Metal connector
- Degree of Protection IP67

Operating / load voltage	20...29 VDC ≤ 100 mA
Fieldbus transmission rate	9.6 kbps up to 12 Mbps
Fieldbus addressing	0 to 99
Service interface	parameterisation via I/O-ASSISTANT
Electrical isolation	Fieldbus to operational voltage
Fibre-optic length	≤ 15 m
Inputs	
Number of channels	4 digital inputs acc. to EN 61131-2
Input voltage	20...29 VDC via operating voltage
Supply current	< 500 mA per channel, short-circuit proof
Low level signal voltage	-3...5 VDC (EN 61131-2, type 2)
High level signal voltage	11...30 VDC (EN 61131-2, type 2)
Input delay	3 ms
Max. input current	6 mA
Outputs	
Number of channels	4 digital outputs acc. to EN 61131-2
Output voltage	20...29 VDC from load voltage
Output current per channel	0.5 A, short-circuit proof
Load type	resistive, inductive, lamp load
Switching frequency	≤ 500 Hz
Simultaneity factor	1
Operating temperature	0 to 55 °C

Data in process image

- Degree of Protection IP67

Operating / load voltage	20...29 VDC
Operating current	≤ 100 mA
Transmission rate Ethernet	10 Mbps / 100 Mbps
Addressing modes Ethernet:	via coded rotary switches
Service interface	parameterisation via I/O-ASSISTANT
Electrical isolation	fieldbus to operational voltage
Fibre-optic length	≤ 15 m
Inputs	
Number of channels	4 digital inputs acc. to EN 61131-2
Input voltage	20...29 VDC via operating voltage
Supply current	< 500 mA per channel, short-circuit proof
Low level signal voltage	-3...5 VDC (EN 61131-2, type 2)
High level signal voltage	11...30 VDC (EN 61131-2, type 2)
Input delay	3 ms
Max. input current	6 mA
Outputs	
Number of channels	4 digital outputs acc. to EN 61131-2
Output voltage	20...29 VDC from load voltage
Output current per channel	0.5 A, short-circuit proof
Load type	resistive, inductive, lamp load
Switching frequency	≤ 500 Hz
Simultaneity factor	1
Operating temperature	0 to 55 °C

piconet® – Extension modules for IP-Link

piconet® extension modules are equipped with a bus connector for the fibre-optic network IP-Link. The IP-Link allows connection and operation of up to 120 extension modules via a single coupling module.

The product spectrum comprises extension modules for the entire spectrum of I/O signals – ranging from standardised digital industrial signals up to analogue inputs and outputs. The family is complemented by a choice of technology modules, such as a pulse width modulator, an up/down counter and an incremental en-

coder as well as various serial interfaces. The coupling module collects the I/O data of the connected extension modules via the interference immune and fast (2 Mbps) IP-Link network.

The transmission time for 1,000 I/Os is approx. 1 ms – if less data are transferred the transmission time is even less. The maximum length of a fibre-optic cable is 15 m.

The robust IP67 housing is extremely compact, fully encapsulated and equipped throughout with metal connectors.

As a result, our *piconet*® modules are suited for application both in rough industrial environments as well as in space-critical applications in serial and special machine engineering.

Operating and load voltage are – as with all *piconet*® module types – fed separately. Alongside the “Power” LED, each channel is assigned a “Status” LED for switching status indications.

	6824184 SNNE-0008D-0005	F118, F082

Connection

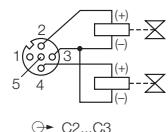

F079 - Output M8 x 1

F082 - Voltage supply M8 x 1

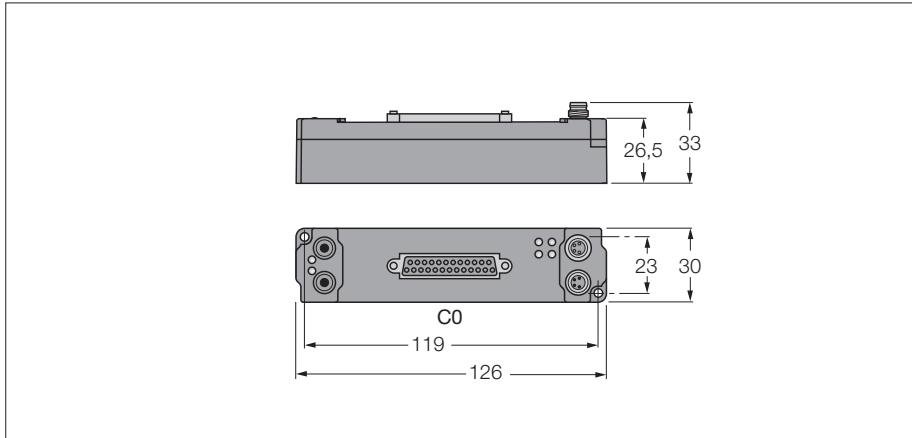

F118 - Output M12 x 1

piconet® extension module for IP link

8 digital outputs 0.5 A (Σ 4 A)

- 16 digital outputs 0.5 A
- Parameterisable functions
- Supported via I/O-ASSISTANT
- Direct connection to the fieldbus
- Fibre-glass reinforced PA6 housing
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

Operating / load voltage

20...29 VDC

Operating current

≤ 25 mA

Fibre-optic length

≤ 15 m

Outputs

Number of channels	16 digital outputs acc. to EN 61131-2
Output voltage	20...29 VDC from load voltage
Output current per channel	0.5 A (Σ 4 A), short-circuit proof
Load type	resistive, inductive, lamp load
Switching frequency	≤ 500 Hz
Simultaneity factor	0.5

Operating temperature

0 to 55 °C

	Input	Byte n+1	Is used by the physically following bit-oriented extension module connected via the IP Link.				C0P8	C0P7	C0P6
	Output	Byte n+1					C1P8	C1P7	C1P6
PROFIBUS-DP coupling module: "Byte alignment" is disabled (default) and the previous byte has been completely used or "byte alignment" is activated. DeviceNet™, CANopen, INTERBUS, Ethernet coupling module: The previous byte has been completely used. Up to 8 bit input data and output data each are mapped.	Input	Byte n	C0P8	C0P7	C0P6	C0P5	C0P4	C0P3	C0P2
	Output	Byte n	C1P8	C1P7	C1P6	C1P5	C1P4	C1P3	C1P2
			C... = Connector no. - P... = Pin no.						

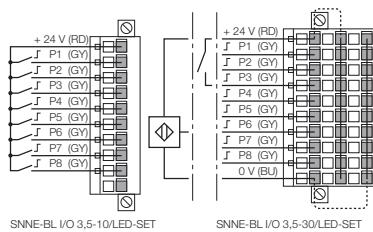

piconet® extension module for IP link
8 digital pnp inputs filter 3 ms
8 digital outputs 0.5 A

Device types

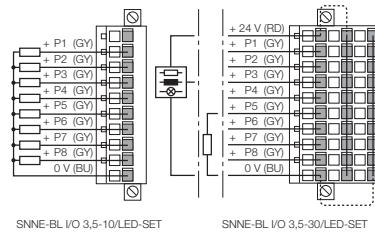

Dimensions	Type	Connection
	6824473 SNNE-0808D-0003	F122, F123, F081

Connection

F122 - Input IP20 terminal

F123 - Output IP20 terminal

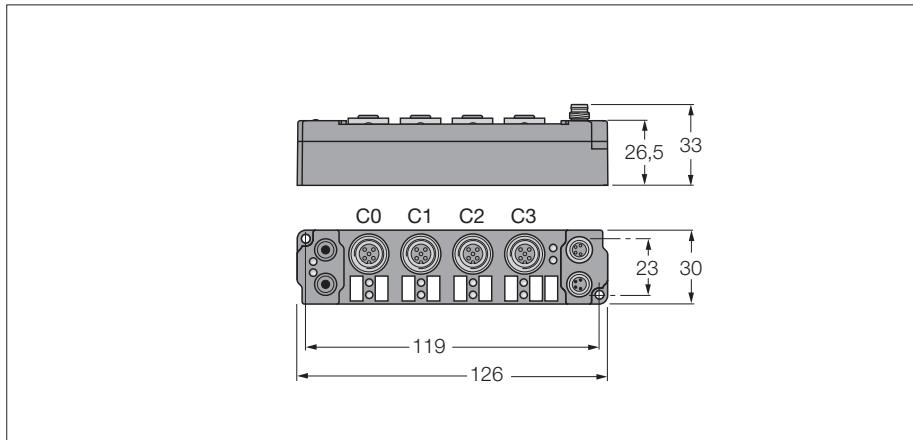

F081 - Voltage supply M8 x 1

$$I_{B\max} = I_{L\max} = 4 \text{ A}$$

piconet® extension module for IP link

4 analogue inputs ± 10 V

- 4 analogue inputs ± 10 V
- Parameterisable functions
- Supported via I/O-ASSISTANT
- Direct connection to the fieldbus
- Fibre-glass reinforced PA6 housing
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

Operating / load voltage	20...29 VDC
Operating current	≤ 55 mA
Fibre-optic length	≤ 15 m
Inputs	
Number of channels	4 analogue inputs ± 10 V
Input resistance	$> 100 \Omega$
Electrical isolation	channels to operational voltage
Common mode voltage	
Measuring current	max. 35 V
Conversion time	0.5 mA
Relative measuring error	250 ms
Input filter	$< + - 0.3\%$ of full scale
Sensor supply	variable from load voltage
Operating temperature	0 to 55 °C

Fieldbus (e. g. PROFIBUS-DP, DeviceNet™ ...)

piconet® IP-Link

piconet® – Stand-alone modules for PROFIBUS-DP

piconet® stand-alone modules connect each *piconet*® I/O module directly to the fieldbus. There are versions with one fieldbus connection (separate tee needed) and with two bus connections (tee piece integrated).

The programme comprises modules for the whole spectrum of I/O signals – from standardised digital industrial signals to analogue inputs and outputs. The family is complemented by a choice of technology modules, such as a pulse width modulator, an up/down counter, an incremental encoder as well as various serial interfaces.

The robust IP67 housing is extremely compact, fully encapsulated and equipped throughout with metal connectors. As a result, the *piconet*® modules are perfectly suited for application in harsh industrial environments as well as serial and special machine engineering.

Operating and load voltage are – as with all *piconet*® module types – fed separately. Alongside the “Power” LED, each channel is assigned a “Status” LED for switching status indications.

3

piconet® – Stand-alone modules – general technical data

Adjustment

Fieldbus address	1...99 (decimal), adjustable via coded rotary switches
Transmission rate	automatic

LED indications (module-specific)

Fieldbus	fieldbus specific (s. manual)
Operating voltage U_B	green: operational
Load voltage U_L	green: operational

Connections

Fieldbus	brass, nickel-plated
Power supply	depending on the type of fieldbus system used
Inputs/outputs	(1) M8 male connectors, 4-pole, (1) M8 female connectors, 4-pole
Service interface	selectable: (8) M8 female connectors, 3-pole, or (4) M12 female connectors, 5-pole
	(1) terminal strip, 5-pole (for I/O-ASSISTANT)

Housing

Material	compact, fully encapsulated plastic housing
Dimensions – device with 1 fieldbus connection	PA6 (Polyamid)
Dimensions – device with 2 fieldbus connections	175 x 30 x 26.5 mm (H x W x D)
Mounting	210 x 30 x 26.5 mm (H x W x D)
Mounting position	via 2 through-holes, Ø 3 mm
Operating temperature (range)	any
Operating temperature (storage)	0 °C to +55 °C (+32 °F to +131 °F)
Degree of protection (IEC 60529/EN 60529)	-25 °C to +85 °C (-13 °F to +185 °F)
Vibration and shock testing	IP65, IP66, IP67
Electromagnetic capability (EMC)	according to IEC 68, part 2-6 / IEC 68, part 2-27
Weight	according to EN 50081-2/EN 50082-2
Approvals	approx. 250–280 g (depending on type)

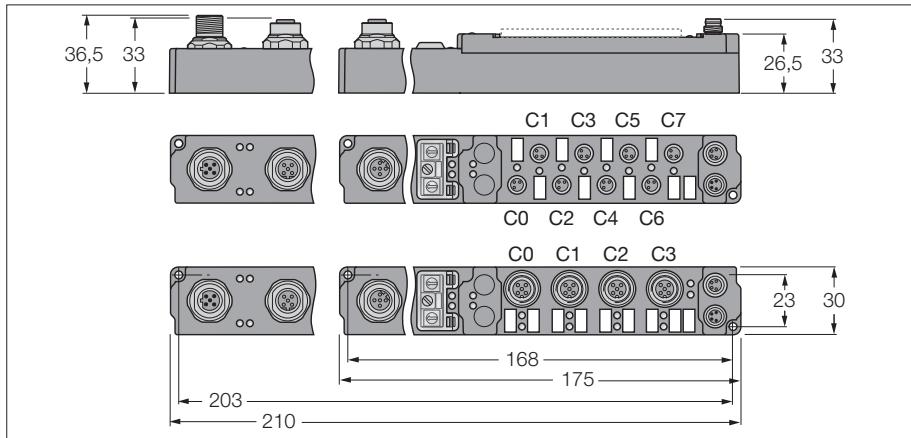

Please note: further technical information is contained in the *piconet*® user manuals.

Additionally available to PROFIBUS-DP are stand-alone modules for DeviceNet™ and CANopen. For more detailed information concerning the availability of correspondent signal forms, please contact the Hans Turck GmbH & Co KG directly.

piconet® stand-alone module for PROFIBUS-DP

8 digital pnp inputs filter 3 ms

- 8 digital pnp inputs
- Input filter 3 ms
- Configuration interface
- Parameterisable functions
- Supported via I/O-ASSISTANT
- Direct connection to the fieldbus
- Fibre-glass reinforced PA6 housing
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

Operating / load voltage	20...29 VDC
Operating current	≤ 85 mA
Fieldbus transmission rate	9.6 kbps up to 12 Mbps
Fieldbus addressing	0 to 99
Service interface	parameterisation via I/O-ASSISTANT
Electrical isolation	fieldbus to operational voltage
Inputs	
Number of channels	8 digital inputs acc. to EN 61131-2
Input voltage	20...29 VDC via operating voltage
Supply current	< 500 mA per channel, short-circuit proof
Low level signal voltage	-3...5 VDC (EN 61131-2, type 2)
High level signal voltage	11...30 VDC (EN 61131-2, type 2)
Input delay	3 ms
Max. input current	6 mA
Operating temperature	0 to 55 °C

8 digital pnp inputs filter 3 ms

8 digital outputs 0.5 A

- 8 digital pnp inputs
- 8 digital outputs 0.5 A
- Input filter 3 ms
- Configuration interface
- Parameterisable functions
- Supported via I/O-ASSISTANT
- Direct connection to the fieldbus
- Fibre-glass reinforced PA6 housing
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

Operating / load voltage	20...29 VDC Operating current ≤ 90 mA
Fieldbus transmission rate	9.6 kbps up to 12 Mbps
Fieldbus addressing	0 to 99
Service interface	parameterisation via I/O-ASSISTANT
Electrical isolation	fieldbus to operational voltage
Inputs	
Number of channels	8 digital inputs acc. to EN 61131-2
Input voltage	20...29 VDC via operating voltage
Supply current	< 500 mA per channel, short-circuit proof
Low level signal voltage	-3...5 VDC (EN 61131-2, type 2)
High level signal voltage	11...30 VDC (EN 61131-2, type 2)
Input delay	3 ms
Max. input current	6 mA
Outputs	
Number of channels	8 digital outputs acc. to EN 61131-2
Output voltage	20...29 VDC from load voltage
Output current per channel	0.5 A, short-circuit proof
Load type	resistive, inductive, lamp load
Switching frequency	≤ 500 Hz
Simultaneity factor	1
Operating temperature	0 to 55 °C

Compact fieldbus I/O modules in IP67 and IP20

Compact fieldbus modules

These rugged modules are ideal for use in harsh industrial environments (both electrical and mechanical).

No matter if PROFIBUS-DP, DeviceNet™, Modbus TCP, EtherNet/IP or PROFINET protocols are required, all compact fieldbus I/O modules are designed with the same mechanical concept and have the following characteristics:

- Fibre-glass reinforced plastic housing
- Fully encapsulated module electronics
- Standard connection technology
- Metal round connector
- Vibration and shock tested
- Degree of protection IP67

- **FLDP – PROFIBUS-DP modules**
- Module-specific diagnostics
- Up to 32 digital channels

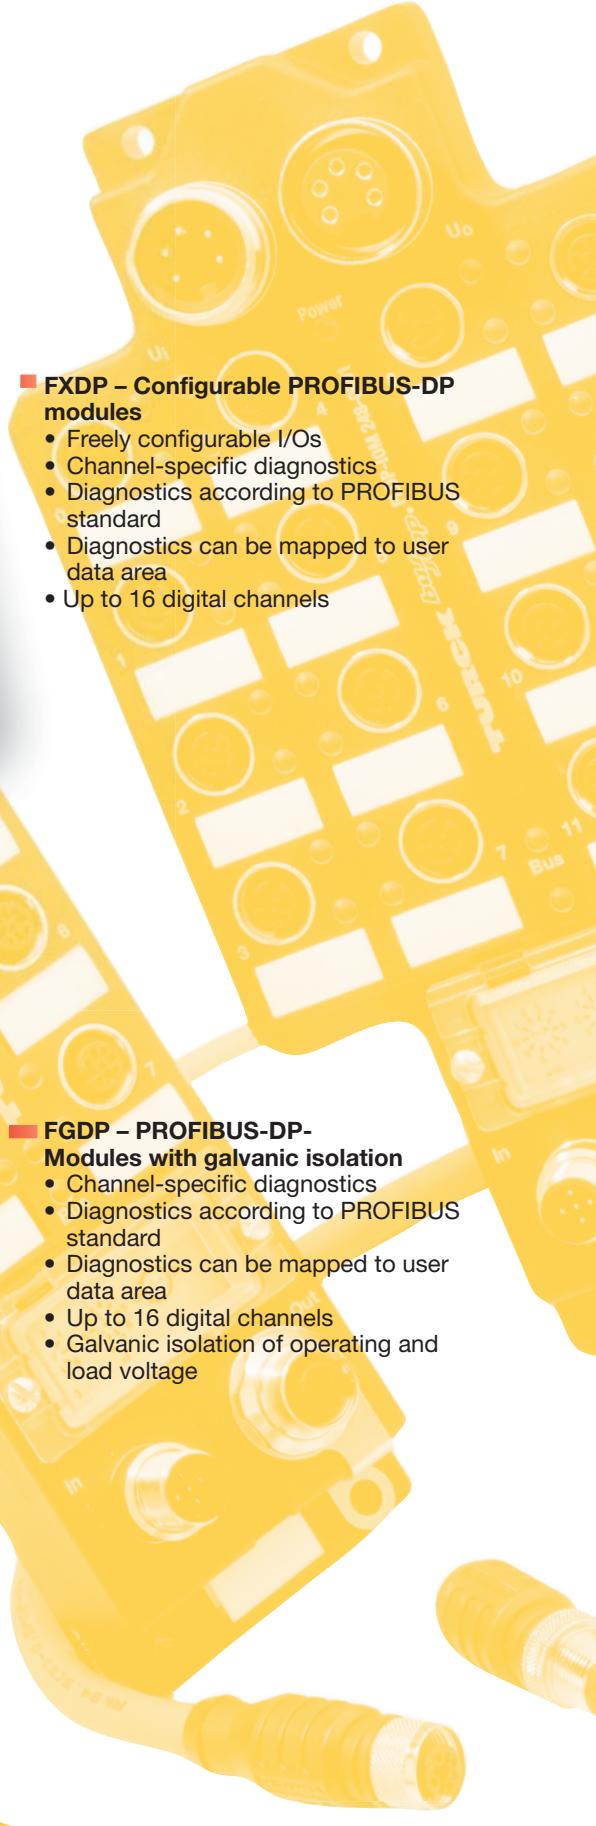

- **FXDP – Configurable PROFIBUS-DP modules**

- Freely configurable I/Os
- Channel-specific diagnostics
- Diagnostics according to PROFIBUS standard
- Diagnostics can be mapped to user data area
- Up to 16 digital channels

- **FGDP – PROFIBUS-DP-Modules with galvanic isolation**

- Channel-specific diagnostics
- Diagnostics according to PROFIBUS standard
- Diagnostics can be mapped to user data area
- Up to 16 digital channels
- Galvanic isolation of operating and load voltage

DeviceNet™

Modbus TCP

**FDNL – DeviceNet™ modules**

- Channel-specific diagnostics (LX series) or module-specific diagnostics (SE series)
- Up to 16 digital channels
- Power supply via DeviceNet™

**FDNP – DeviceNet™ module**

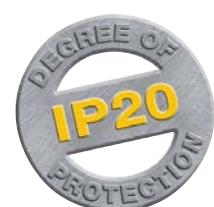

- Channel-specific diagnostics (LX series) or module-specific diagnostics (SE series)
- Up to 16 digital channels
- Separate power supply for the outputs

**FDN/FDP – IP20 modules**

- Extremely compact for mounting in tight spaces
- PROFIBUS-DP or DeviceNet™
- Up to 16 digital channels

**FXEN – Configurable Ethernet modules**

- Integrated Ethernet switch
- Freely configurable I/Os
- Channel-specific diagnostics
- Up to 16 digital channels

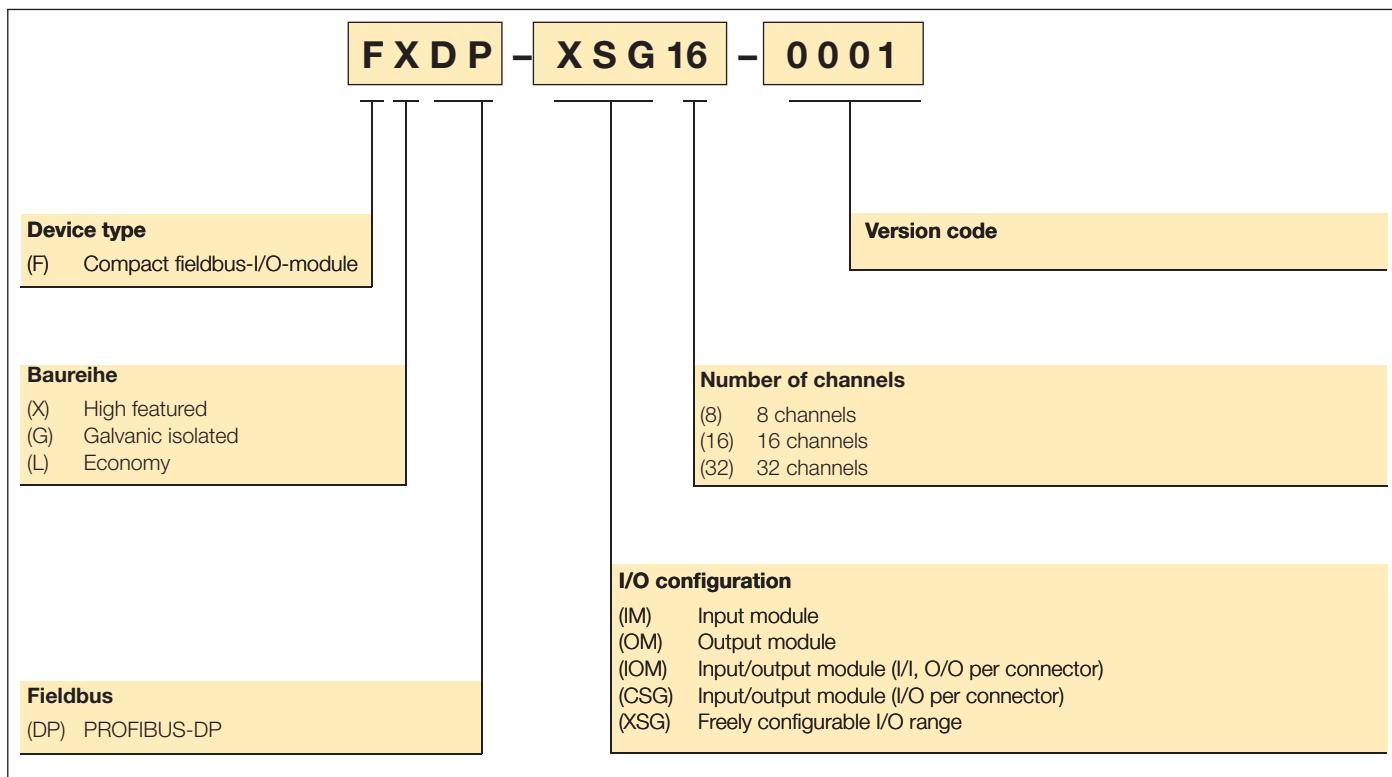

**Accessories**

- Cordsets – premoulded cables for bus, power supply and I/Os
- T and Y pieces Terminating resistors
- Flange connectors
- Feed-through receptacles
- Passive junction boxes

Compact fieldbus I/O modules in IP67 for PROFIBUS-DP

TURCK

Industrial
Automation

Series FXDP – general information

The compact FXDP series fieldbus I/O modules allow direct connection of up to 16 inputs/outputs to a PROFIBUS-DP network.

The I/O modules offer channel-specific short-circuit diagnostics of the outputs and module specific short-circuit diagnostics of the inputs. The diagnostics can also be mapped to the user data area.

The XSG version also allows the I/O area to be freely configured.

Operating and load voltage are fed separately. If the load supply is switched off, the module electronics and all inputs continue operation when the outputs are turned off. In this case, the load voltage diagnostics can also be deactivated.

The I/O modules support transmission rates of 12 Mbps. The PROFIBUS-DP connection is implemented via 5-pole, reverse-keyed M12 x 1 connectors. The module is powered via a 7/8" round connector and can be fed through via a second 7/8" round connector.

The I/O level is equipped throughout with metal M12 connectors.

Glass-fibre reinforced plastic housings and the fully encapsulated module electronics guarantee protection degree IP67. The I/O modules are therefore particularly suited for use in harsh industrial environments.

General technical data

4

Characteristics

Extended diagnostics, connector-specific short-circuit diagnostics of the sensor supply voltage, channel-specific short-circuit diagnostics of the outputs, Complete diagnostic information according to standards via the PROFIBUS-DP, channel-specific display of status and errors via LEDs, diagnostics can be mapped to the user data area (diagnostics inputs).

Compact fieldbus I/O modules in IP67 for PROFIBUS-DP

TURCK

Industrial
Automation

Series FGDP – general information

The compact FGDP series fieldbus I/O modules allow direct connection of up to 16 inputs/outputs to a PROFIBUS-DP network. The I/O modules offer channel-specific short-circuit diagnostics of the outputs and module specific short-circuit diagnostics of the inputs. The diagnostics can also be mapped to the user data area.

The operating and load supply are fed separately to the module and are galvanically isolated from each other. If the load supply is switched off, the module electronics and all inputs continue operation when the outputs are turned off. In this case, the load voltage diagnostics can also be deactivated.

The I/O modules support transmission rates of 12 Mbps. The PROFIBUS-DP connection is implemented via 5-pole, reverse-keyed M12 x 1 connectors. The module is powered via a 7/8" round connector and can be fed through via a second 7/8" round connector. The I/O level is equipped throughout with metal M12 connectors.

Glass-fibre reinforced plastic housings and the fully encapsulated module electronics guarantee protection degree IP67. The I/O modules are therefore particularly suited for use in harsh industrial environments.

General technical data

4

Characteristics

Extended diagnostics, connector-specific short-circuit diagnostics of the sensor supply voltage, Channel specific short-circuit monitoring of the outputs, Complete diagnostic information according to standards via the PROFIBUS-DP, Channel-specific display of errors and status indications via LEDs, diagnostics can be mapped to user data area (diagnostic inputs), Galvanic isolation of operating and load voltage.

Compact fieldbus I/O modules in IP67 for PROFIBUS-DP

Series FLDP – general information

The compact fieldbus I/O modules of the FLDP series allow direct connection of up to 32 inputs/outputs to a PROFIBUS-DP network. The I/O modules offer module-specific short-circuit diagnostics of the inputs and outputs.

Operating and load voltage are fed separately. If the load supply is switched off, the module electronics and all inputs continue operation when the outputs are turned off. In this case, the load voltage diagnostics can also be deactivated. The I/O modules support transmission rates of 12 Mbps.

The PROFIBUS-DP connection is implemented via 5-pole, reverse-keyed M12 x 1 round connectors. The module is powered via a 7/8" round connector and can be fed through via a second 7/8" round connector. The I/O level is equipped throughout with M12 metal round connectors.

Glass-fibre reinforced plastic housings and the fully encapsulated module electronics guarantee protection degree IP67. The I/O modules are therefore particularly suited for use in harsh industrial environments.

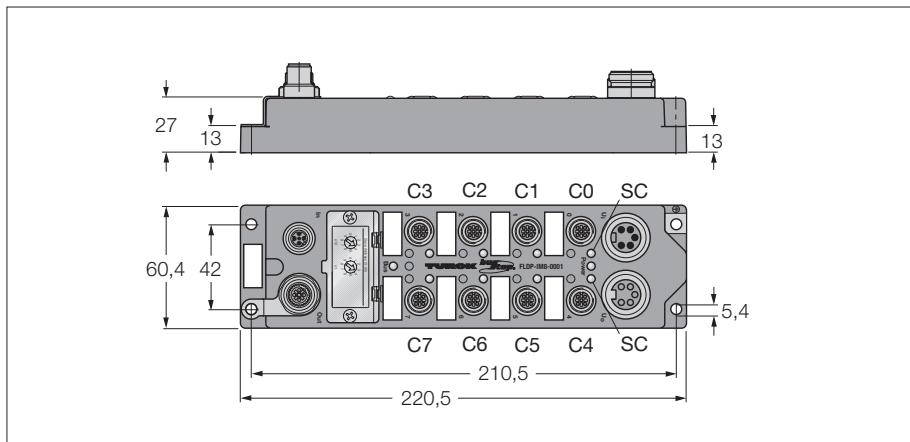

General technical data

Characteristics	Load voltage diagnostics can be disabled via rotary switch, common short-circuit diagnostics
Settings	1...99 (decimal) adjustable via two coded rotary switches can be disabled via coded rotary switch (modules with digital outputs only) 9.6 kbps up to 12 Mbps, automatic
LEDs	green: communication, red: no communication green: operational, off: UB < 18 VDC red: UL < 18 V (modules with digital outputs) green: ON green: ON red: short-circuit at one input
Connections	brass, nickel-plated M12 x 1 connectors, reverse-keyed 7/8" connector, 5-pole or female M12 x 1 connectors; 5-pole 2 x 19-pole Burndy connectors
Housing material	PA6-GF30, glass-fibre reinforced plastic housing with encapsulated electronics and nickel-plated brass connectors
Mounting	4 through-holes, Ø 5.4 mm
Degree of protection (IEC 60529/EN 60529)	IP67 (NEMA 1, 3, 4, 12, 13)
Vibration and shock tested	according to EN 60068-2-6, 2-27
Temperature range	0 °C to +55 °C (+32 °F to +131 °F)
Dimensions	
– Housings for modules with 8, 12 and 16 channels	220.5 x 62.4 x 27 mm (H x W x D)
– Housing for modules with 32 channels	220.5 x 115 x 27 mm (H x W x D)
Approvals	CE, UL LISTED

Operating / load voltage	18...30 VDC < 150 mA
Operating current	
Fieldbus transmission rate	9.6 kbps up to 12 Mbps 1...126 (decimal) via three coded rotary switches
Fieldbus addressing	
Electrical isolation	to operating and load voltage
Outputs	
Number of channels	(16) DC actuators
Output voltage	18...30 VDC from load voltage
Output current per channel	0.5 A, short-circuit proof
Load type	resistive, inductive, lamp load
Switching frequency	≤ 250 Hz
Simultaneity factor	1
Electrical isolation	galvanic isolation against the bus
Operating temperature	0 to 55 °C

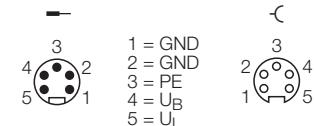

Fieldbus M12 x 1

Output M12 x 1

Power supply 7/8"

Compact fieldbus I/O modules in IP67 for DeviceNet™

TURCK

Industrial
Automation

Series FDNL – General information

The compact FDNL series fieldbus I/O modules allow direct connection of up to 16 digital inputs/outputs to a DeviceNet™ network.

Depending on type, the I/O modules offer channel (LX series) and module (SE series) specific wire-break/short-circuit diagnostics.

The I/O modules support transmission rates of 500 Kbit/s as well as all types of DeviceNet™ communication modes, incl. "Poll", "Strobe", "Cyclic", "Change of State (COS)" and "UCMM".

The DeviceNet™ connection is implemented via 5-pole, 7/8" connectors. Both the module electronics and also the inputs and outputs are supplied via DeviceNet™. The I/O level is equipped throughout with M12 metal round connectors.

Glass-fibre reinforced plastic housings and the fully encapsulated module electronics guarantee protection degree IP67. The I/O modules are therefore particularly suited for use in harsh industrial environments.

General technical data

4

Characteristics

- LX series: Channel-specific short-circuit and wire-break diagnostics of inputs and outputs
- SE series: Module-specific short-circuit diagnostics of inputs and outputs

Settings

DeviceNet™ address	0...63 (decimal) adjustable via two coded rotary switches
Transmission rate	automatic

LEDs

Inputs	green: ON
Outputs	green: ON
wire-break and short-circuit, Only LX series (dual colour LED)	yellow: wire-break, red: short-circuit
Module status (dual colour LED)	green: operational, green flashing: detection of the baud rate, red flashing: I/O short-circuit
Network status LED (dual colour LED)	green: communication, green flashing: ready to establish communication red: communication failed, red flashing: communication time-out Time-out

Connections

DeviceNet™	Nickel-plated brass
Inputs/outputs	7/8" connector, 5-pole; IN and OUT female M12 x 1 connectors; 5-pole

Housing

Mounting	Housing PA6-GF30, glass-fibre reinforced plastic housing with encapsulated electronics
Degree of protection	and nickel-plated brass connectors via 4 through-holes, Ø 5.4mm
Temperature range	IP67 (NEMA 1, 3, 4, 12, 13)
- LX series	-25 °C to +70 °C (-13 °F to 158 °F)
- SE series	-40 °C to 70 °C (-40 °F to 158 °F)
Dimensions	197 x 60 x 27 mm (H x W x D)

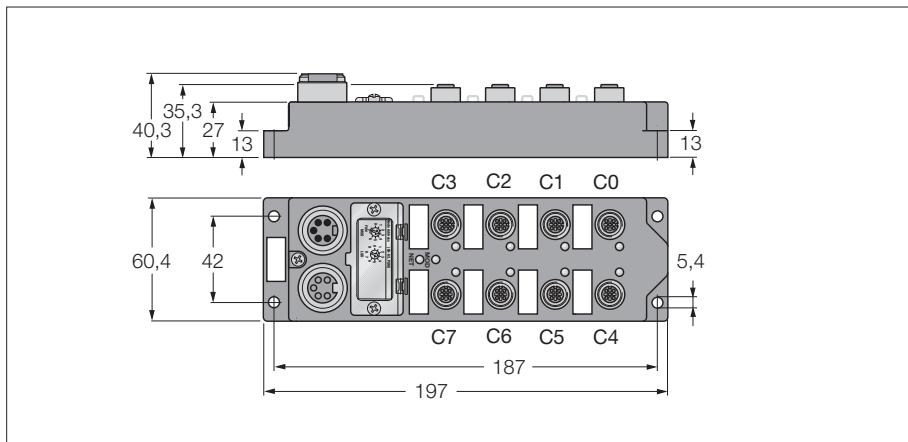

Approvals

CE, UL, FM APPROVED, CSA US

Fieldbus I/O module for DeviceNet™

8 digital pnp inputs

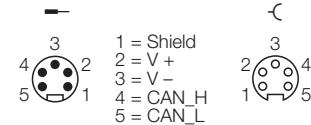

FDNL-S0800-T

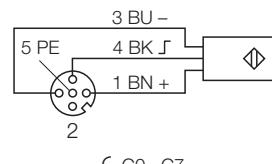

- 8 digital pnp inputs
- Short-circuit monitoring
- Module-related diagnostics
- One channel per connector
- Fibre-glass reinforced PA6 housing
- Vibration and shock-resistant
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

Type	FDNL-S0800-T
Ident-No.	6603336
Operating / load voltage	11...26 VDC
Operating current	< 50 mA
Fieldbus transmission rate	125 kbps to 500 kbps
Fieldbus addressing	0...63 (decimal) via coded rotary switches
Electrical isolation	to operating and load voltage
Inputs	
Number of channels	(8) 3-wire pnp sensors
Input voltage	13...26 VDC
Input delay	2.5 ms
Switching frequency	≤ 100 Hz
Max. input current	6 mA
Electrical isolation	galvanic isolation against the bus
Sensor supply	bus connection
Operating temperature	- 40... +70 °C

Fieldbus 7/8"

Input M12 x 1

Compact fieldbus I/O modules in IP67 for DeviceNet™

TURCK

Industrial
Automation

Series FDNP – general information

The compact FDNP series fieldbus I/O modules allow direct connection of up to 16 digital inputs/outputs to a DeviceNet™ network. Depending on type, the I/O modules offer channel (LX series) and module (SE series) specific wire-break/short-circuit diagnostics.

The I/O modules support transmission rates of 500 Kbit/s as well as all types of DeviceNet™ communication modes, incl. "Poll", "Strobe", "Cyclic", "Change of State (COS)" and "UCMM".

The DeviceNet™ connection is implemented via 5-pole, 7/8" round connectors. The module electronics and the inputs are supplied via DeviceNet™; the auxiliary voltage for the outputs is also fed via a 7/8" round connector and can be fed through via a second 7/8" round connector. The I/O level is equipped throughout with metal M12 connectors.

Glass-fibre reinforced plastic housings and the fully encapsulated module electronics guarantee protection degree IP67. The I/O modules are therefore particularly suited for use in harsh industrial environments.

General technical data

4

Characteristics

- LX series:
Channel-specific short-circuit and wire-break diagnostics of inputs and outputs
- SE series:
Module-specific short-circuit diagnostics of inputs and outputs

Settings

- | | |
|--------------------|---|
| DeviceNet™ address | 0...63 (decimal) adjustable via two coded rotary switches |
| Transmission rate | automatic |

LEDs

- | | |
|---|---|
| Inputs | green: ON |
| Outputs | green: ON |
| wire-break and short-circuit,
Only LX series (dual colour LED) | yellow: wire-break, red: short-circuit |
| Module status (dual colour LED) | green: operational, green flashing: detection of the baud rate, red flashing: I/O short-circuit |
| Network status LED (dual colour LED) | green: communication, green flashing: ready to establish communication
red: communication failed, red flashing: communication time-out |

Connections

- | | |
|----------------|---|
| DeviceNet™ | nickel-plated brass |
| aux power | 7/8" connector, 5-pole; IN and OUT |
| Inputs/outputs | 7/8" connector, 4-pole; IN and OUT
female M12 x 1 connectors; 5-pole |

Housing

- | | |
|----------------------|--|
| Mounting | Housing PA6-GF30, glass-fibre reinforced plastic housing with encapsulated electronics |
| Degree of protection | and nickel-plated brass connectors |
| Temperature range | via 4 through-holes, Ø 5.4mm |
| - LX series | IP67 (NEMA 1, 3, 4, 12, 13) |
| - SE series | -25 °C to +70 °C (-13 °F to 158 °F) |
| Dimensions | -40 °C to 70 °C (-40 °F to 158 °F) |
| | 220 x 60 x 27 mm (H x W x D) |

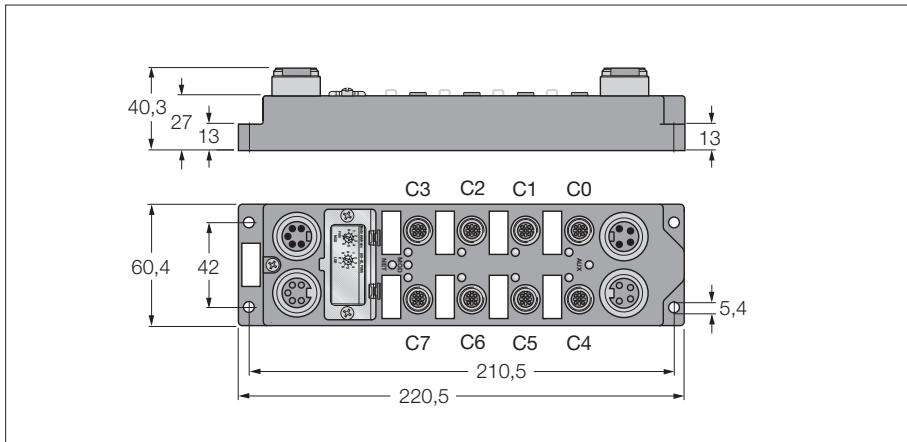

Approvals

CE, UL, FM APPROVED, CSA US

Fieldbus I/O module for DeviceNet™

8 digital outputs 0.5 A

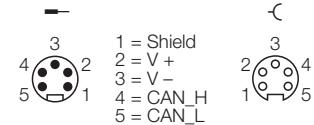

FDNP-S0008G-TT

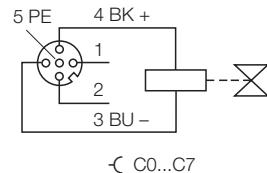

- 8 digital outputs 0.5 A
- Output diagnostics per channel
- One channel per connector
- Separate actuator power supply
- Fibre-glass reinforced PA6 housing
- Vibration and shock-resistant
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

Type	FDNP-S0008G-TT
Ident-No.	6603673
Operating / load voltage	11...26 VDC
Operating current	< 140 mA
Fieldbus transmission rate	125 kbps to 500 kbps
Fieldbus addressing	0...63 (decimal) via coded rotary switches
Electrical isolation	to operating and load voltage
Outputs	
Number of channels	(8) DC actuators
Output voltage	24 VDC
Output current per channel	0.5 A, short-circuit proof
Load type	resistive, inductive, lamp load
Switching frequency	≤ 100 Hz
Simultaneity factor	1
Electrical isolation	galvanic isolation against the bus
Sensor supply	bus connection
Actuator power supply	separate (Aux)
Operating temperature	- 40... +70 °C

Operating / load voltage	11...26 VDC
Operating current	< 100 mA
Fieldbus transmission rate	125 kbps to 500 kbps
Fieldbus addressing	0...63 (decimal) via coded rotary switches
Electrical isolation	to operating and load voltage
Inputs	
Number of channels	(8) 3-wire pnp sensors
Input voltage	13...26 VDC
Input delay	2.5 ms
Switching frequency	≤ 100 Hz
Max. input current	6 mA
Electrical isolation	galvanic isolation against the bus
Outputs	
Number of channels	(8) DC actuators
Output voltage	24 VDC
Output current per channel	2.0 A, short-circuit proof
Load type	resistive, inductive, lamp load
Switching frequency	≤ 100 Hz
Simultaneity factor	0.5
Electrical isolation	galvanic isolation against the bus
Sensor supply	bus connection
Actuator power supply	separate (Aux)
Operating temperature	- 25... +70 °C

Compact fieldbus I/O modules in IP67 for Ethernet

TURCK

Industrial
Automation

Series FXEN – general information

The compact FXEN fieldbus I/O modules allow direct connection of up to 16 inputs/outputs to an Ethernet network. The Ethernet application layer Modbus TCP, EtherNet/IP and PROFINET can be processed by a wide range of product variants. The I/O modules offer channel-specific diagnostics of the outputs and a module slot specific short-circuit diagnostics of the inputs, as well as supporting transmission rates of 10/100 Mbps. The Ethernet connection is implemented with a 4-pole, D-coded M12 x 1-round connector.

The integrated Ethernet switch allows the creation of a linear topology with the I/O modules. The module is powered via a 7/8" round connector and can be fed through via a second 7/8" round connector. The I/O level is equipped throughout with M12 metal round connectors.

Glass-fibre reinforced plastic housings and the fully encapsulated module electronics guarantee protection degree IP67. The I/O modules are therefore particularly suited for use in harsh industrial environments.

General technical data

Application layer

BOOTP, DHCP, SNMP
MODBUS TCP
EtherNet/IP
PROFINET

Standard IT protocols and services
I/O data exchange Modbus TCP (FXEN-...-MB)
I/O data exchange EtherNet/IP (FXEN-...-IP)
I/O data exchange PROFINet (FXEN-...-PN)

Settings

BOOTP
DHCP
PGM
PGM-DHCP
PROFINet
Static Rotary

192.168.1.000
Transmission rate

Dynamic IP address assignment via BOOTP server
Dynamic IP address assignment via DHCP server
Manual address assignment via addressing tool (e.g. I/O-ASSISTANT)
Specific addressing mode for EtherNet/IP
Specific addressing mode for PROFINET

The last three figures of the IP address are set with the three coded rotary switches.
The other values of the IP address are default settings.
The three rotary coding switches are each set to 0 (default IP address 192.168.1.254)
10 / 100 Mbps

Fieldbus I/O module for Ethernet Modbus TCP

16 digital pnp inputs

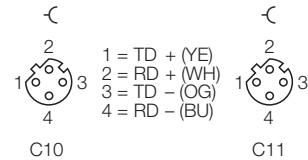

FXEN-IM16-0001-MB

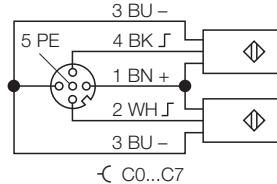

- 16 digital pnp inputs
- For Modbus TCP applications
- Integrated Ethernet switch
- Supported via FDT/DTM
- Input diagnostics per slot
- Two channels per connector
- Fibre-glass reinforced PA6 housing
- Vibration and shock-resistant
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

Type	FXEN-IM16-0001-MB
Ident-No.	6825411
Operating / load voltage	18...30 VDC
Operating current	< 75 mA
Transmission rate Ethernet	10 Mbps / 100 Mbps
Addressing modes Ethernet:	Static IP, BOOTP, DHCP, PGM, PGM-DHCP
Electrical isolation	to operating and load voltage
Inputs	
Number of channels	(16) 3-wire pnp sensors
Input voltage	18...30 VDC via operating voltage
Supply current	< 120 mA per channel, short-circuit proof
Switching threshold	2 mA / 4 mA
Input delay	2.5 ms
Max. input current	6 mA
Electrical isolation	galvanic isolation against Ethernet
Operating temperature	0 to 55 °C

Compact fieldbus I/O-modules in IP20

Type code

Series FDN/FDP with 16 channels

Series FDN with 8 channels

- Extremely compact for restricted space conditions
- High flexibility through freely configurable I/Os
- Different potential groups for the I/O range
- Inputs: PNP, short-circuit protected
- Outputs: 0.5 A and 1.8 A (FDN20-16XSG), short-circuit protected
- Extended temperature range
DeviceNet™: -40...+70 °C
PROFIBUS-DP 0...+55 °C

Small housing style, flexible and inexpensive

The new compact IP20 modules are designed for use where conventional I/O bus terminal systems are unsuitable due to their large dimensions.

In applications with a small number of signals, they have the edge on modular systems.

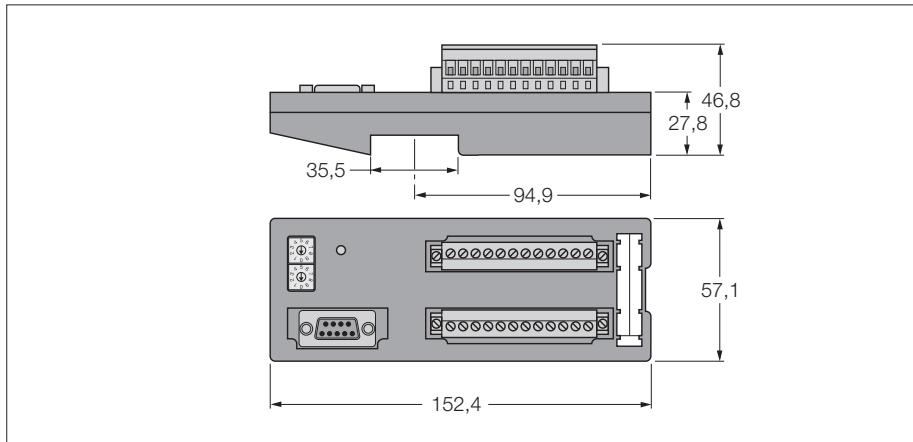

Low space requirements as well as simple handling make work easy for the design engineer and ensures fast setup.

Depending on type, the modules offer 8 or 16 digital channels. If necessary these can be configured as inputs or outputs, with the I/O supply circuits arranged in three galvanically isolated levels. In this way the modules offer optimum flexibility in an extremely compact design.

Fieldbus I/O module for PROFIBUS-DP

16 configurable channels

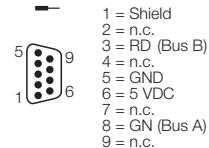

FDP20-16XSG

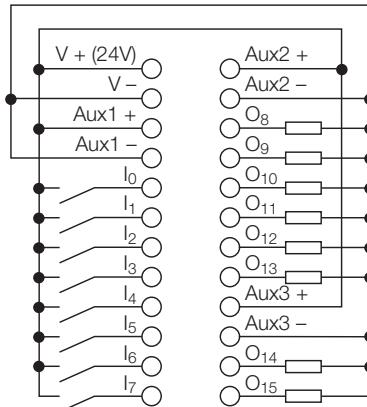

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- 3 I/O power supply groups each galvanically isolated
- 16 configurable channels, DI or DO
- 24 VDC, pnp
- Output current: 0.5 A

Type	FDP20-16XSG
Ident-No.	6611466
Number of channels	16
Electrical isolation	I/Os to PROFIBUS
Internal power consumption	< 75 mA plus I/O supply
Admissible range field supply	18...30VDC
Electrical isolation	I/Os to PROFIBUS
Fieldbus transmission rate	9.6 kbps up to 12 Mbps
Fieldbus addressing range	1...99
Fieldbus addressing	2 decimal coded rotary switches
Inputs	
Input voltage	18...30VDC
Low level signal voltage	< 4 V
High level signal voltage	8...24 V
Low level signal current	< 0.5 mA
High level signal current	1...3.4 mA
Input delay	2,5 ms
Max. input current	700 mA
Outputs	
Output voltage	18...30 VDC, short-circuit proof
Output current per channel	0.5A (from Aux)
Switching frequency	≤ 100 Hz
Operating temperature	0°C...55°C

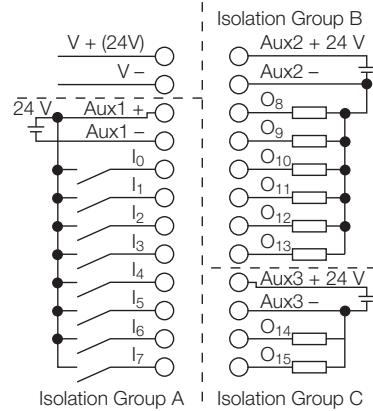

Fieldbus

Wiring diagram

Fieldbus I/O module for PROFIBUS-DP

16 digital inputs

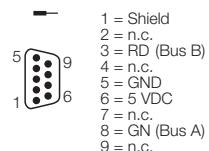

FDP20-16S

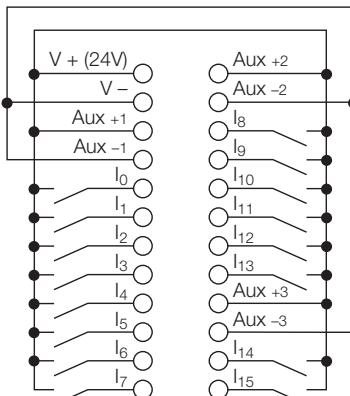

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- 3 I/O power supply groups each galvanically isolated
- 16 digital inputs, 24 VDC
- pnp

Type	FDP20-16S
Ident-No.	6611465
Number of channels	16
Electrical isolation	I/Os to PROFIBUS
Internal power consumption	< 75 mA plus I/O supply
Admissible range field supply	18...30VDC
Electrical isolation	I/Os to PROFIBUS
Fieldbus transmission rate	9.6 kbps up to 12 Mbps
Fieldbus addressing range	1...99
Fieldbus addressing	2 decimal coded rotary switches
Inputs	
Input voltage	18...30VDC
Low level signal voltage	< 4 V
High level signal voltage	8...24 V
Low level signal current	< 0.5 mA
High level signal current	1...3.4 mA
Input delay	2.5 ms
Max. input current	700 mA
Operating temperature	0°C...55°C

Fieldbus I/O module for DeviceNet

4 digital inputs, 4 configurable channels

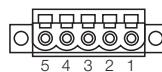

FDN20-4S-4XSG-E

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- M12 flange connector for convenient mounting and connection to DeviceNet
- 4 digital inputs
- 4 configurable channels, DI or DO
- 24 VDC
- pnp
- Output current: 0.5 A

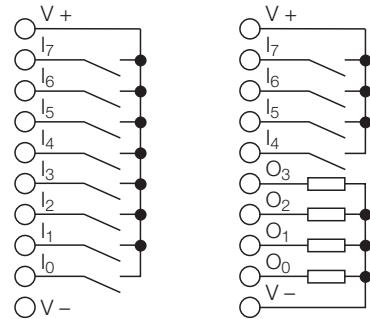

Type	FDN20-4S-4XSG-E
Ident-No.	6611343
Number of channels	8
Internal power consumption	< 50 mA plus I/O supply
Voltage supply via DeviceNet	24 VDC
Admissible range field supply	11...26 VDC
Fieldbus transmission rate	125 kbps to 500 kbps
Fieldbus addressing range	0...63
Fieldbus addressing	2 decimal coded rotary switches
Inputs	
Input voltage	11...26 VDC
Low level signal voltage	< 4 V
High level signal voltage	8...24 V
Low level signal current	< 0.5 mA
High level signal current	1...3.4 mA
Input delay	2.5 ms
Max. input current	total: 700 mA
Outputs	
Output voltage	18...26 VDC, short-circuit proof
Output current per channel	0.5 A (from DeviceNet)
Switching frequency	≤ 100 Hz
Operating temperature	-40°C...70°C

Fieldbus I/O module for DeviceNet

4 digital inputs, 4 configurable channels

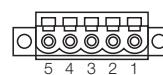

FDN20-4S-4XSG

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- 4 digital inputs
- 4 configurable channels, DI or DO
- 24 VDC
- pnp
- Output current: 0.5 A

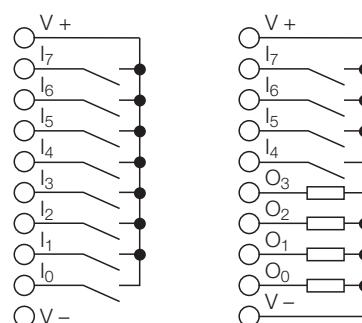

Type	FDN20-4S-4XSG
Ident-No.	6611359
Number of channels	8
Internal power consumption	< 50 mA plus I/O supply
Voltage supply via DeviceNet	24 VDC
Admissible range field supply	11...26 VDC
Fieldbus transmission rate	125 kbps to 500 kbps
Fieldbus addressing range	0...63
Fieldbus addressing	2 decimal coded rotary switches
Inputs	
Input voltage	11...26 VDC
Low level signal voltage	< 4 V
High level signal voltage	8...24 V
Low level signal current	< 0.5 mA
High level signal current	1...3.4 mA
Input delay	2.5 ms
Max. input current	total: 700 mA
Outputs	
Output voltage	18...26 VDC, short-circuit proof
Output current per channel	0.5 A (from DeviceNet)
Switching frequency	≤ 100 Hz
Operating temperature	-40°C...70°C

Wiring diagram

Fieldbus I/O module for DeviceNet

4 digital inputs, 4 configurable channels

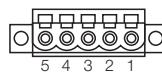

FDN20-4S-4XSG-DIN

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- Can be mounted on DIN rail
- 4 digital inputs
- 4 configurable channels, DI or DO
- 24 VDC
- pnp
- Output current: 0.5 A

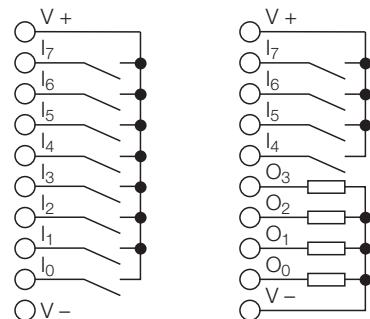

Type	FDN20-4S-4XSG-DIN
Ident-No.	6611377
Number of channels	8
Internal power consumption	< 50 mA plus I/O supply
Voltage supply via DeviceNet	24 VDC
Admissible range field supply	11...26 VDC
Fieldbus transmission rate	125 kbps to 500 kbps
Fieldbus addressing range	0...63
Fieldbus addressing	2 decimal coded rotary switches
Inputs	
Input voltage	11...26 VDC
Low level signal voltage	< 4 V
High level signal voltage	8...24 V

The BL20 I/O system – The integrator for fieldbus, ident system, motor starter

Gateway – The system control

- The interface to the higher level control system
- Gateways e.g. for PROFIBUS-DP, CANopen, DeviceNet™, Ethernet/IP and Modbus TCP – also available as economy version

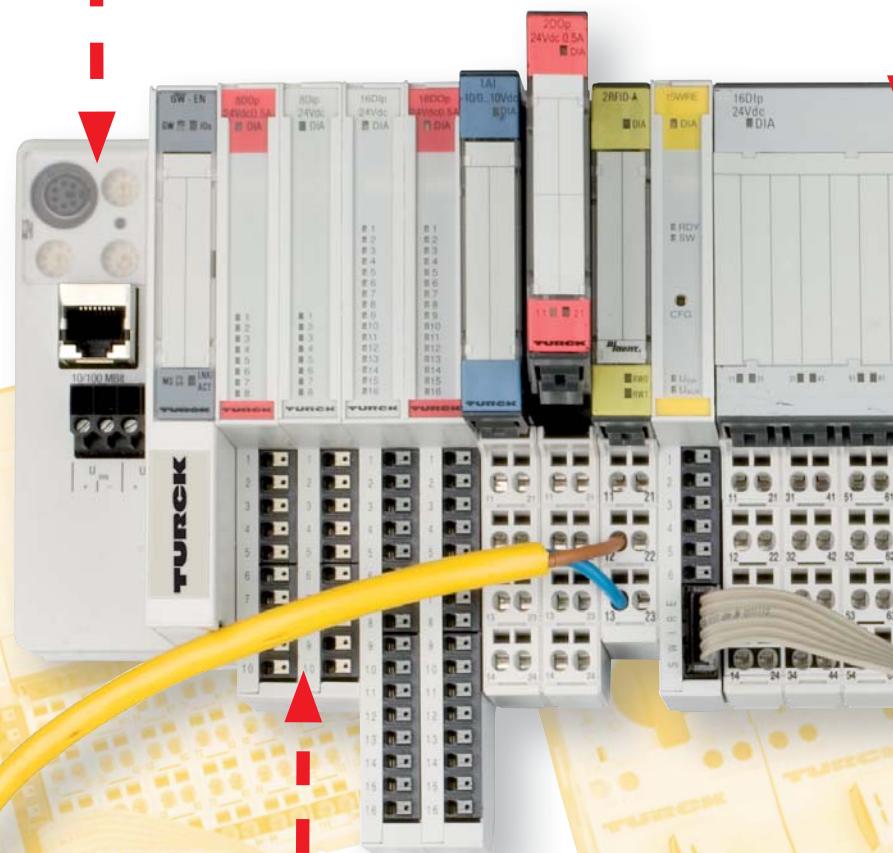

Optional – CoDeSys programmable according to IEC 61131

- Relieves higher-level controller and bus system
- I/O modules independent of the fieldbus
- Prefabricated function blocks e.g. for the RFID system *BL ident®*

Economy I/O – extremely compact and competitively priced

- 8 or 16 I/Os in only 12,5 mm
- Integrated connection level with „Push-in“ tension spring technology, no tools necessary
- Economy I/Os combinable with standard I/O slices

BL ident®, the RFID system

- Up to 8 RFID channels
- Pre-processing in programmable gateway relieves the higher-level controller.

EtherNet/IP™

PROFINET
INDUSTRIAL ETHERNET

Modbus TCP

Standard I/O – multifunctional and system friendly

- Exchangeable electronic modules – disconnection of field wiring is not necessary.
- Up to two neighbouring modules are exchangeable during normal system operation without disrupting system functions
- Single or block modules with screw or cage clamp terminals

I/O-ASSISTANT

- Planning, configuration, commissioning and diagnostic software
- Based on FDT/DTM technology
- Available as freeware on www.turck.com

Motor starter

- 3 connection-slices per gateway
- Up to 16 devices per slice
- Simple wiring

CANopen

PROFI
PROCESS FIELD BUS
BUS

DeviceNet™

Easy programming with CoDeSys according to IEC 61131-3

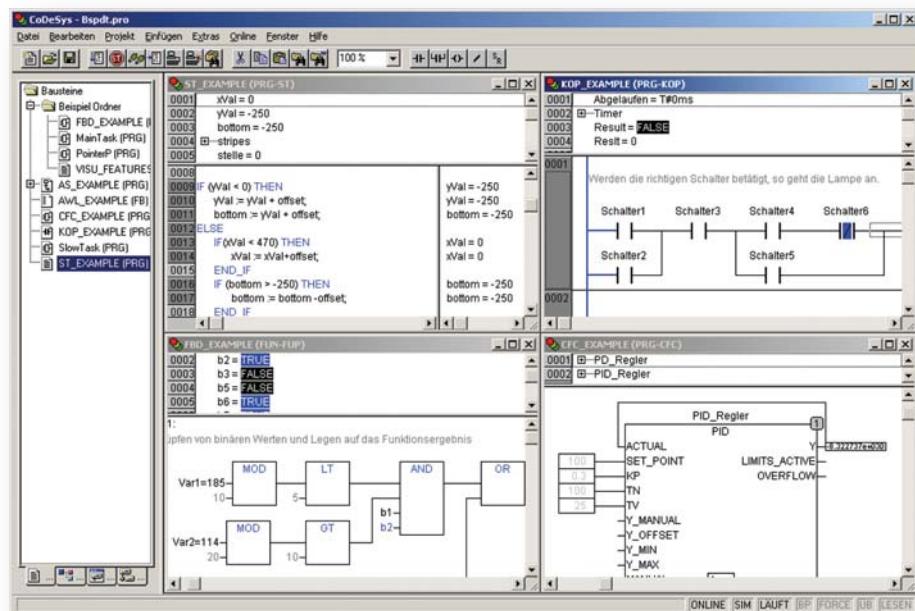

The programmable gateways become decentral control units with the CoDeSys programming software. The graphical programming interface supports all IEC-61131-3 programming languages

- Statement list (STL)
- Ladder Diagram (LD)
- Continuous Function Chart (CFC)
- Structured Text (ST)
- Sequential Function Chart (AS)

Simple connection

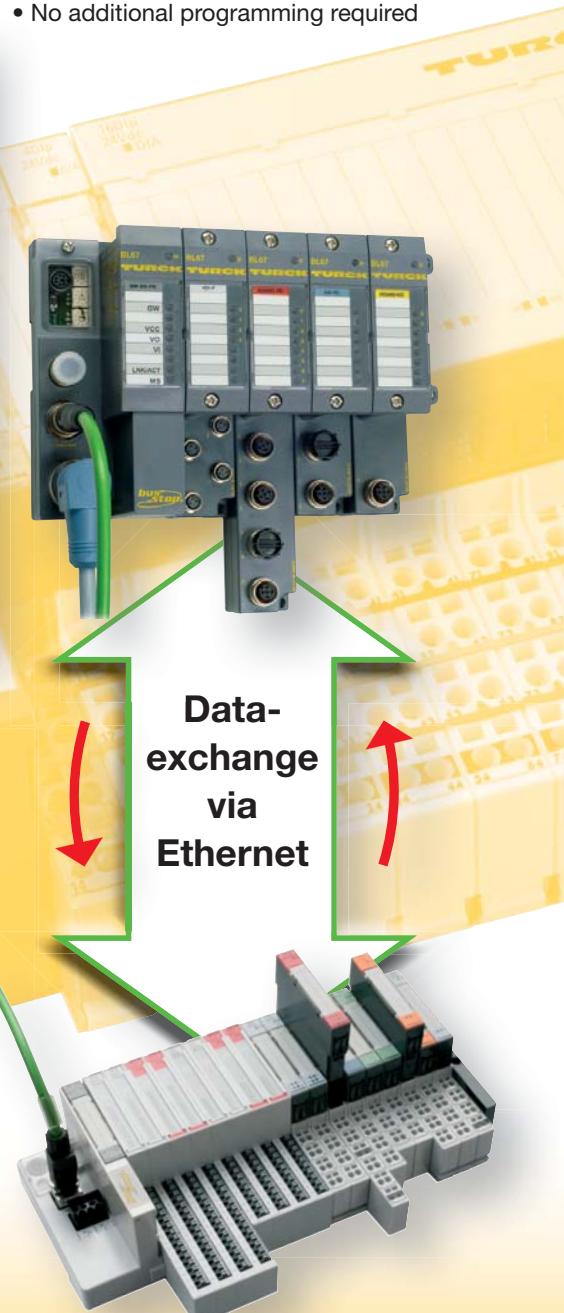

- Fast and simple networking of heterogeneous systems
- Standard transmission protocols such as TCP/IP and UDP/IP
- Global network variables
- Bidirectional data exchange between CoDeSys systems
- No additional programming required

Project planning and configuration

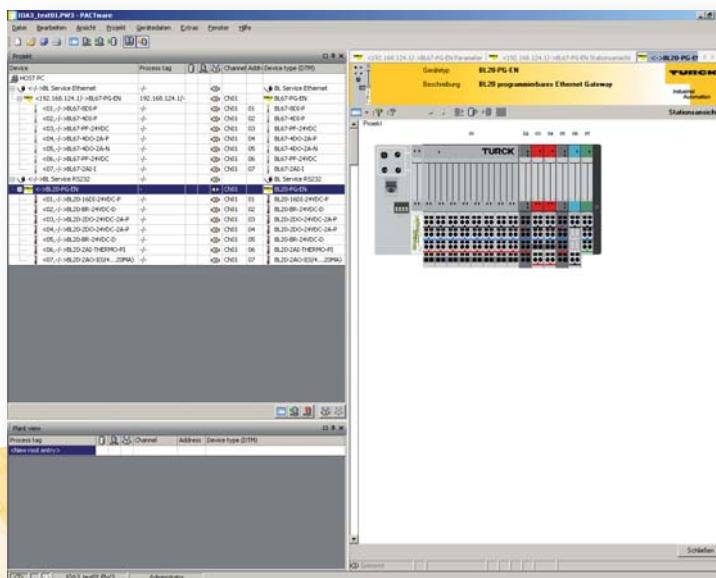

- Target Support Package as a driver for the target system
- Drag and Drop function for hardware configuration
- Standard editor for I/O configuration and parameterisation
- Symbolic display of variables for I/O addresses
- Numerous diagnostics and commissioning functions
- Function blocks e. g. for the RFID system *BL ident®*

Data-exchange via Ethernet

Easy parameterisation with the I/O-ASSISTANT on the basis of FDT/DTM technology

- System configuration, parameterisation and diagnostics with a graphical interface based on FDT/DTM technology
- DTM can be integrated in any FDT frame application for configuration, commissioning and maintenance
- I/O-ASSISTANT and DTMs are available as freeware on www.turck.com

Description

The configuration software I/O-ASSISTANT supports you in planning and implementation of your I/O system. No matter if you are online or offline, the I/O-ASSISTANT simplifies configuration and parameterisation of the modules.

This software is also extremely helpful in system set-up and testing.

Functions

- Supporting software tool
- Selection of the required modules
- Offline planning and configuration of BL20 modules
- Configuration, parameterisation and commissioning of individual modules
- Reading and setting of process data
- Commissioning help for testing the wiring and sensors without PLC
- Realistic display of configured BL20 components
- Automatic documentation of configured BL20 systems

BL20 – System supply

General system power supply

The BL20 system features two power circuits:

- The internal module bus feeds the module electronics and the gateway.
- The field supply feeds all connected fieldbus devices.

Forming potential groups

Bus-Refreshing modules as well as Power-Feeding modules can be used for the creation of potential groups.

Modules with 24 VDC and 120/230 VAC field supply should not be used in the same potential group.

The use of digital input modules for 120/230 VAC requires the creation of a separate potential group with the Power-Feeding module BL20-PF-120/230VAC-D.

Module bus supply

The voltage supply for the module bus is integrated in current BL20 gateways. If the module bus is not sufficiently supplied (max. 1.5 A), a second Refreshing-Module has to be applied – see chapter **Supply concept** on the next page .

NOTE: Bus-Refreshing modules can not be used in combination with the Economy gateway for PROFIBUS-DP.

Rated current consumption

The following table shows the rated current consumption of the different BL20 modules on the module bus.

Field supply

The field supply is provided by the gateway.

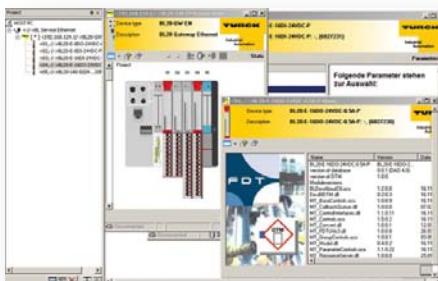

A Power-Feeding module has to be used if the field supply of fieldbus nodes reaches 10 A or a new potential group is required (see section to the left).

System planning

For the planning of many complex BL20 stations, different factors have to be considered. For example rated current consumption of the modules, number of modules, parameters and data volume and possible restrictions imposed by the higher level fieldbus.

The I/O-ASSISTANT (p.331), which can be downloaded from our website checks all relevant parameters and simplifies project planning considerably.

The I/O-ASSISTANT is also able to generate dimension drawings and documentation of the stations. Reading and setting of I/Os is also possible which proves very helpful for commissioning. Furthermore, module parameters can be set.

Module	Supply I_{MB}^1	Rated current consumption I_{MB}^1
Gateway PROFIBUS-DP		430 mA
Gateway DeviceNet™		250 mA
Gateway CANOPEN		350 mA

² I_{EI} : electrical operating current (field supply)

BL20 – Power supply concept

TURCK

Industrial
Automation

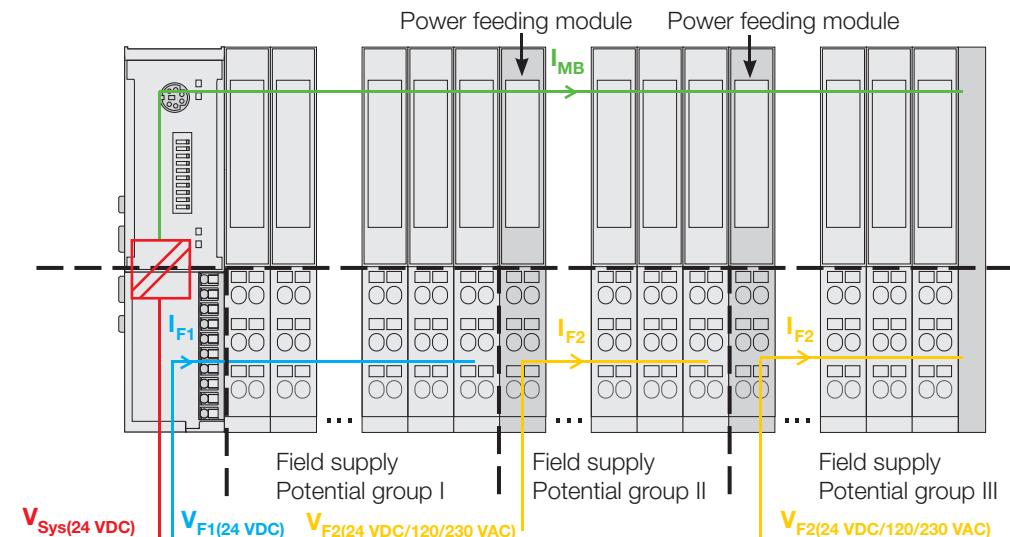

Standard gateways (with integrated power supply)

V_{MB} = Internal module bus
 V_{Sys} = System supply
 V_{F1} = Field supply 1
 V_{F2} = Field supply 2

$I_{MBmax} = 1,5\text{ A}$
 $I_{F1max} = 10\text{ A}$
 $I_{F2max} = 10\text{ A}$

Economy gateway for PROFIBUS-DP (with integrated power supply)

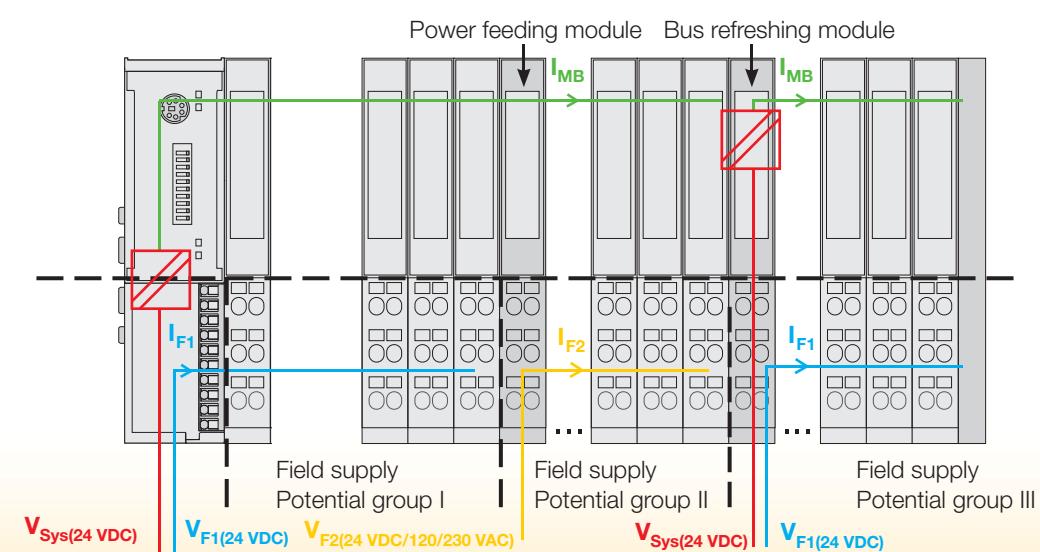

V_{MB} = Internal module bus
 V_{Sys} = System supply
 V_{F1} = Field supply 1
 V_{F2} = Field supply 2

$I_{MBmax} = 1\text{ A}$
 $I_{F1max} = 10\text{ A}$
 $I_{F2max} = 10\text{ A}$

Note: No application of bus refreshing module possible with Economy Gateway for PROFIBUS-DP.

Economy gateway for CANopen (with integrated power supply)

V_{MB} = Internal module bus
 V_{Sys} = System supply
 V_{F1} = Field supply 1
 V_{F2} = Field supply 2

$I_{MBmax} = 0,7\text{ A}$
 $I_{F1max} = 10\text{ A}$
 $I_{F2max} = 10\text{ A}$

BL20 – Maximum system extension

Maximum system extension

The maximum number of modules depends on the respective system configuration. Important thereby is the current consumption of the different I/O

modules (see table rated current consumption, p.336) as well as the required address space and the fieldbus used. The tables below show some of the limitations for different fieldbuses.

The configuration software I/O- ASSISTANT takes these and all other relevant parameters into consideration and generates a warning message if appropriate.

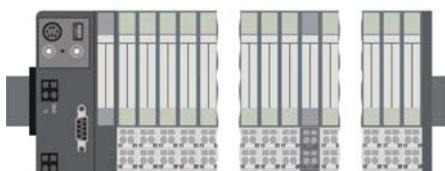

Standard gateways

A BL20 station consists of a gateway and a maximum of 74 modules (approximately 1 m length of rail including end bracket and end plate). With the use of block modules, the maximum number of modules is correspondingly reduced (1 block module corresponds to approximately 8 slice modules).

up to 74 module slices on a length of approx. 1 m

C-rail (cross connection)

The C-rails run through all I/O base modules. The C-rail of the base modules for power distribution modules is mechanically separated; thus potentially isolating the adjoining supply groups.

Access to C-rail

Access to the C-rail is made via base modules with a C in their designation, for example: BL20-S4T-SBCS.

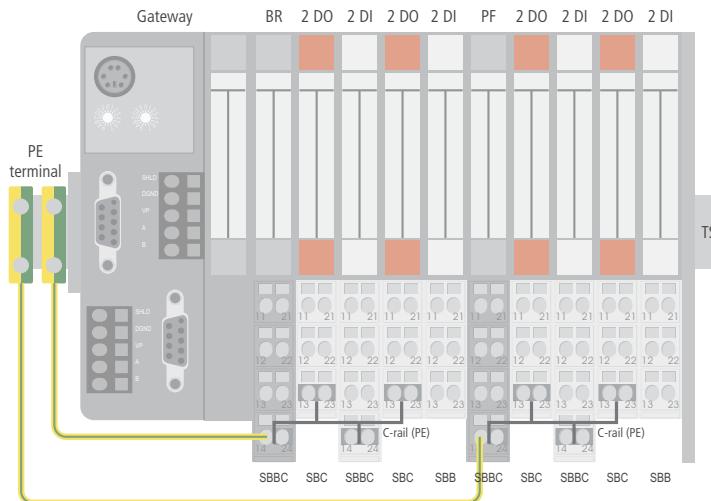

The corresponding connection level is indicated by a thick black line on all base modules for BL20 I/O modules.

With base modules for power distribution modules, the black line is above the connection 24 only. This makes clear that the C-rail is separated from the adjoining potential group to its left. A maximum load of 24 VDC to the C-rail is allowed, but never 120/130 VAC.

Using the C-rail as a protective earth

The C-rail can be used as required in the application, for example, as a protective earth (PE). In this case, the PE connection of each power distribution module

must be connected to the mounting rail via an additional PE terminal (see accessories), which is available as an accessory.

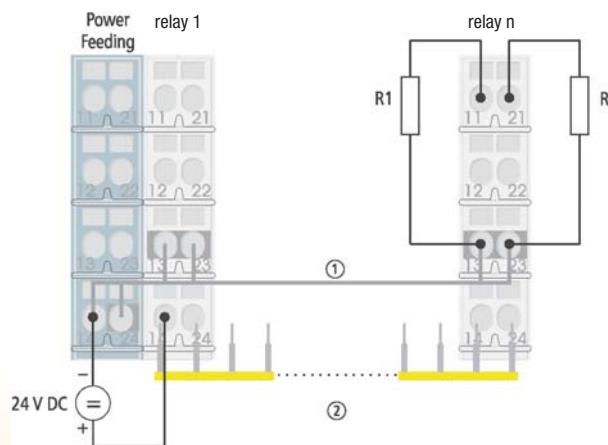

Using the C-rail with relay modules

The C-rail can be used to supply a common voltage when relay modules are to be used.

To accomplish this, the load voltage (24 VDC) is connected to a power distribution module with the base module BL20-P4x-SBBC using either tension springs or screw connections. All the following relay modules are supplied with 24 VDC via the C-rail (see ①, Fig. below).

The cross-connection of the individual relay modules is achieved using the cross-connector QVR (see ②, Fig. below).

If the C-rail is to be used for the joint supply of voltage to relay modules, then there must subsequently be a further power distribution module used for the potential isolation of the following BL20 modules. The C-rail can again be put on other uses (for example, as a PE) once the potential isolation has been made.

BL20 – General technical data

BL20 modules – technical data

Supply voltage/auxiliary power	
Nominal value (provided for other modules)	24 VDC
Residual ripple	according to EN 61131-2
Electrical isolation (U_L^2 to U_{SYS}^3 / U_L to fieldbus/ U_{SYS} to fieldbus)	yes, via opto-couplers
Ambient temperature	
Horizontal mounting ambient temperature	0 ... +55 °C
Vertical mounting ambient temperature	0 ... +55 °C
Storage temperature	-25 ... +85 °C
Relative humidity to EN 61131-2/EN 50178	5 ... 95 % (indoor), Level RH-2, no condensation (storage at 45 °C, no functional test)
Corrosive gases	
SO_2	10 ppm (rel. humidity < 75 %, no condensation)
H_2S	1.0 ppm (rel. humidity < 75 %, no condensation)
Vibration resistance	
10 to 57 Hz, constant amplitude 0.075 mm, 1 g	yes
57 to 150 Hz, constant amplitude 1 g	yes
Vibration type	Variable frequency runs at a rate of change of 1 octave/min
Vibration duration	20 variable frequency runs per coordinate axis
Shock resistance as per IEC 68-2-27	18 shocks, half-sine 15 g peak value/11 ms, for both ±-directions per spatial coordinate
Repeated shock resistance as per IEC 68-2-29	1000 shocks, half sine 25 g peak value/6 ms, for both ±-directions per spatial coordinate
Drop and topple	
Fall height (weight < 10 kg)	1.0 m
Fall height (weight 10 to 40 kg)	0.5 m
Test runs	7
Electromagnetic compatibility (EMC) as per EN 50082-2 (Industrial)	
Static electricity as per EN 61000-4-2	
Air discharge (direct)	8 kV
Relay discharge (indirect)	4 kV
Electromagnetic HF fields as per EN 61000-4-3 and ENV 50204	10 V/m
Conducted interference, induced by HF fields as per EN 61000-4-6	10 V
Radiated interference as per EN 50081-2 (industrial)	to EN 55011 class A ¹ , group 1

¹ Use in residential areas may lead to functional errors. Additional suppression measures are necessary!

Gateway for BL20 I/O system

Interface for PROFIBUS-DP incl. supply

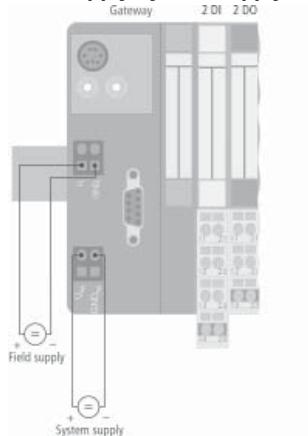

BL20-GW-DPV1

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- 2 x end brackets BL20-WEW35/2-SW
- 1 x end plate BL20-ABPL
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL20 system and PROFIBUS-DPV0/DPV1
- 12 Mbps
- 9-pole sub-D female connector

Type	BL20-GW-DPV1
Ident-No.	6827234
System power supply	
Field supply	24 VDC / 5 VDC
Admissible range	24 VDC
Rated current from module bus	18...30 VDC
Max. field supply current	≤ 430 mA
Max. system supply current	10 A
Voltage supply connection	1.5 A
	screw connection
Fieldbus transmission rate	
Fieldbus addressing range	9.6 kbps up to 12 Mbps
Fieldbus addressing	1...99
Service interface	2 rotary switches
Fieldbus connection technology	PS/2 socket for I/O-ASSISTANT
Voltage supply connection	1 x female sub-D connector
Fieldbus connection	screw connection
	external
Number of diagnostic bytes	
Number of parameter bytes	3
	5
Operating temperature	
	0 to +55 °C

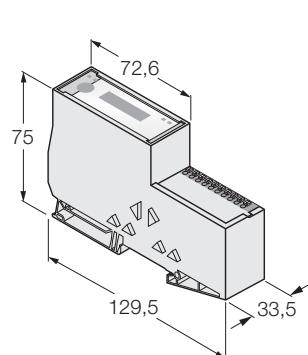

Field supply/system supply

Gateway for BL20 I/O system

Interface for PROFIBUS-DP

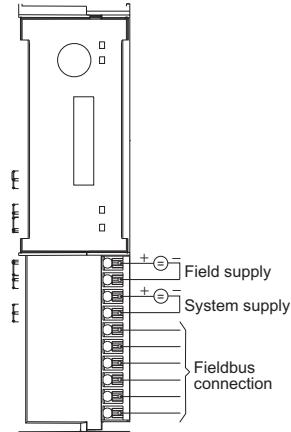

BL20-E-GW-DP

- DIP switch rotary for adjustment of the node address
- Degree of protection IP20
- 2 x end brackets BL20-WEW35/2-SW
- 1 x end plate BL20-ABPL
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL20 system and PROFIBUS-DPV0/DPV1
- 12 Mbit/s
- Push-in clamps

Type	BL20-E-GW-DP
Ident-No.	6827250
System power supply	24 VDC / 5 VDC
Field supply	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 430 mA
Max. field supply current	10 A
Max. system supply current	1 A
Voltage supply connection	Push-in clamps
Fieldbus transmission rate	9.6 kbps up to 12 Mbps
Fieldbus addressing range	1...126
Fieldbus addressing	per DIP switch
Service interface	PS/2 socket for I/O-ASSISTANT
Fieldbus connection technology	push-in clamps
Voltage supply connection	push-in clamps
Fieldbus connection	per DIP switch
Number of diagnostic bytes	3
Number of parameter bytes	5
Operating temperature	0 to +55 °C

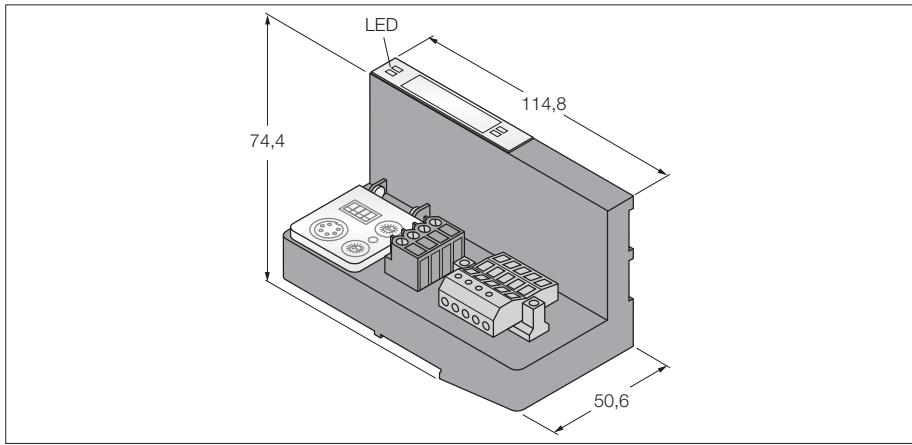

Field supply/system supply

Gateway for BL20 I/O system

Interface for DeviceNet incl. supply

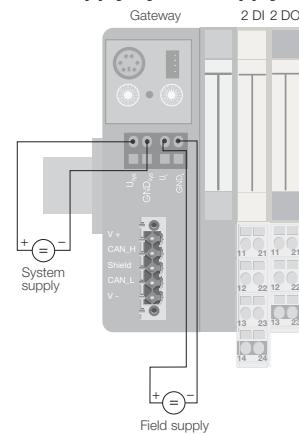

BL20-GWBR-DNET

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- 2 x end brackets BL20-WEW35/2-SW
- 1 x end plate BL20-ABPL
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL20 system and DeviceNet
- 125 / 250 / 500 kbps
- The connection to DeviceNet is established via an Open-Style-Connector

Type	BL20-GWBR-DNET
Ident-No.	6827168
System power supply	
Field supply	24 VDC / 5 VDC
Admissible range	24 VDC
Rated current from module bus	18...30 VDC
Max. field supply current	≤ 250 mA
Max. system supply current	10 A
Voltage supply connection	1.5 A
screw connection	
Fieldbus transmission rate	
Fieldbus addressing range	125/250/500 kbps, DIP switch
Fieldbus addressing	0...63
Service interface	2 rotary switches
Fieldbus connection technology	PS/2 socket for I/O-ASSISTANT
Voltage supply connection	open connector
Fieldbus connection	screw connection
external	
Operating temperature	0 to +55 °C

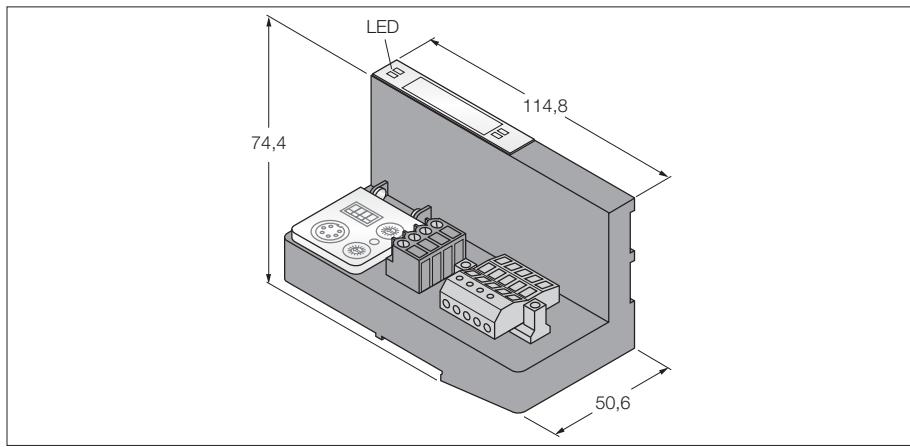

Field supply/system supply

Gateway for BL20 I/O system

Interface for CANopen incl. supply

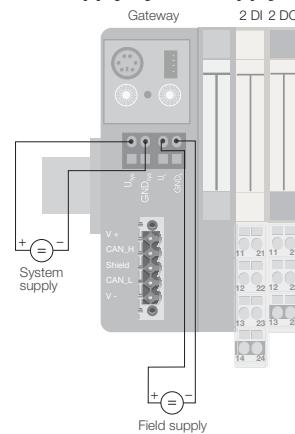

BL20-GWBR-CANOPEN

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- 2 x end brackets BL20-WEW35/2-SW
- 1 x end plate BL20-ABPL
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between BL20 system and CAN bus
- 20 kbps up to 1000 kbps
- The connection to CANopen is established via an open-style connector

Type	BL20-GWBR-CANOPEN
Ident-No.	6827167
System power supply	
Field supply	24 VDC / 5 VDC
Admissible range	24 VDC
Rated current from module bus	18...30 VDC
Max. field supply current	≤ 350 mA
Max. system supply current	10 A
Voltage supply connection	1.5 A
Fieldbus transmission rate	
Fieldbus addressing range	20 to 1000 kbps, DIP switch
Fieldbus addressing	1...99
Service interface	2 rotary switches
Fieldbus connection technology	PS/2 socket for I/O-ASSISTANT
Voltage supply connection	open connector
Fieldbus connection	screw connection
Operating temperature	
	0 to +55 °C

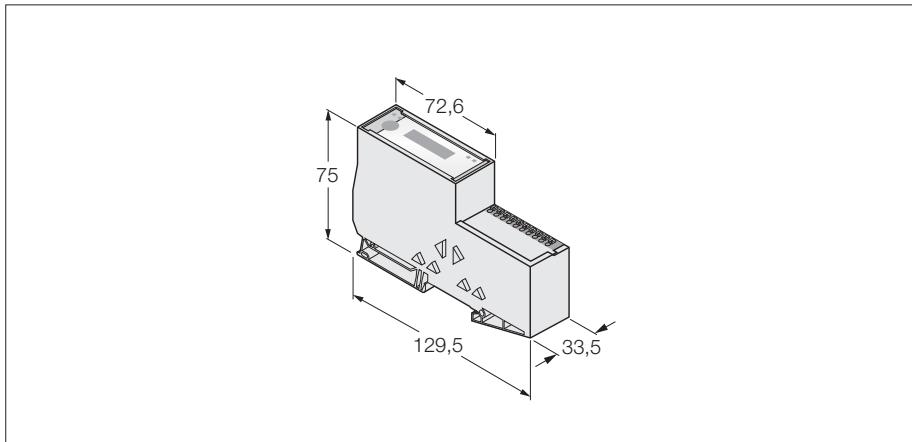

Field supply/system supply

Gateway for BL20 I/O system

Interface for CANopen

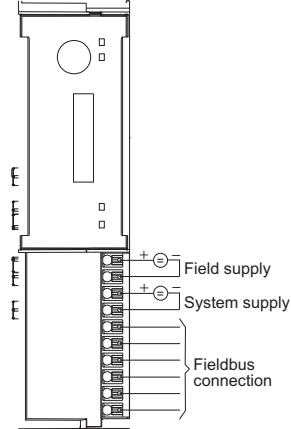

BL20-E-GW-CO

- DIP switch rotary for adjustment of the node address
- Degree of protection IP20
- 2 x end brackets BL20-WEW35/2-SW
- 1 x end plate BL20-ABPL
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL20 system and CANopen
- 1 Mbps
- Push-in clamps

Type	BL20-E-GW-CO
Ident-No.	6827252
System power supply	24 VDC / 5 VDC
Field supply	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 430 mA
Max. field supply current	10 A
Max. system supply current	1.5 A
Voltage supply connection	push-in clamps
Fieldbus transmission rate	125 kbps to 500 kbps
Fieldbus addressing range	1...63
Fieldbus addressing	per DIP switch
Service interface	PS/2 socket for I/O-ASSISTANT
Fieldbus connection technology	push-in clamps
Voltage supply connection	push-in clamps
Fieldbus connection	per DIP switch
Number of diagnostic bytes	3
Number of parameter bytes	5
Operating temperature	0 to +55 °C

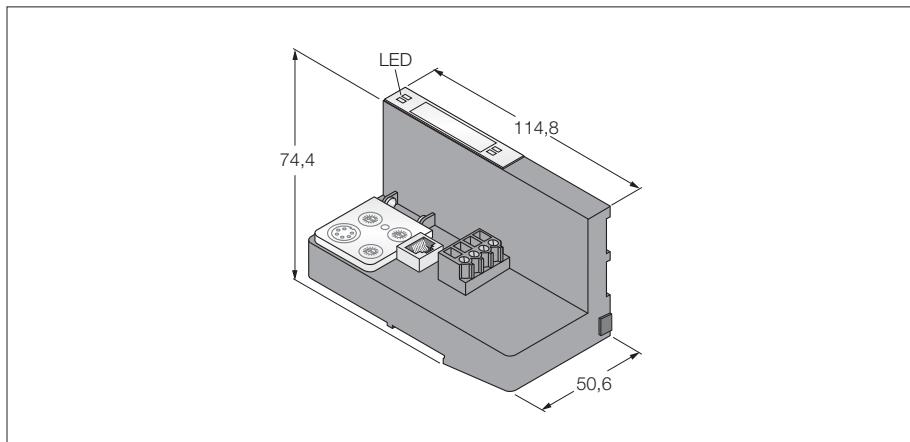

Field supply/system supply

Gateway for BL20 I/O system

Interface for MODBUS TCP incl. supply

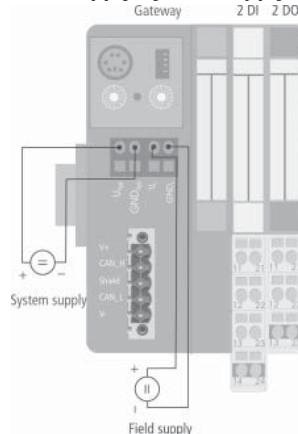

BL20-GW-EN

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- 2 x end brackets BL20-WEW35/2-SW
- 1 x end plate BL20-ABPL
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL20 system and MODBUS TCP
- 10/100 Mbps
- RJ45 socket

Type	BL20-GW-EN
Ident-No.	6827237
System power supply	24 VDC / 5 VDC
Field supply	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 500 mA
Max. field supply current	10 A
Max. system supply current	1.5 A
Voltage supply connection	screw connection
Fieldbus transmission rate	10/100 Mbps
Fieldbus addressing	rotary switch, BOOTP, DHCP, IO-ASSISTANT
Service interface	PS/2 socket for I/O-ASSISTANT
Fieldbus connection technology	RJ45 socket
Voltage supply connection	screw connection
Operating temperature	0 to +55 °C

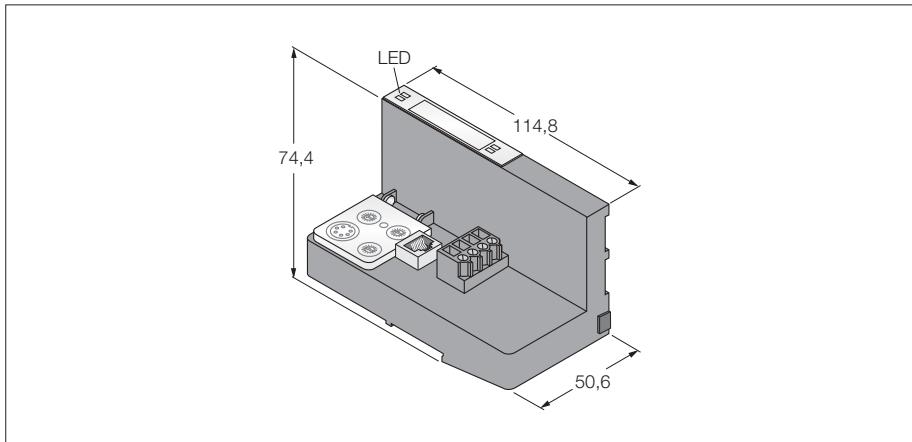

Field supply/system supply

Gateway for BL20 I/O system

Interface for EtherNet/IP supply inclusive

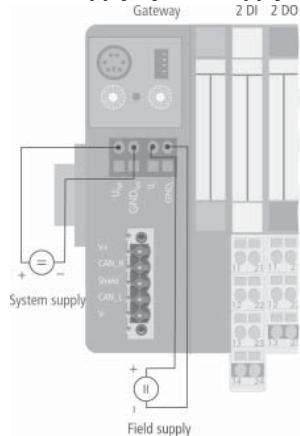

BL20-GW-EN-IP

- Rotary coding switch for adjustment of the node address
- Degree of protection IP20
- 2 x end brackets BL20-WEW35/2-SW
- 1 x end plate BL20-ABPL
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface between the BL20 system and EtherNet/IP
- 10/100 Mbps
- RJ45 socket

Type	BL20-GW-EN-IP
Ident-No.	6827247
System power supply	24 VDC / 5 VDC
Field supply	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 500 mA
Max. field supply current	10 A
Max. system supply current	1.5 A
Voltage supply connection	screw connection
Fieldbus transmission rate	10/100 Mbps
Fieldbus addressing	rotary switch, BOOTP, DHCP, IO-ASSISTANT
Service interface	PS/2 socket for I/O-ASSISTANT
Fieldbus connection technology	RJ45 socket
Voltage supply connection	screw connection
Operating temperature	0 to +55 °C

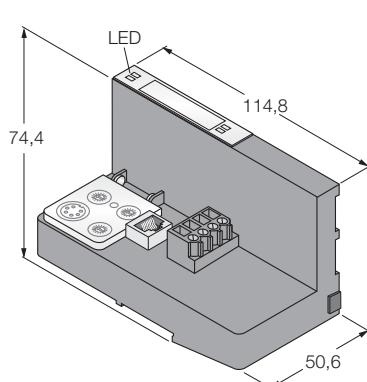

Field supply/system supply

Programmable gateway for the BL20 I/O system

Interface for MODBUS TCP incl. supply

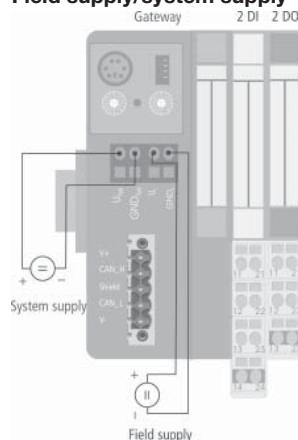

BL20-PG-EN

- Programmable acc.to IEC 61131-3 with CoDeSys
- Ethernet and RS232 programmable interface
- 512 kByte program memory
- 32 Bit RISC processor
- < 1 ms for 1000 instructions
- 3 decimaly coded rotary switches
- Degree of protection IP20
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface for MODBUS TCP
- 10/100 Mbps

Type	BL20-PG-EN
Ident-No.	6827249
System power supply	24 VDC
Admissible range	18...30 VDC
Rated current from module bus	≤ 500 mA
Max. field supply current	10 A
Max. system supply current	1.5 A
Voltage supply connection	screw connection
Fieldbus transmission rate	10/100 Mbps
Fieldbus addressing	rotary switch, BOOTP, DHCP, IO-ASSISTANT
Service interface	PS/2 socket for I/O-ASSISTANT
Fieldbus connection technology	RJ45 socket
Voltage supply connection	screw connection
PLC data	
Programming	CoDeSys V2.3
Released for CoDeSys version	V 2.3.6.4
Programming languages	IEC 61131-3 (IL, LD, FBD, SFC, ST)
Application tasks	1
Number of POUs	1024
Programming interface	RS232 interface, Ethernet
	RISC
	32 bit
Cycle time	< 1 ms for 1000 IL commands (without I/O cycle)
Program memory	512 kByte
Data memory	512 kByte
Input data	4 kByte
Output data	4 kByte
Non-volatile memory	16 kByte
Operating temperature	0 to +55 °C

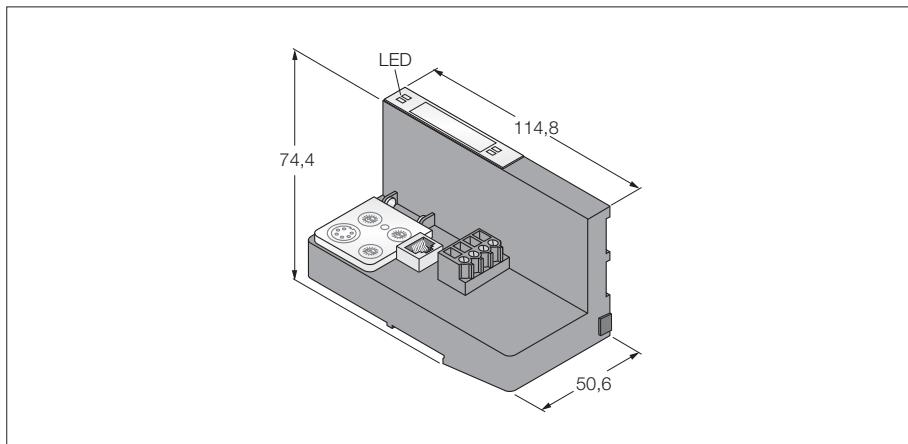

Field supply/system supply

Programmable gateway for the BL20 I/O system

Operating temperature	0 to +55 °C

- Programmable acc.to IEC 61131-3 with CoDeSys
- Ethernet and RS232 programmable interface
- 512 kByte program memory
- 32 Bit RISC processor
- < 1 ms for 1000 instructions
- 3 decimaly coded rotary switches
- Degree of protection IP20
- With integrated supply
- LEDs for display of supply voltage, common alarm and bus errors
- Interface for EtherNet/IP
- 10/100 Mbps

Field supply/system supply

Gateway 2 DI 2 DO

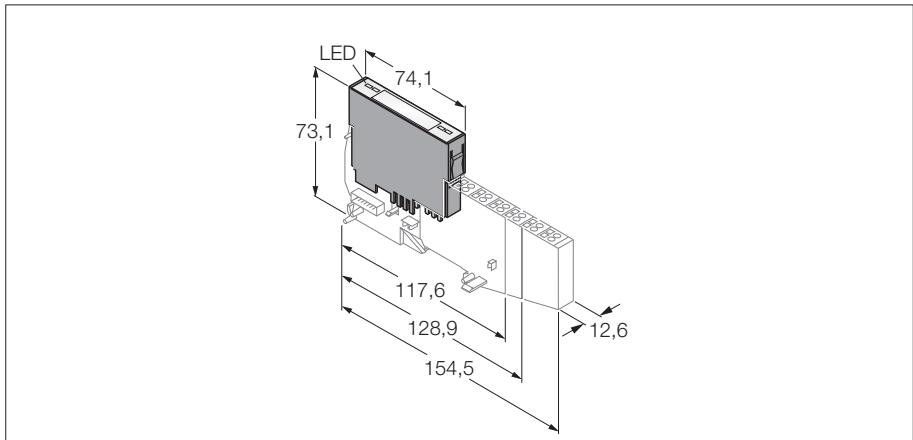

BL20 electronic module

Bus refreshing module with diagnostics

BL20-BR-24VDC-D

- Independent of the type of field-bus and connection technology used
- Degree of protection IP20
- LEDs for display of system status, field supply and diagnostic information
- Can be used to form potential groups
- Power supply of the BL20 I/O module and the gateway with a nominal system voltage of 5 VDC via the internal module bus
- Field supply featuring a rated voltage of 24 VDC

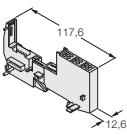

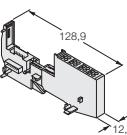

Type	BL20-BR-24VDC-D
Ident-No.	6827006
System power supply	24 VDC / 5 VDC
Field supply	24 VDC
Admissible range	18...30 VDC
Max. field supply current	10 A
Max. system supply current	1.5 A
Number of diagnostic bits	4
Operating temperature	0 to +55 °C

Ident-No.	6827017
Number of channels	2
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	≤ 30 mA
Rated current from module bus	≤ 45 mA
Power loss, typical	≤ 1 W
Inputs	
Input type	PT100, PT500, PT1000, Ni100, Ni1000
Electrical isolation	electronics for the field level
Basic fault limit at 23 °C	< 0.2 %
Repeatability	0.05 %
Temperature coefficient	< 300 ppm/°C of full scale
Resolution	16 Bit
Measured-value display	16 bit signed integer 12 bit full range left justified
Cycle time	≤ 130 ms
Measuring current	< 1 mA
Number of diagnostic bytes	2
Number of parameter bytes	4
Operating temperature	0 to +55 °C

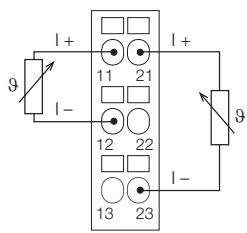

BL20 electronic module
2 analogue inputs for temperature measurement
BL20-2AI-PT/NI-2/3

Compatible base modules

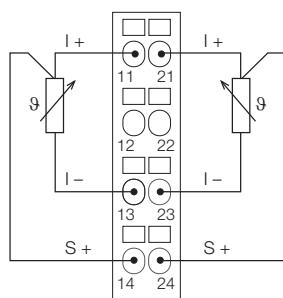

Dimensions	Type	Connection
	6827044 BL20-S3T-SBB Tension spring connection 6827045 BL20-S3S-SBB Screw connection	F213
	6827046 BL20-S4T-SBBS Tension spring connection 6827047 BL20-S4S-SBBS Screw connection	F214

Connection

F213 - 2-wire technology

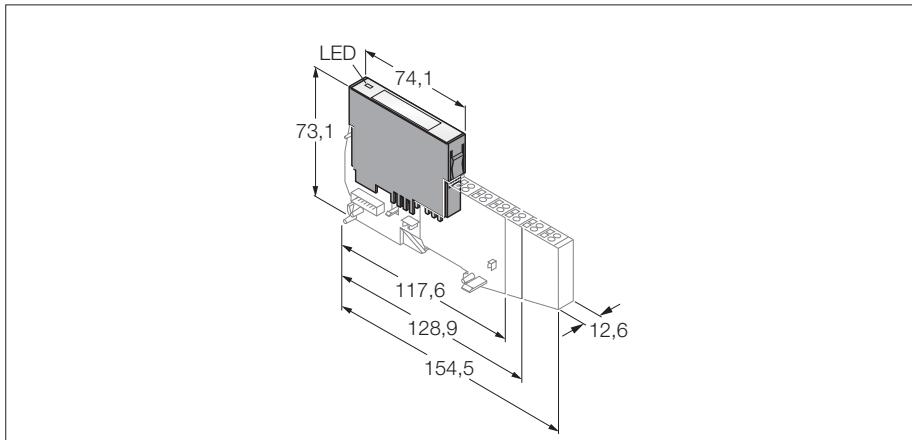

F214 - 3-wire technology

BL20 electronic module

2 analogue inputs for temperature measurement

BL20-2AI-THERMO-PI

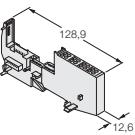

- Independent of the type of field-bus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 2 analogue inputs for connection of thermoelements, types B, E, J, K, N, R, S and T
- Base module with internal cold junction point compensation

Type	BL20-2AI-THERMO-PI
Ident-No.	6827020
Number of channels	2
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	$\leq 30 \text{ mA}$
Rated current from module bus	$\leq 45 \text{ mA}$
Power loss, typical	$\leq 1 \text{ W}$
Inputs	
Input type	types B, E, J, K, N, R, S, T
Electrical isolation	electronics for the field level
Voltage resolution	
Basic fault limit at 23 °C	+/-50mV: < 2µV
Repeatability	< 0.2 %
Temperature coefficient	0.05 %
Resolution	< 300 ppm/°C of full scale
Measured-value display	16 Bit
Cycle time	16 bit signed integer 12 bit full range left justified $\leq 60 \text{ ms}$
Number of diagnostic bytes	2
Number of parameter bytes	2
Operating temperature	0 to +55 °C

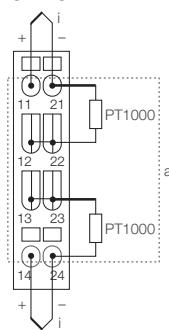

BL20 electronic module
2 analogue inputs for temperature measurement
BL20-2AI-THERMO-PI

Compatible base modules

Dimensions	Type	Connection
	6827048 BL20-S4T-SBBS-CJ Tension spring connection 6827049 BL20-S4S-SBBS-CJ Screw connection	F215

Connection

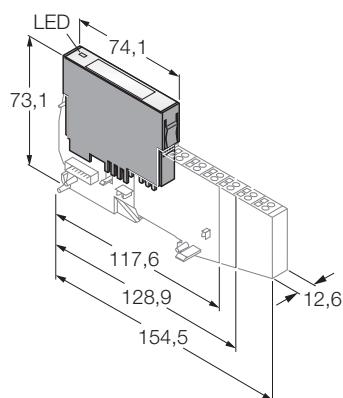

F215 - Wiring diagram

BL20 electronic module

4 analogue inputs

BL20-4AI-U/I

- Independent of the type of field-bus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 4 analogue inputs
- 0/4...20 mA or 10/0...+10 VDC
- Selectable per channel

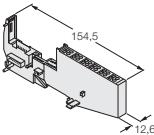

Type	BL20-4AI-U/I
Ident-No.	6827217
Number of channels	4
Rated voltage from the supply terminal	24 VDC
Max. input current	50 mA
Rated current from field supply	≤ 20 mA
Rated current from module bus	≤ 50 mA
Power loss, typical	≤ 1 W
Inputs	
Input type	0/4 ... 20 mA or -10/0 ... +10 VDC
Input resistance	< 0.062 bzw > 98.5
Max. input current	50 mA
Max. input voltage	35 V constant
Electrical isolation	electronics for the field level
Maximum limiting frequency, analogue	
Basic fault limit at 23 °C	< 20 Hz
Repeatability	< 0.3 %
Temperature coefficient	0.05 %
Resolution	< 300 ppm/°C of full scale
Measuring principle	16 Bit
Delta Sigma	
Number of diagnostic bytes	
Number of parameter bytes	4
Operating temperature	0 to +55 °C

BL20 electronic module

4 analogue inputs

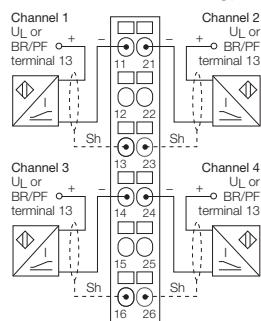

BL20-4AI-U/I

Compatible base modules

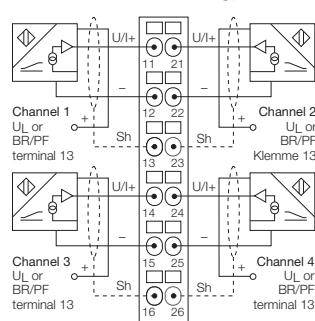

Dimensions	Type	Connection
	6827064 BL20-S6T-SBCSBC Tension spring connection 6827066 BL20-S6S-SBCSBC Screw connection	F216, F217, F218

Connection

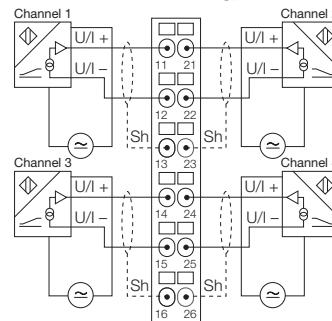

F216 - 2-wire technology

F217 - 3-wire technology

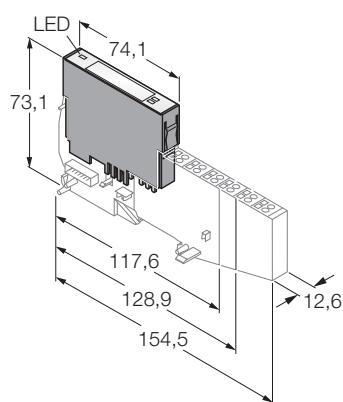

F218 - 4-wire technology

BL20 electronic module

2 digital outputs

BL20-2DO-24VDC-0,5A-P

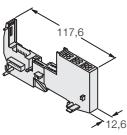

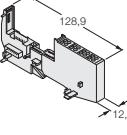

- Independent of the type of field-bus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 2 digital outputs, 24 VDC
- 0.5 A max.
- pnp

Type	BL20-2DO-24VDC-0,5A-P
Ident-No.	6827024
Number of channels	2
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	≤ 20 mA
Rated current from module bus	≤ 32 mA
Power loss, typical	≤ 1 W
Outputs	
Output type	pnp
Output voltage	24 VDC
Output current per channel	0.5 A
Output delay	0.1 ms
Load type	resistive, inductive, lamp load
Load resistance, resistive	> 48 Ω
Load resistance, inductive	< 1.2 H
Lamp load	< 3 W
Switching frequency, resistive	< 5000 Hz
Switching frequency, lamp load	< 10 Hz
Short-circuit protection	yes
Simultaneity factor	1
Electrical isolation	electronics for the field level
Number of diagnostic bits	2
Operating temperature	0 to +55 °C

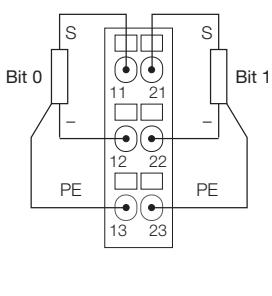

BL20 electronic module
2 digital outputs
BL20-2DO-24VDC-0,5A-P

Compatible base modules

BL20 electronic module

2 digital outputs

BL20-2DO-120/230VAC-0,5A

- Independent of the type of field-bus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- 2 digital outputs, 120/230 VAC
- 0.5 A max.

Type BL20-2DO-120/230VAC-0,5A

Ident-No. 6827137

Number of channels

2

Rated voltage from the supply terminal

120 / 230 VAC

Rated current from field supply

≤ 20 mA

Rated current from module bus

≤ 35 mA

Power loss, typical

≤ 1 W

Outputs

Output voltage 120 / 230 VAC

Output current per channel 0.5 A

Output delay 0.1 ms

Load type resistive, inductive, lamp load

Load resistance, resistive $> 48 \Omega$

Load resistance, inductive < 1.2 H

Short-circuit protection yes

Simultaneity factor 1

Electrical isolation electronics for the field level

Number of diagnostic bits

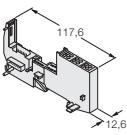

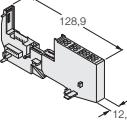

2

Operating temperature

0 to +55 °C

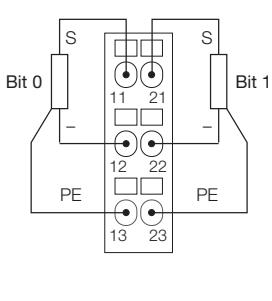

BL20 electronic module
2 digital outputs

BL20-1CNT-24VDC

- Independent of the type of field-bus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Detection of standard counting signals
- 1 digital input, 24 VDC
- 1 digital output, 24 VDC, 2 A
- Counting mode: „continuous count“, „single count“ or „periodic count“
- Measuring mode: frequency, rotational speed or period duration measurement

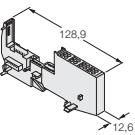

Type	BL20-1CNT-24VDC
Ident-No.	6827031
Number of channels	1
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	≤ 50 mA
Rated current from module bus	≤ 40 mA
Power loss, typical	≤ 1.3 W
Electrical isolation	isolation of electronics and field level via opto-couplers
Input type	1 x 24 VDC -30 to 5 VDC 11 to 30 VDC -8 mA to 1.5 mA 2 mA to 10 mA
Minimum pulse width (maximum count frequency)	> 25 µs (20 kHz)
Filter on	< 2.5 µs (200 kHz)
Filter off	< 0.2 ms
Outputs	1 x 24 VDC, 2 A 2 100 ms resistive, inductive, lamp load ≤ 100 Hz yes
Measuring ranges	0.1 Hz to 200 Hz 1 r/min to 25000 r/min 5 ms to 120 s 0 to 7FFF FFFF 8000 0000 to FFFF FFFF
Number of diagnostic bytes	1

RS232 interface

BL20-1RS232

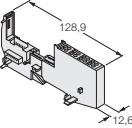

- Independent of the type of field-bus and connection technology used
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Transmission of serial data via RS232 interface
- For connection of different devices, such as printers, scanners or bar code readers

Type	BL20-1RS232
Ident-No.	6827169
Number of channels	1
Rated voltage from the supply terminal	24 VDC
Rated current from field supply	≤ 25 mA
Rated current from module bus	≤ 140 mA
Power loss, typical	≤ 1 W
Inputs / Outputs	
Transmission level active (URS1)	-15 to -3 VDC
Transmission level inactive (URSO)	3 to 15 VDC
Common-mode range (UGL)	-7 to 12 VDC
Transmission signals	RxD, TxD, RTS, CTS
Data buffer received	128 Byte
Send data buffer	64 Byte
Connection type	full duplex
Transmission rate	300 to 115200 bps
Parameter	transmission rate, diagnostics, data bits, stop bits, XON - character, XOFF - character, parity, flow control
Cable length	15m
Electrical isolation	isolation of electronics and field level via opto-couplers
Number of diagnostic bytes	1
Number of parameter bytes	4

BL20 Economy Module

SWIRE communication module

BL20-E-1SWIRE

- Independent of the type of field-bus used
- Electronics and connection technology in a single housing
- Tension spring connection technology
- Degree of protection IP20
- LEDs for display of status and diagnostics
- Electronics galvanically isolated from the field level via opto-couplers
- Supports the connection of a SWIRE branch.
- Maximum 16 nodes per SWIRE branch
- Maximum 3 SWIRE modules per BL20 station

Type	BL20-E-1SWIRE
Ident-No.	6827251
Number of channels	1 SWIRE branch
Admissible range	18...30 VDC
Voltage supply for contactor	24 VDC
Voltage supply for contactor	3 A
Rated current from module bus	$\leq 60 \text{ mA}$
Electrical isolation	isolation of electronics and field level via opto-couplers
Number of diagnostic bytes	8
Number of parameter bytes	24
Operating temperature	0 to +55 °C

BL20 motor starter – Save switching and protection of motors

Direct and reversing starters up to 15 kW

The motor starters consequently build upon the advantages of the BL20 system:

- Modular:
- Flexible
- Simple mounting and operation
- Cost-efficient

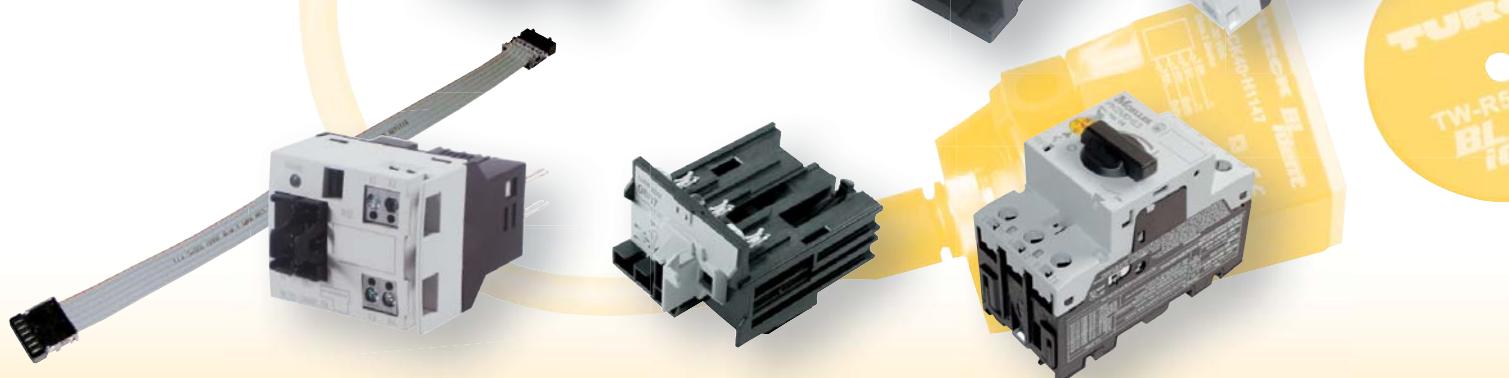

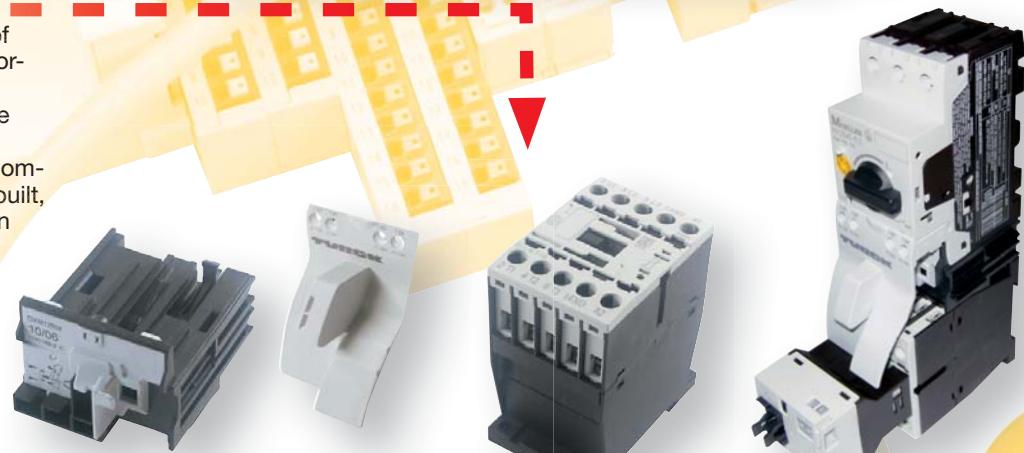

BL20 direct and reversing motor starters fulfil the requirements of the IEC/EN 60947-4-1 norm for industrial switching devices.

Modular mounting

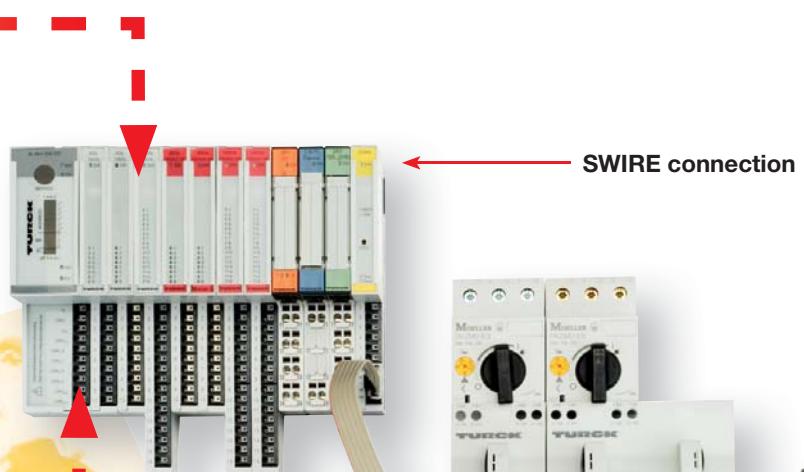

A BL20 motor starter is composed of standard components. Easy and error-free mounting of direct or reversing starters with a power range between 0.06 kW and 15 kW is thus possible. This applies to the single components of which a motor starter is built, as well as to the connection between motor starters and the gateway.

Should it become necessary to adapt the motor starter to altered conditions, the relevant components can be easily exchanged.

Compact system solution

The SWIRE connection module allows a maximum of 4 m between the module and the last motor starter. This allows an exceptionally flexible layout of the motor starters in the control cabinet and thus compact solutions.

**Communication**

Due to digital communications between the motor starters and the BL20, various diagnostics are available to the host system. This is realised without the need for extra I/Os.

This means:

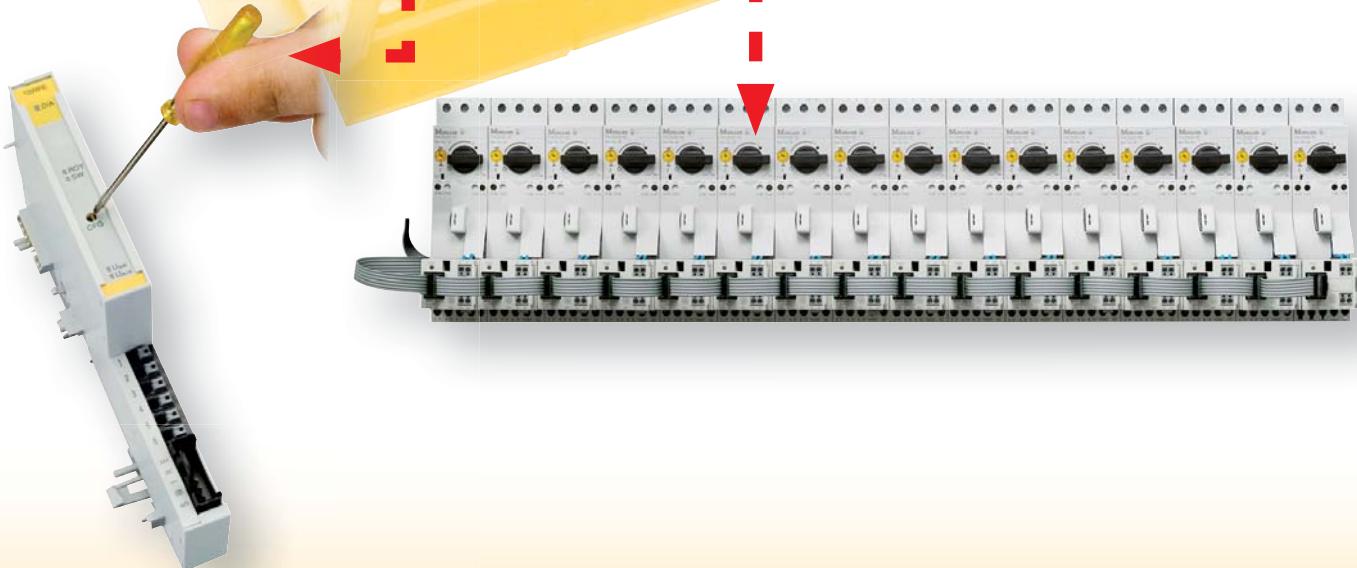

- Reduction of commissioning times
- Quick trouble shooting
- Lower costs

Configuration

The integration of motor starters in the BL20 system is very easy: All connected motor starters are configured in the BL20 system by a simple tap on a push-button.

Maximum system expansion

Up to 16 motor starters per SWIRE module, up to 3 SWIRE branches per BL20-system = up to 48 motor starters per fieldbus interface!

Electrical interlock wiring for reversing starters

Power contactors with a N.C. output are obligatory for the electrical interlock of reversing starters. The wiring is implemented by the user as shown on the left. All other necessary connections are implemented with pluggable bridges which are included in the wiring sets.

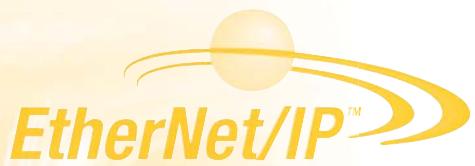

BL20 motor starter – Accessories

Figure	Description	Type	Ident-no.
	Three-phase current rail, insulated, $U_e = 690 \text{ V}$, $I_u = 63 \text{ A}$, extension enabled by rotated mounting, length 90 mm	B3.0/2-PKZ0	6827099
	Three-phase current rail, insulated, $U_e = 690 \text{ V}$, $I_u = 63 \text{ A}$, extension enabled by rotated mounting, length 180 mm	B3.0/4-PKZ1	6827098
	Input terminal for three-phase current rail, insulated, $U_e = 690 \text{ V}$, $I_u = 63 \text{ A}$,	BK25/3-PKZ0	6827134
	No-load connection cover for non-assigned connections at three-phase current rails 20 pcs/ package	H-B3-PKZ0(20pcs)	6827544
	SWIRE power module. For power supply of SWIRE branches. Is applied when groups of motor starters have to be disconnected. Max. 4 Power modules per SWIRE branch.	BL20-SWIRE-PF	6827288
	Terminating connector for SWIRE-branches, no electrical function 25 pcs / package	BL20-SWIRE-CAB-000 (25pcs)	6827292
	SWIRE connection cable, length 85 mm 25 pcs / package	BL20-SWIRE-CAB-008 (25pcs)	6827274
	SWIRE connection cable, length 110 mm 25 pcs / package	BL20-SWIRE-CAB-011 (25pcs)	6827275
	SWIRE connection cable, length 150 mm 5 pcs / package	BL20-SWIRE-CAB-015 (5pcs)	6827293
	SWIRE connection cable, length 250 mm 5 pcs / package	BL20-SWIRE-CAB-025 (5pcs)	6827276
	SWIRE connection cable, length 500 mm	BL20-SWIRE-CAB-050	6827296
	SWIRE connection cable, length 1000 mm	BL20-SWIRE-CAB-100	6827294
	SWIRE connection cable, length 2000 mm	BL20-SWIRE-CAB-200	6827295
	Mechanical interlock for reversing starters with power contactors DILM7-DILM15	DILM12-XMV	6827269
	Mechanical interlock for reversing starters with power contactors DILM17-DILM32	DILM32-XMV	6827545

JIT – Just in Time

Ideally the length of the cord set is adjusted according to the requirements of the plant. For this reason TURCK now offers a Just-In-Time-delivery service (JIT) for premoulded cables.

The new JIT-5D-Programme for perfect connections:

- Just-In-Time delivery within 5 days only*
- Free choice of cable length
- Premoulded fieldbus and power cables
- High flexibility with respect to planning and mounting of your application
- High cost savings

**Delivery
3 workdays
after ordering**

**Arrival
at the
customer**

**JUST
IN
TIME!**

**5.
Workday***

**Ordering until
